NEW YORK. POST OFFICE BOX 958.

## CLEARING HOUSE RETURNS.

The following table, made up by telegraph, etc., indicates hat the total bank clearings of all the clearing houses of the United States for the week ending to-day, September 24, have been \$1,315,914,471, against \$1,354,731,269 last week and \$1,328,800,416 the corresponding week of last year.

CLHARINGS.	Week Ending September 24.					
Returns by Telegraph.	1898.	1897.	Per Cent.			
New York	\$680.818,899	8710,364,836	-1.8			
Boston	79,928,203	88,687,716	-8.8			
Philadelphia	56,163,424	56,296,243	-0.2			
Baitimore	14,017,365	13,525,023	+3.6			
Chicago	87,715,259	79,990,943	+9.7			
St. Louis	22,295,518	22,368,571	-0.3			
New Orleans	4;911,529	5,387,624	-8.8			
Seven cities, 5 days	8945,979,197	<b>\$976,600,956</b>	-3.1			
Other oities, 5 days	150,019,263	141,082,416	+6.3			
Total all cities, 5 days	\$1,095,898,460	\$1,117,633,373	-2.0			
All office, I day	220,016,011	\$11,117,044	+4.2			
Total all cities for week	\$1,815 914,471	\$1.324.800.416	-10			

the full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and nee in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night.

We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, September 17, and the results for the corresponding week in 1897, 1896 and 1895 are also given. In comparison with the preceding week, there is an increase in the aggregate exchanges of two hundred and fifty-eight million ioliars, and at New York alone the gain is one hundred and eighty-one millions. Contrasted with the week of 1897 the total for the whole country shows a decline of 3.5 per cent. Compared with the week of 1896 the current returns record a gain of 58.0 per cent, and the excess over 1895 is 26.7 per cent. Outside of New York the loss from 1897 is 2.4 per cent. The excess over 1896 reaches 37 7 per cent, and making comparison with 1895 the excess is seen to be 11.0 per cent.

	Week ending September 17.

## THE FINANCIAL SITUATION.

A strong wheat market led by a good foreign damand, an enlarged consumption of merchandise evidenced by decreasing stocks of most kinds of manufactured products and by an augmented movement of west-bound freight-these are some of the more conspicuousrecent indications of the industrial revival now in progress. The favorable reaction was earliest seen in the iron and steel markets and is still most manifest there; from that center its spread has been a slow development, conservative from the start, and is even now without any speculative stimulus. At first the outlook this year for the sailroads was only a fair business, the opinion prevailing that earnings would likely be less than the large totals of a year ago, the foreign demand for breadstuffs being much less urgent and prices much lower. But with the activity in trade circles extending, better results on the part of the carriers begin to be apparent-a natural product of the larger distribution of goods; this improvement will no doubt be further added to by passenger traffic as the rising prosperity more and more brings all classes of our population within its influence, there being wide room for growth in that department of railroad revenue. It may be, therefore, not long before the world will have ocular demonstration of what it means for 75 millions of people to get out of an industrial lethargy that has been cramping their energies with varying force for fifteen years or more and into a state of unfettered activity.

President Seth Low has touched the sensitive and decisive point in the industrial and political situation in discountenancing any separate action by the "independents" at the coming election for the reason, among others, that it might endanger the success of a sound money Senator from New York as well as sound money representatives in Congress. The fact is, until our currency has been rehabilitated the currency question must swallow up every other issue at any election which involves membership in our Federal Legislature. This November contest is the most critical one we have ever faced. It is most critical because such a rare opportunity for effective action is presented, which, if lost, means so much of possible harm. To be sure, the financial aspect of the country is for the moment, through a combination of fortuitous circumstances, synonymous with strength. But every business man knows that the currency condition is still valnerable and that its strength could be speedily sapped were circumstances for a very short period equally unfortuitous. In view of this fact and in the interest of continued prosperity, the sole purpose of industrial classes in their political action this year should be to bury the Chicago platform so that it may not rise to plague us again at the next Presidential election. All other issues are as nothing compared with that one. Besides, if the sound money classes act together we now have the opportunity presented to attain that end. It only calls for the united vote of those who favor a gold standard in the States where elections soon occur to secure a majority in the United States Senate and in Congress favorable to such a measure. If such results are attained the currency issue would drop out of politics. Thereafter no prophetic vision would be required to forecast the expansive nature of our industrial development.

A movement of gold from Europe of considerable proportions has set in this week. The state of our foreign trade, present and prospective, has indicated that such a movement could not be long deferred. To be sure, small amounts have been coming in for a month or more, but the larger part of these arrivals was in transit for Cuba. The total arrivals at New York since August 20, when the exports to Cuba began, to the end of last week, September 17, were only \$5,326,000, and out of that \$2,887,333 during the same period went to Cuba. This statement would show very little accumulation of gold as a result of the import and export movement during recent weeks; in fact we are of the opinion that there has been a considerable loss, though the Custom House figures indicate a small gain. The discrepancy is due to the fact that none of the gold taken from the Sub-Treasury and sent on Government vessels to pay the troops at Cuba, Porto Rico, Manila and elsewhere appears in the Custom House figures. We presume those items will be added hereafter, the earlier ones perhaps in the September statement. They must of course come into the record to keep the Mint Bureau's stock of gold in the country correct. But, as stated, the engagements in Europe for New York are larger this week, over \$6,000,000 having been announced. These larger takings have also encouraged the belief that imports of gold will continue through at least October and November of proportions sufficient to satisfy our money market requirements. In consequence of this movement and of the fact that Government accumulations because of the war loan have about ceased, while Treasury disbursements in excess of receipts are to be expected in future weeks, the money market has lost its position as a disturbing influence.

No class of roads is sharing in a more prominent degree in the renewed prosperity of our carrying interests than the Pacific roads, and particularly those lying to the north. We referred last week to the phenomenal record of the Northern Pacific. This week we have had further evidence of the great change for the better which has occurred in the condition of this class of roads. The new Union Pacific Company has declared its first dividend on its preferred stock. The stock is \$75,000,000 and the dividend is to be 11 per cent, calling for \$1,125,000. Divorced from Government control, the property is evidently doing well. The dividend is on the basis of the operations for the six months ending June 30 1898. A statement is submitted showing that in these six months the company earned a surplus above charges of \$1,796,685, not including the operations of the branch lines which are to form parts of the system and which it is estimated for the same six months netted a surplus of \$446,659. The Pacific Coast Company too (successor to the Oregon Improvement Company) is giving its stockholders tangible evidence of the improvement which, common with other roads in that The of the country, it is enjoying. Oregon Improvement Company seemed to present about as hopeless a case as any with which railroad reorganizers have had to deal. Yet the marvelous industrial revival on the North Pacific Coast has turned even this property into a paying concern again. The first dividend distribution on the new securities was made last July, and consisted of 5 per cent on the 1st preferred stock and 1

per cent on the 2d preferred stock. This is now followed by a further dividend of 3 per cent on the 2d preferred stock (making the full 4 per cent to which that stock is entitled) and a dividend of 1 per cent on the common stock. The amounts of the various issues of stock, it is proper to say, are small.

The iron trade, which constitutes such an important element in the country's activities, seems to be just now in a particularly encouraging condition. Prices are slowly advancing and at the same time the demand for all kinds of iron and steel continues active. One important factor bearing on the immediate future of the iron trade has not as yet attracted much attention. We refer to the circumstance that new railroad construction is gradually increasing, thus offering the prospect of an enlarged demand from that quarter. Nearly every railroad report which comes to hand speaks of some new mileage in prospect. To be sure the proposed additions cover only small branches, links, or extensions, but where so many companies are engaged in this work the aggregate must necessarily reach considerable proportions. Besides this, the call from the railroads will be heavy also by reason of the extensive betterment and renewal outlays which rising earnings make possible. Thus far the advance in iron and steel prices has been moderate, and no great expansion in production is yet to be noted. The monthly statement of the "Iron Age" last week showed an increase during August of only 6,266 tons per week in the production of pig iron by the active furnaces, raising the total to 213,043 tons. Last March the weekly product was 234,430 tons, or at the rate of a million tons more per year than at present. The "Age" reports a further decline in stocks of iron, making the amount on the first of September 688,382 tons against 739,288 tons August 1 and 841,524 tons May 1.

Money on call, representing bankers' balances, has loaned at 6 and at 2 per cent during the week, averaging 41 per cent. The range on Monday was from 3½ to 4½ per cent, with the bulk of the business above 4 per cent. On Tuesday there was some shifting of loans, caused by a marking up of rates by some of the banks, and after 4 to 41 per cent had been recorded early in the morning there was an advance to 6 per cent, the bulk of the business in the afternoon being at from 5 to 51 per cent. On Wednesday the early loans were made at 41 to 5 per cent, but in the afternoon the rate fell off to 2 per cent, the late business being from 21 to 3 per cent. On Thursday and also on Friday the range was from  $4\frac{1}{2}$  to  $2\frac{1}{2}$  per cent, the rate closing on the last-named day at 3. Banks and trust companies quote 4 per cent as the minimum, though on Tuesday some of the banks marked up their standing loans to 5 per cent, and in a few cases 6 per cent was obtained for new business. On Friday the majority of the banks reduced rates to 4 per cent. Time money is more freely offered and it is reported that one of the large trust companies sought on Tuesday to place \$2,500,000 at 31 per cent for sixty to ninety days. Quotations are 31@4 per cent for the above-named periods; 4 per cent for four and 41/2 per cent for five to eight months on good Stock Exchange collateral. Commercial paper is in good demand, especially from out of town, while the supply continues only fair. Quotations are 4@4½ per cent for sixty to ninety day endorsed bills receivable, 41@ 5 per cent for prime, and 5@6 per cent for good four ing drawers.

to six month's single names. Some of the large banks report quite a general demand for New York paper from their correspondents in the West, and it is said that fairly large amounts of such paper have been bought here recently for Chicago and other institutions in the Northwest.

There has been no important feature in the European political situation. The demand of the British Admiral at Candia, Crete, for the surrender of the ringleaders of the recent massacre and the disarmament of the Mussulmans has been complied with. The Bank of England minimum rate of discount was advanced on Thursday to 3 from 21 per cent, at which it had stood since June 30. The cable reports discounts of sixty to ninety day bank bills in London at 2½@25 per cent. The open market rate at Paris is 13 @17 per cent and at Berlin and Frankfort it is 37 per cent. According to our special cable from London the Bank of England lost £345,925 bullion during the week and held £33,804,883 at the close of the week. Our correspondent further advises us that the loss was due to the import of £30,000 from Australia, to receipts of £135,000 net from the interior of Great Britain, and to exports of £1,011,000, of which £866,-000 were for the United States, £100,000 for Egypt, £25,000 for South America and £20,000 to Batavia.

The foreign exchange market has been quiet and the tone easy this week. Rates are now at the goldimporting point and the market is chiefly influenced by operations in connection with the movement of gold hither from Europe. The rise in the price of gold at London and Paris has been one factor in the market, while another has been the demand for exchange to cover gold imports. Offerings of cotton and grain futures continue A feature of the engagements of gold liberal. in London for shipment hither has been importations by Brown Bros. and other bankers who rarely bring gold out. The amount announced as engaged on Tuesday was \$3,250,000, on Wednesday \$1,800,000, on Thursday \$1,300,000 and on Friday \$800,000, making a total of \$6,200,000. The arrivals of gold from Europe during the week, other than those in transit to Cuba, have been \$1,-442,301; previously reported, \$4,145,196, making a total of \$5,587,497. The arrivals of gold in transit to Cuba, for the purchase of sugar and other products, have been \$1,405,907; previously reported \$4,-448,575, making a total of \$5,854,482.

The range for nominal rates for exchange was from 483 to 4831 for sixty day and from 4.85 to 4851 for sight, until Wednesday, when the range was from 4 821 to 4 83 for the former and from 484½ to 485 for the latter. The market opened easy on Monday, and while rates for actual business in long sterling remained unchanged, compared with those at the close on Friday of last week, rates for short sterling and for cable transfers were reduced one-quarter of a cent, to 4 83%@4 84 for the former and to 4 844@4 844 for the latter. Though the tone continued easy, there was no change in rates for actual business until Thursday, when long sterling fell off to 4 811@4 814, in consequence of the advance in the Bank of England rate of discount, but no change was made in short sterling or cable transfers and the tone for them was steady to firm. The market was irregular on Friday. The following shows daily posted rates for exchange by some of the lead-

NOTE-Large increase in aggregate gold holdings for weak of last year is due to the heavy addition to the to al holdings as reported by the Bank of Russia. e division (between gold and silver) given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it elaimed to be accurate, as those banks make no distinction in their surns, merely reporting the total gold and silver, but we be-

I leve the division we make is a close approximation. NOTE.—We receive the foregoing results weekly by cable, and while sotal of the date given at the head of the column, they are the re-crusies used nearest to that date—that is the latest reported figures.

## TREASURY AND MONEY MARKET.

The country has witnessed during the past three weeks, and is witnessing at present, one of the serious inconveniences and dangers of our present Sub-Treasury system. It is hardly necessary to explain that, except for the operations of the Government, apprehension as to the future of our money market could hardly have arisen. The markets had been supplied with extra cash reserves, through import of foreign gold, as fast as expanding trade showed the need of such increase. Our summary of clearing-house returns at the country's leading centres, published at the opening of July, showed that these bank exchanges had increased over 1897 during the first six months of the current year no less than 31 per cent. But along with this very remarkable increase in the commercial use of money, the actual amount of money cir- Most of this increased surplus has been drawn

culating in the United States outside the Treasury showed by the Treasury's July estimate an increase over the previous July of \$197,000,000. That this huge increase in cash reserves was well distributed has been further shown by the Comptroller's summary of the July national bank returns, published a week ago. This compilation shows that while the cash fund in the reserve cities, where the bulk of it is always kept, had increased \$45,663,000 over that of July 1897, the cash reserves of "country banks" had also increased \$11,796,000. In fact, although the deposits of these interior institutions had expanded during the twelve months by the remarkable sum of \$130,461,000, the Comptroller computes that their percentage of reserve to liabilities on July 14 1898 was exactly what it had been on July 23 1897. At both dates this proportion of reserves was reckoned at 31.92 per cent.

The position of these Western and Southern banks, so far as concerned resources, being precisely what it was a year before, it was fair to suppose that there would still be a considerable drain of currency, during the harvest season, from New York to the interior. But for such a drain the Eastern banks were amply prepared; on Saturday, July 2, the Associated Banks of this city reported a surplus cash reserve of \$62,013,-550, which was twenty-one million dollars larger than the surplus returned at the corresponding date in 1897, and nearly forty-two millions greater than in 1896.

We have gone into these details in order to show that there was every reason, two or three months ago, to expect that the country's autumn trade needs would be provided for without any strain on the general money market. Our readers are of course aware of the means by which the Treasury became a factor in the situation. It was argued, very properly, that conditions being what we have already shown, the markets were well able to contribute to the immediate necessities of the Government. Legislation had authorized both largely increased taxes and a \$200,-000,000 loan. The internal taxes at once largely increased the monthly revenue. But in the meantime war disbursements were enlarging the monthly expenditure very materially over 1897; July's outlay for army and navy purposes was \$29,552,000 greater than it had been in the July preceding. On ordinary revenue, therefore, there was a heavy deficit, and it was estimated that with expenditure maintained on the same or a larger scale, the entire proceeds of the Government loan would be exhausted before the close of the year, and hence it was believed that no serious contraction could occur in the money market.

The one event not contemplated in this calculation was an early conclusion of the war, and this is precisely what has happened. It has also happened that payment of subscriptions to the Government loan have been made in full at once to a much larger extent than was perhaps expected. The Treasury had granted the option of payment in five instalments, spread over a period of five months or more; but as might be supposed, where so large a part of the allotments was in small amounts, the great bulk of subscriptions were paid off before the time limit had expired. Since the current Treasury deficit has at the same time been decreasing rapidly, it may be imagined what was the outcome. Since July 1 the Treasury's available cash balance had increased up to the middle of last week, by \$107,567,745

from the New York banks, and these banks, in turn, have drawn heavily during the summer on the reserves of other Eastern and Western institutions. But in spite of such relief, and in spite also of an increase in Government bank deposits since July 1 from \$42,046,022 to \$76,854,498, the actual specie and legal tender holdings at New York have decreased \$67,274,900. It has so happened that this shrinkage of cash reserves has been coincident with a rapid expansion of Eastern loans and liabilities-a natural result of improving trade and increasing stock market activity. But the result of this double process has been a decrease of the New York surplus bank reserves to a trifle over four million dollars, notwithstanding a decided recall of loans and contraction of liabilities already begun by the banks.

We pointed out two weeks ago some qualifying facts in this situation, showing how far any possible inconvenience would be modified by the great strength of the New York banks, in the matter of their actual reserves, and by the large credit balance in our favor on international exchange. The recent gold import engagements have illustrated this phase of the situation. Moreover, the Treasury was still able to extend its bank deposits temporarily and thus lessen the strain upon the markets, and it has used the privilege liberally this week. The occurrence of any exorbitant rates for money in the face of such conditions we showed to be wholly improbable. This conviction has gained ground in the financial community during the present week. Nevertheless, it seems to us that the occasion is proper for drawing attention again to the very anomalous fiscal system which has made even these slight misgivings possible. It might have been necessary to borrow heavily and to raise a surplus revenue when outside conditions were not thus favorable. The war, with its incidental burdens on the money market, might have occurred when reserves were low and sterling exchange against us; it might have occurred when interior demand for currency was very urgent. That the war coincided with favorable financial conditions in this country was certainly an accident; but the absorption of money by the Government must have followed, whatever the general situation.

Nor, indeed, does such a supposition show the whole danger of the system of locking up a public cash surplus out of reach of the money market. During nearly six years this country has been living under a Treasury deficit. The Government has been almost constantly emptying money into the market, in amounts ranging from one to ten million dollars monthly. The proceeds of its loans, issued to protect the gold reserve, rushed out of this open spigot along with the rest of the Treasury cash. The result was that the market came to look on the Sub-Treasury as a constant source of supply for cash reserves. 1894 particularly, the Treasury deficit of \$69,800,000 flooded the banks with specie and legal tenders, at a time when there was not a sign of need of additional reserves. This piling up of an already heavily expanded currency in the market, at a time of extremely inactive trade, had much to do with the large export of gold that year, which in its turn depleted the experience of 1887 and 1888 is fresh in the minds of most people, when a rapid and unexpected increase of Customs receipts caused an excess of revenue over expenditure of \$103,471,000 in the one year and of States?

\$111,341,000 in the other. The half-desperate expedients then adopted by the Administration to stop the absorption of money into the Treasury, the extravagant bond purchases, with the resultant destruction of nearly half the national bank currency, and the periodical convulsions in the money market, notwithstanding these efforts at relief, go to show how the system may work mischief as readily in one direction as in another.

The truth is that the evil of the system lies beyond any mere question of deficit or surplus. It is inseparable from the practice of hoarding money on an extensive scale whenever the Government earns more than it spends. And yet it is not easy to say how this mischievous system is to be corrected. Theoretically the remedy is plain. Let the Government, after adjusting as near as may be its expenses to its income, use the banks as depositories for all of its temporary surplus, or as sources from which to draw, on Treasury bills, the funds needed to meet a temporary deficit. No process could be simpler, and that it is feasible we know from the fact that the British Government has practiced it without the least friction during several generations.

Unfortunately, it is true of this expedient, as of most remedial plans in our sorely-tried government finances, that theoretical perfection does not involve possibility of practical execution. We have never yet been able to induce our legislators to take serious account of income when planning expenditure, or vice versa; therefore our surpluses and our deficits are alike of portentous magnitude. It is still possible, even so, to use the banks as the Bank of England is habitually used by the British Exchequer. But here is at once encountered the popular prejudice against so-called "favors" to the banks-a prejudice deeply marked throughout our political history, which has been fatal, on occasions, to more than one aspiring politician, and which seriously embarrassed even the cautious fiscal operations of Secretaries Sherman and Fairchild. Nor is this feeling wholly groundless when the nature of our present bank system is considered, and the possibilities of mistakes in the geographical distribution of such deposits. We are inclined to doubt whether a perfect system of bank deposits by a public exchequer is possible except through the use of a single Government bank, the Government's accredited agent and depository. How remote such an expedient would seem to be to us the reader will imagine.

Despite such obstacles, however, we are convinced that a remedy for the absurd Sub-Treasury system now in vogue must be found. The system was contrived at a time when Government revenue and expenditure were about one-seventh of their present magnitude; when our population was barely one-sixth what it is to-day, and our trade and banking system probably not a hundredth part of their existing volume. The system worked awkwardly enough even when first introduced; but nothing could be imagined more illfitted to the present complex machinery of finance. We hear much in these days of the fact that our country, in the phrase of a distinguished statesman, has "burst its swaddling clothes." If it be true that Government's gold reserve. On the other hand, the in diplomacy and political strength we have outgrown the traditions and systems of a former generation, is it not reasonable to ask whether our fiscal arrangements are to be left on a par with the contrivances of infant

## ATCHISON'S RENEWED PROSPERITY.

As one after another the reports of our leading railroads come to hand and the story is reiterated of a great improvement in affairs-so marked and decided as to have worked a complete transformation in conditions and prospects—the reader might be excused if he should pause to reassure himself that the accounts were not being exaggerated. Yet it is the exact truth to say that there has been a great improvement, a wonderful transformation. And the improvement simply affords renewed evidence of the country's latent strength and marvelous recuperative powers. The result is that a period of depression, however painful and pronounced, is certain to be followed by a quick recovery and a new display of energy when some favoring circumstance serves to dispel gloomy forebodings and make apparent upon what a broad, enduring basis the nation's activities rest.

In the late depression the railroad industry suffered beyond all other industries. So prolific and overwhelming were the railroad receiverships and foreclosures that it almost seemed as if profitable conditions had forever departed from this great field of human activity. Yet in the brief period of two years -nay more, in a single period of twelve monthswhat a wonderful change we have witnessed. Of course the fact that the previous depression was so pronounced makes the contrast particularly striking, and yet who could have thought in reason that the transition would come so soon or the recovery be so extensive. There is only one parallel in American railroad history, and that is the era of prosperity which was opened to our railroads with the resumption of gold payments in 1879. The discouragement two years ago was so great that all railroad values were exceedingly depreciated, and many holders of railroad securities did not deem it worth while to make the sacrifices which the occasion called for in the way of the payment of assessments, &c. To-day railroad values are rising, and the revenue statements of the roads as they are received furnish evidence that the improvement in prices has been amply justified.

It seems peculiarly fitting that the Atchison Topeka & Santa Fe Company should share in a marked degree in the present recovery. In the 1879-81 period it was distinguished beyond other roads for its record of growth and prosperity. The pioneers in the enterprise were then, after a long wait and many trials and misfortunes, enabled to carry out their plans. They were amply rewarded. Most of them reaped large fortunes as the result of their skill and foresight. The Atchison system, too, became a powerful factor in the railroad world, a credit to its promoters, and a new agent in the growth and development of the country. The subsequent reverses were unexpected, but they and their causes are well known to our readers. While other roads likewise suffered severely during the late period of depression, the Atchison was peculiarly hard hit. had entered upon a policy of expansion, and conditions were proving very unfavorable; crops in its territory were poor, prices for farm products low, and there had been reckless building of new mileage by many other large systems in the same territory. Lastly, reprehensible methods of book-keeping had served to undermine confidence in the value of the securities. Through it all the faith of many of the year would have been even better than it is except earliest investors in the property never wavered, and for the large expenditures made upon road and equip-

they held on to their securities, making the sacrifices and exchanges which the situation demanded, and it is pleasing now to find that the faith of these parties in the certainty of the later revival was as well justified as that in the earlier revival.

The Atchison system as now rehabilitated is certainly a different kind of property from what it was before the late reorganization. In the first place the value of the securities is enhanced by the fact that they cover the entire system, from Lake Michigan to the Gulf of Mexico and from the Lake to the Pacific Ocean, instead of only parts of the system. For instance, the general mortgage 4s cover the whole of the 6,946 miles of road, subject only (now that the Guarantee Fund Notes are all being retired) to about three million dollars of equipment bonds and prior lien loans. In the second place the physical condition of the property has been greatly improved as well as the financial condition. In the third place the reorganization has been on a sound basis in the new relations it has established between interest charges and earnings. Indeed, the latter is a particularly strong feature in the condition of the reorganized property. This will appear when we say that the report now before us shows that with fixed interest charges of only \$4,992,148, the net income available in payment of the same on the operations of the twelve months amounted to \$8,882,573. In other words, there was a surplus above the sum required for the obligatory charges of \$3,890,425. As previously noted in these columns, out of this surplus the management have declared 4 per cent on the adjustment mortgage bonds, the interest on which is dependent upon earnings (being the full rate to which these bonds are entitled); even then there is left a balance of \$1,836,585, equal to over 13 per cent on the 1311 millions of preferred stock.

How great the improvement was over the year before may be judged from the fact that on the same basis of mileage—that is, including the Santa Fe Pacific (old Atlantic & Pacific) in both years and eliminating the Sonora & New Mexico and Arizona roads, which have been transferred to the Southern Pacific-the addition to gross earnings over the year preceding is found to have been \$5,580,459 (more than 16 per cent) and the addition to net \$2,-311,335-the latter over 27 per cent. While the larger agricultural tonnage undoubtedly played an important part in the recovery which occurred, it is significant as showing the general character of the improvement that \$1,180,598 of the \$5,580,459 increase in gross earnings was contributed by the passenger department, the ratio of gain in this instance being over 19 per cent. In the respect mentioned the record of the Atchison is quite exceptional, for in the case of most of the roads in other sections the recovery in passenger revenues has been very small. As bearing upon the part played by [last year's excellent harvests in the favorable showing made, we observe that the report says that the wheat crop of Kansas, the cotton crop of Texas and the fruit crop of California were all larger than for several years past, and the last was larger than ever before. But the report also notes that there was development of mining interests and general improvement in business conditions throughout the West.

It deserves to be noted that the net result for the

ment and charged to expenses. Chairman Aldace F Walker says it was deemed wise by the directors "to take advantage of this year of large gross income to prepare for the possibility of less favorable conditions in the future, by continuing the work of putting the property into condition to be operated with the maximum of economy." The extra ex penditures were chiefly for betterments under the accounts "Maintenance of Road and Structures', and "Maintenance of Equipment." The work in cluded 489 miles of track ballasted, new and renewed; 531 miles of new steel laid, including rails re-rolled; 236 miles second-hand steel laid; 114 miles of wooden bridges replaced with permanent structures, besides a large amount of other outlays. In the case of the equipment, the Rolling Stock Replacement Fund, (covering in part contributions from the previous year's earnings), provided an aggregate of 930 new cars, against only 556 cars withdrawn from service during the fiscal year.

The most gratifying fact in connection with these heavy betterment outlays is that they seem likely to diminish materially hereafter. Mr. Walker thinks it will doubtless be found desirable to continue the replacement of wooden bridges with permanent work; "but in other respects the extraordinary betterment expenses paid out of earnings may be expected to largely decline after the present calendar year." With reference to the Santa Fé Pacific, now forming part of the system, Mr. Walker says the enormous expenses involved in its reconstruction have necessarily reduced the net returns. With the completion of the improvement work, operating expenses, he asserts, will be reduced to a reasonable basis—in all of which there is great hope for the future.

## ST. LOUIS & SAN FRANCISCO'S SHOWING.

The St. Louis & San Francisco is situated in the same part of the country as the Atchison (though the latter covers a wider expanse of territory), and therefore was subject to much the same conditions as that system. Like that property, too, it makes an exceedingly good exhibit in its annual report, showing wonderful recuperation as compared with the poor situation of only a short time ago. The outcome for the twelve months, too—so satisfactory in every way—is evidence that the reorganization was on a sound and conservative basis, and that the position of the property has been improved in every way.

Before the reorganization the San Francisco formed part of the Atchison system, and when the union between the two was dissevered there were many misgivings as to the effect of the change upon the fortunes of the San Francisco company. But during the two years of its separate existence the San Francisco has done exceedingly well, and has shown that it can be operated with success as a separate system. Moreover, arrangements have lately been entered into which will serve to round out and complete the system, and fortify and strengthen its position. Through the contract made with the Kansas City Osceola & Southern, by which the road of the latter has been extended forty miles to a connection with the Bolivar Branch of the San Francisco, the latter is given a direct entrance into Kansas City, and will have that city and St. Louis as northern termini, instead of St. Louis alone. The system is also to have the benefit of an extension in the opposite direction, the contract

an extension of the Southwestern Division for 103 miles to Oklahoma City, in Oklahoma Territory. The terms upon which these arrangements have been made appear to be quite advantageous. We shall not, however, attempt to go into the details, as they are set out at length in the report itself, printed on another page.

The income exhibit for the year affords an idea of the strength of the company's position under the reorganization and the great improvement in its traffic and revenues which has occurred during the last twelve months. The report shows net income for the year of \$2,926,119, while the call for interest, rentals and charges was only \$2,239,673. Thus there was a surplus for the twelve months of \$686,446. The corresponding surplus in the previous year (the first year of the new company's operation) was only \$331,067. Out of this latter amount, the company had paid 2 per cent on the 1st preferred stock, calling for \$100,000. Out of the \$686,446 surplus for the late year, the full 4 per cent was paid on the \$5,000,000 1st preferred stock and 1 per cent declared on the \$16,-000,000 of 2d preferred stock, calling together for \$360,000. Even then there is left a balance of \$326,446, which would pay two per cent more on the \$16,000,000 of second preferred stock. In other words, the income account shows 3 per cent earned on the 2d preferred stock besides the 4 per cent on the 1st preferred stock. It should be understood, of course, that though renewal expenditures have evidently been liberal, not all outlays for improvements and additions have been included in expenses. A few of the Eastern roads have reached the happy position where it is found possible or feasible to dispense with additions to capital account (everything being charged against earnings), but Western roads as a rule can claim no such distinction. The San Francisco spent \$527,207 during the year for new equipment and improvements, all but a small portion of which was met out of the fund provided for this purpose by the Reorganization Committee. The company was able to engage the services of Mr. Stephen Little in an audit and examination of the accounts, and he certifies to the accuracy of all the items in the accounts.

With reference to the improvement in revenues, we observe a feature noticeable also in the Atchison case, namely a decided recovery in passenger revenues. This furnishes quite a contrast with the situation on the roads here in the East, where the gains in passenger earnings have as yet been very small, indicating the absence of a full revival in trade. In the Southwest, evidently, the conditions have been more favorable in that respect. At all events, out of \$893,131 total gain in gross earnings on the San Francisco, \$221,888 was contributed by the passenger department. In ratio the increase is 21 per cent, whereas the increase in the freight earnings was not quite 15 per cent. In number the increase in passengers was 38 per cent and in the number one mile 31 per cent. In the freight traffic the improvement both in the number of tons and in the number one mile was only about 20 per cent. The extent of road operated was somewhat larger in 1897-8 than in 1896-7 (the company having, on January 1, 1898, acquired the Central Division of the Atlantic & Pacific under foreclosure sale); but this applies equally to the freight and the passenger statistics.

of an extension in the opposite direction, the contract with the St. Louis & Oklahoma being equivalent to bringing out. No doubt it will be supposed that the

gain in tonnage was mainly or very largely in agricultural products. As a matter of fact, the increase from that source was only 19,281 tons out of a total increase in commercial freight of 427,173 tons. road carried more wheat than in the preceding year, but moved only 37,646 tons of corn, against 107,332 tons. Even under the head of "products of animals" there was comparatively little growth, this item rising only from 160,141 tons to 192,283 tons. On the other hand, in "Products of Mines" there was an increase from 852,500 tons to 1,004,350 tons, in "Forest Products" an increase from 249,555 to 315,482 tons, in "Manufactures" from 246,186 to 311,687 tons, and in "Merchandise" and "Miscellaneous" from 219,532 to 312,004 tons. Obviously, the increases here reflect the revival of trade and the general growth and development of the Western country.

## THE ERIE REPORT.

The report of the Eric Railroad Company (the third annual statement of the reorganized company) is useful in serving to show the difference between the railroad conditions which have ruled here in the East and those controlling the operations of roads in the West. The report makes on the whole a very satisfactory exhibit. But the fact will not escape notice that the improvement is of much more moderate proportions than that to which we have become accustomed in the case of Western roads. In other words, the road has not failed to share in the revival and recovery which have been such marked features of railroad affairs during the last fifteen months, but the change has been less general and less marked.

No one who has watched the course of events during the period covered by the report can be surprised at the slower pace of growth. In the first place the - revival in trade, though perhaps equally distinct, did not reach the same dimensions in the eastern part of the United States as further west. In the second place, with the country here already so largely settled and developed there was less room for new development than in the remoter districts. In the third place, railroad mileage, being more extensive in the East, competition was intensified. Rates were, as a result, greatly demoralized-as frequently pointed out in these columns more so than ever before except at a time of actual war in rates. Besides this, the Erie is also a large carrier of anthracite, and there the situation was peculiarly discouraging. On the whole, the managers of the Erie had trying conditions to meet, and that the result has been so satisfactory offers much occasion for congratulation.

President E. B. Thomas in his remarks refers at length to the difficulty regarding rates, pointing out that "the unsatisfactory feature of the year's work is the rate received for the service performed." From year to year, he well says, the unit of revenue grows less, while the character of the service, forced by competition and the modern requirements of trade, grows more and more expensive. Apparently neither of these conditions, he argues, can be improved under the circumstances (legislative and otherwise) surrounding the transportation industry. The only remaining endeavor therefore that can be made to stop the diminishing margin between revenue and cost is in the direction of reducing the latter. This necessarily requires heavy work, large expendituyes and long time, and the results obtained appear slowly.

To the efforts of the management towards the accomplishment of this object, Mr. Thomas states, are due the large cost of operation for the year. Heavy expenditures, with which capital account could not legitimately be charged, were necessary upon locomotives, cars, tracks, etc., in order to meet the requirements needed to enable the company to do a business on a parity with its competitors.

In this last statement we have a clue to the year's results. Average rates, already low, were still further reduced. On general merchandise the company received only 5.80 mills per ton per mile, against 6.25 mills the year before, and on coal it received but 5.12 mills, against 5.36 mills, while on the two combined the average is 5.58 mills, against 5.96 mills. The importance of this decrease of thirty-eight hundredths of a mill per ton mile will be seen when it is said that applied to the entire tonnage of the year it is equal to a net loss of revenue of \$1,714,938. Taking this in connection with the further fact that heavy expenditures were necessary upon the property, and it becomes evident that the situation was not free from difficulties. notwithstanding the revival in trade and the growth in traffic. The report shows that, as compared with the year preceding, gross earnings increased \$2,243,829 and net earnings increased only \$138,033. The ratio of gain in the one case is 7.12 per cent, in the other but 1.69 per cent. Analyzing the expense accounts, it is found that out of the \$2,105,795 augmentation in expenses, as compared with the year preceding, \$1,264,108 was under the heads of "Maintenance of Way and Structures" and "Maintenance of Equipment." It appears that for air-brakes and automatic couplers alone \$526,286 was spent during the year, all of which was charged to operating expenses. Numerous evidences of economy and efficiency in operations are observable. For instance, while the number of tons of freight increased 17.50 per cent and the number one mile 15.65 per cent, the additional work was done with an increase in freight train mileage of only 6.46 per cent; and notwithstanding the smaller rate received, the freight trains, through increased loading, were made to earn slightly more per mile.

Despite the adverse circumstances with which the road had to contend, there are many satisfactory features to be noted. Thus the road earned \$633,916 in excess of the charges required for the twelve months. This may not seem very large for a system of the size of the Erie, but its significance arises from the fact that this surplus remains, as we have seen, after only a very trifling improvement in the net. In the current year interest on the \$31,032,000 of General Lien bonds will be 4 per cent per annum, instead of only 3 per cent, as in the late year; the surplus of \$633,916, however, would meet the additional one per cent twice over. President Thomas dwells on the large expenditures required upon the property, but at least it is pleasing to note that the road has been brought to a high state of efficiency, as is evident from the fact that the train load in the late year, counting only revenue freight, was 300 tons, and including company freight was 312 tons. On the Central the corresponding figures for the same year were 299 and 320 tons, so that in this respect the Erie is doing as good work as the Central. We notice, too, that the present freight equipment of the Brie system numbers 43,862 cars, with a capacity in excess of a million tons-1,030,544. President Cal-

Marian.

laway in his report gave the tonnage capacity of the Central at 658,905 tons, though this covers only the Central itself and not the Lake Shore and the othe Vanderbilt lines west of Chicago.

## RAILROAD NET EARNINGS FOR JULY.

Very naturally our statement of railroad gross and net earnings for July does not make a favorable com parison with a year ago. The month had an extra Sunday and therefore one business day less than last year, there was a heavy contraction in the grain movement, attended also by a falling off in the live stock movement in the West, while a number of roads which had special advantages last year, by reason the Christian Endeavor Convention in San Francisco and the holding of the Mormon Fifty Year Jubilee, did not experience a repetition of these advantages the present year. At the same time comparison is with very good returns in 1897.

In the aggregate of the gross earnings our state ment shows only \$201,774 increase, or but a fraction of one per cent. In the net earnings there is a loss approaching a million dollars-in exact figures \$947,-991, or 4.40 per cent. The following is a summary of the totals.

		July. (199 roads.)		January 1 to July 81 (121 roads.)			
.447.9	1898.	1897.	Inc. or Dec.	1898.	1897.	Increase.	
****	1			-del	-		
Gross carn's	67,870,961	67,669,187	+901,774	446,841,049	414,301,482	42,539,617	
Oper. exp	47,294,043	46,144,278	+1,149,765	816, 113, 425	298,150,333	24,963,192	
Net earn's	20,578,918	21,821,909	-017,991	131,727,424	116,151,199	15,576,425	

On the separate roads there have been some heavy losses, the anthracite coal roads being the chief sufferers, though a number of the grain-carrying roads have kept them company. As to the latter, however, the results have been rather irregular, and some roads record quite noteworthy gains. The best showing as a whole is made by Southern roads, which have gained so largely through the transportation of United States troops and supplies. We subjoin our usual statement showing all changes in excess of \$30,000.

We have stated that last year in July earnings were quite good. In the gross the increase then was 41 million dollars, and in the net nearly 25 million dollars. Moreover, as it happens, July had been a good month in the years immediately preceding too, as will appear from the following.

Four and	0	ross Barnin	198	Not Burnings.

## Commercial and Miscellaneous News.

IMPORTS AND EXPORTS FOR THE WEEK.—The following are the imports at New York for the week ending for dry goods Sept. 15 and for the week ending for general merchandise, Sept. 16 also totals \$1.100 the beginning of the first week in January.

FOREIGN IMPORTS AT NEW YORK.						
For week.	1898.	1897.	1896.	1895.		
Dry goods Gen'l mer'dis-	\$1,957,163 6,672,189	\$1,837,076 4,980,537	\$1,740,723 5,003,978	\$2,929,938 6,945,856		
Total	\$8,629,352	6,817,613	\$6,744,701	\$9,775,794		
Dry goods	\$67,906,841 238,204,100	\$97,902,874 267,358,197	\$83,387,799 241,753,016	\$107,073,991 263,500,932		
Total 37 weeks	\$306,110,941	\$365,261,071	\$325,140,915	\$370,574,943		

The imports of dry goods for one week later will be found in our report of the dry goods trade.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Sept. 19 and from January 1 to date:

	1898.	1897.	1896.	1895.
For the week. Frev. reported	\$9,474,939 334,240,095			
Total 37 week-	9343,715,031	\$292,013,094	\$268,206,127	\$240 080,355

The following table shows the exports and imports of specie at the port of New York for the week ending Sept. 17 and since January 1, 1898, and for the corresponding periods in 1897 and 1896.

EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

\* Correction.

WALL STREET, FRIDAY, SEPT. 23, 1898.-5 P. M.

The Money Market and Financial Situation.—Legitimate business at the Stock Exchange this week has been greatly overshadowed by the enormously heavy transactions in American Sugar Refining stock, which on Monday and Tuesday aggregated nearly 190,000 shares. This movement, during which a decline of over 7 points was recorded, would be of comparatively little importance to any but those directly interested in the transaction, except that its magnitude and the extent of the decline had a tendency to misettle the entire markst for securities and keep investors aloof.

The money market was unsettled during the early part of the week, and rates for call loans reached the maximum of the season, but the market is now more settled and rates are lower.

lower.

The open market rates for call loans on the Stock Exchange

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 to 6 per cent. To-day's rates on call were 2½ to 4 per cent. Prime commercial paper quoted at 4 to 5 per cent. The Bank of England weekly statement on Thursday showed a decrease in bullion of £345,935, and the percentage of reserve to liabilities was 5 '92, against 49'31 last week; the discount rate was advanced from 2½ to 3 per cent. The Bank of France shows a decrease of 200,000 francs in gold and an increase of 3,8 10,000 francs in silver.

The New York City Clearing-House banks in their state-

The New York City Clearing-House banks in their statement of Sept. 17 showed a decrease in the reserve held of \$7,795 000 and a surplus over the required reserve of \$4,240,400, against \$7,076,775 the previous week.

This is the wise hid at the purroung board; no sale was nead | D allings are in bonds "when issued" and represent transactions in the Unitsted Department of the Exchange.

In the Unlisted Department of the Exchange.

State and Railroad Bunds.—Sales of State bonds at the Board inclinde \$2.01) Tennessee settlement 3s at 93, \$24.000 Virginia fund. debt 2-3s of 1991 at 76½ to 77 and \$10,000 Virginia 6s deferred trust receipts at 7½.

The market for railway bonds has been dull, transactions at the Exchange averaging only a little more than \$1.500,000 par value per day. Small fractional declines are general in the active lists, but changes in quotations are in no case important, and the conditions mentioned seem to indicate nothing more than a lack of investment demand pending a more settled condition of the stock and money markets.

Stock and Bond Sales.—Fae following sooms the volume

# Juvestment Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every FEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

Net Earnings Monthly to Latest Dates.—The following shows the gross and net earnings to latest dates of all Stram railroads furnishing monthly statements. The compilation includes every road from which we can get returns of this character, and in that form is given once a month. Early returns are published from week to week, as soon as issued, but for the convenience of our readers all the roads making returns are brought together here in the week in which we publish our monthly article on net earnings—say on or about the 20th of the month.

The returns of the street railways we give by themselves under a separate head at the extreme end of these tabulations -see page 630.

Roads	—see page ooo.	Gross Ed	rnings.	-Net Ro	rnings

a Not earnings here given are after deducting taxes
b Not earnings here given are before deducting taxes.
c Deducting other expenditures for repairs, replacements and general
expenses, not income applicable to interest on bonds in July was
\$93,425, against \$109,231 last year, and for January 1 to July 31
\$647,232, against \$74,502. This is the result in Mexican dollartreated (according to the company's method of keeping its accounts)
as equivalent to 80 cents in United States money—that is, depreciation beyond 20 per cent has already been allowed for.
d Includes the operation of seven miles of Susquehanna Connecting
road.

d Includes the operation of seven miles of Susquehanna Connecting road.

(Thirty per cent of gross earnings.

g After allowing for other income received, total not for July 18)8

was \$47,725 against \$31.586.

Includes results on Des Moines & Kansas City for all periods.

I Includes besides the entire Profito System and the Atlantic properties, the Houston & Texas Central Texas & Northwestern and Fit. Worth & Now Orleans.

In Figures for 1897 include results on Kansas City and Independence Air Line, but those for 1898 do not.

In Embraces only earnings of reorganized lines; carnings of Central Branch not included.

\* Figures beginning with July, 1897, include At T. & S. Fe, Guif Col. & Santa Fe, Santa Fe Pacific (old Atlantic & Pacific) and So. California Ry., but not Sonora Ry. and N. M. & Arizona, which previous to July had been included.

| For July 1893, taxes and rentals amounted to \$147,33). against \$4328,475.

| Includes Chesapeake Ohio & Southwestern from July 1, 1497. Ohio Valley from August 1, 1897, and Chicago & Texas from October 1, 1897, but does not include the Yazoo Branch after July 1, 1895.

| Includes Chesapeake Ohio & Northern for Doth years.

| Includes Chesapeake Ohio & Northern for Doth years.

## STREET BALLWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all Street railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings or the calendar year from January 1 to and including such latest week or month.

<sup>\*</sup> Includes Baltimore Traction and City & Suburban for both years.

Istreet Railway Net Earnings.—In the following we show both the gross and the net earnings to latest dates of all Street railways from which we have been able to procure monthly returns. As in the case of the steam roads, the returns of the different roads are published by us each week as soon as received, and once a month (on the third or the fourth Saturday of the month) we bring all the roads reporting together, as is done to-day.

Balance, surplus (exclusive of branch lines) ...... \$1,796,685

available cash resources other than current earnings, and in a great part already expended, \$3,065,024."—V. 67, p. 435.

## Atchison Topeka & Santa Fe Railway.

(For year ending June 30, 1898.)

The report signed by President Ripley and Chairman Walker is printed in full on pages 641 to 644. And in addition several tables are also given. On page 576 of the CHRONICLE of Sept. 17 will be found a comparative statement of results for several years.

### Erie Railroad.

(For the year ending June 30, 1898.)

The report of President Thomas will be found in full on pages 636 to 640. In the CHRONICLE of Sept. 17, on page 576, were published comparative figures for several years of the operations, earnings, charges and the balance sheets.

### St. Louis & San Francisco Railread.

(Report for the fiscal year ending June 30, 1898.)

The remarks of President Robinson, together with a detailed statement of earnings, income account, balance sheet, etc., will be found on pages 644 to 647 of to day's Chronicle, Below we give a comparative statement for several years:

## Missouri Kansas & Texas Railway.

(Report for the year ending June 30, 1898.)

(Report for the year ending June 30, 1898.)

President Henry C. Rouse says in part:

Operations.—The business of the past year was subject to two sources of interruption, the first being yellow fever in the summer of 1897 and the second an unprecedented flood in the Indian Territory, resulting in the total interruption for nine days of the handling of freight over the main line. The tonnage of the year, however, was 3,568,825, an increase of 331,919 tons over the preceding year. The passengers carried were 1,457,548, an increase of 110,025. This very considerable increase of business was conducted with a decrease in freight-train mileage of 449,964 miles and a decrease in pas-

senger-train mileage of 544,026 miles. The average rate per ton per mile received for freight was 0.918 cents, as against 0.895 cents the previous year.

The increase in business has been well distributed over all the principal sources of traffic, without any signal increase of any particular movement. The reduction in expenses has been effected without any impairment of the condition of the property and simply reflects the improved condition of the plant and organization.

The general traffic conditions are much brighter for the current year, and it is expected that some demoralization in rates existing in the past will be corrected. The crop outlook is of the most encouraging character and, if realized, will afford a volume of traffic that will tax the facilities of the railway to their utmost.

will afford a volume of traffic that will tax the facilities of the railway to their utmost.

The permanent way has been steadily improved by ballasting and re-laying of steel; 38 miles were completely ballasted and 57 miles additional were partially completed during the year; 117 miles were re-laid with heavier steel.

Financial.—The company is free from floating debt and there has been no increase in its outstanding stocks or bonds.

Lond Grant in Indian Territory.—On June 23, 1898, the Congress of the United States passed an Act providing for the division and allotment of the lands of the Indian nations in the Indian Territory to the individual Indian citizens. This Act marks an era in the history of the Territory and will lead to its early opening to settlement and a consequent development of commerce which will be highly beneficial to the company. This Act of Congress contains no affirmative recognition of the land grant of the company, but expressly provides that it shall not in any way affect any vested legal rights heretofore granted.

rights heretofore granted.

Statistics.—The comparative figures of operations, earnings, etc., have been as follows:

	OPERATIONS	AND FISCAL R	ESULTS.

Santa Fe Prescott & Phonix Railway. (Report for the year ending June 30, 1898.)

Report for the year ending June 30, 1898.)

President and General Manager F. M. Murphy says

General Results.—The gross earnings in 1898 increased over
1897 17-42 per cent; net earnings in 1898 increased over 1897
24-13 per cent. Business for the year has been good and pros
pects are bright for the future.

Prescott & Eastern R. T.—Bonds Guaranteed.—The Prescott
& Eastern R. now being constructed to Mayer, a distance
of 261/2 miles, will be completed early in October, and we have
a right to expect considerable additional traffic from the rich
mining districts tributary therets. The Executive Committee,
by order of the board of directors, has entered into an agreement whereby the [\$500,000] bonds of the Prescott & Eastern
RR. are guaranteed by this company, which also agrees to
furnish financial aid during construction, taking stock and

bonds of the Prescott & Eastern Railroad in settlement.
When completed the road will be operated by this company,
under favorable lease already entered into.
There are other districts that are entitled to consideration
having in view the construction of branch lines that will not

only prove profitable in themselves but contribute much additional business to the main line. The main line should be extended to Tempe and Mesa, a distance of about 17 miles.

Prospects, etc.—There is a steady and substantial improvement in all branches of business throughout the Territory; especially is this true in the mining districts. Water stores extensives, however, have not received the serious conespecially is this true in the mining districts. Water storage enterprises, however, have not received the serious consideration they deserve. The road has been operated for several years, with every prediction verified, and it hardly appears necessary that I should enlarge, to any considerable extent, on the bright future that I believe is guaranteed to it.

tent, on the bright future that I believe is guaranteed to it.

The rate of interest on the \$2,964,000 second mortgage bonds, theretofore 4 per cent per annum, is 5 per cent beginning July 1, 1898; \$48,500 second mortgage bond coupons No. 9, purchased by the company subject to an agreement dated the 26th day of May, 1897, covering pooling of said second mortgage bonds will be paid and canceled September, 1898.

Eurnings.—The earnings and balance sheet have been:

Brooklyn El.result of Objection of the work of the

American Spirits Manufacturing Co.—Standard Distilling & Distributing Co.—New Directors.—At an adjourned meeting of the stockholders of the American Spirits Manufacturing Co. on Wednesday it was voted to reduce the number of directors from eleven to seven. A new board was then elected, the only representatives of the old directors. then elected, the only representatives of the old directorate to continue in office being S. M. Rice and Nathan Bijur, whose terms expire in 1899. The board is now as follows:

Marsdon J. Perry, President of the Glube National Bank, Providence R. I., Almeric H. Paget, recently Treasurer and Director Metropol. Traction Co. Pembroke Jones, Fresident Standard Rio Co. Wholesale whiskey dealers. H. J. M. Fardeza, of Cardeza, Williams & Co., wholesale whiskey dealers. T. H. Wontwarth, Secretary and Treasurer of the Am. Spirits Co. S. M. Rice, President of the company, and Nathan Bitur.

This change of directors is in accordance with the policy for bringing the American Company into close relations with the new Standard Distilling & Distributing Co., Messra. Perry, Paget and Jones being directors of both corporations. The Standard Company, it is stated, will begin operations on Oct 1 - V 67 n. 293 Oct. 1.-V. 67, p. 323.

American Steel & Wire Co.—On "Unlisted" List.—The-company's \$13,000.000 preferred stock and \$12.000.000 com-mon stock were admitted to quotation in the Unlisted De, partment of the New York Stock Exchange on July 7, 1893 The official statement to the Exchange says in substance:

CAPITAL STOCK.—The American Steel & Wire Co. was incorporated under the laws of the State of Illinois in March, 189, and commenced active business as of April 1, 1898. General office, "The Rackery," Chicago, Ill. Capital, \$12,000,000 preferred stock and \$12,000,000 common stock. Preferred stock, 7 per cent cumulative. Par value of all shares, \$100 each. Entire amount, both preferred and common, has been issued and is widely distributed.

Stock consists of both Chicago and Naw York cartificates. New York transfer agents, Mesers. Cuyler, Morgan & Co., No. 44 Pine Street; registrars, Metropolitan Trust Co., No. 37 Wall Street. Culcago transfer agents, lilinois Trust Co., No. 37 Wall Street. Culcago transfer agents, lilinois Trust Co. Directors and Officers.—Directors—J. W. Gates, Isaac L. Ell-

cago transfer agonts, Illinois Trust & Savings Bank; registrar, The Northern Trust Co.

American Sugar Refining.—Competition.—The company

American Sugar Refining.—Competition.—The company is now in active competition with the new refinery of Arbuckle Brothers in Brooklyn. This refinery, as planned, was to have a capacity of between 3,000 and 4,000 barrels daily. The Dorscher refinery, adjoining the East River south of the Long Island Railroad station in Long Island City, will probably begin operations with a daily capacity of about 3,500 barrels before the end of October. The outside refineries, it is estimated, are now handling about one third as much business as the American Company. It is believed the Mollenhauer and National refineries will resume the arrangement with the American Company which was terminated last week, and if not they will act in harmony with the American Company as will the Revere Refinery, Boston, leaving only the two refineries—Arbuckle and Dorscher—and the beet sugar refineries as free and active competitors. A tabulated statement showing the capacities of the various refineries in and out of the trust was given in the Cheonicle of December 4, 1897, in V. 65, p. 1069.—V. 63, p. 1187.

Avoyelles RR.—St. Louis Avoyelles & Southwestern RE.

Avoyelles RR.—St. Louis Avoyelles & Southwestern RB.

—Reorganized Company.—The Avoyelles RR. Co. has been incorporated in Louisians, with a capital stock of \$150,000, as successor of the St. Louis Avoyelles & Southwestern, which was sold under foreclesure Aug. 20.—V. 67, p. 435.

Baltimore & Ohio RR.—Foreclosure.—The foreclosure suit under the consolidated 5 per cent mortgage of 18:7 was brought before the United States Circuit Court in Baltimore on Sept. 19. This suit is preparatory to carrying out the re-

on Sept. 19. This suit is preparatory to carrying out the reorganization plan.

Redemptron of Car Notes.—The car rental notes dated July 18, 1897, for cars held under lease from the Michigan Peninsular Car Co. will be redeemed, principal and interest, at the office of the railroad company in Baltimore on Oct. 13 next, on which date interest on the notes will cease.

Receiver Cowen's Statement as to Recent Purchase of Stock.—Receiver John K. [Cowen arrived this week in Baltimore and confirmed the reported sale of preferred stock held by the reorganization committee to a

syndicate of capitalists, among whom are included, Philip D. Armour. Mr. Ream, the executor of the Princip syndicate of capitalists, among whom are included, Philip D. Armour. Mr. Ream, the executor of the Pullman estate; M-rshall Field and James J. Hill, the President of the Great Northern Railroad. The "Baltimore American" quotes Mr. Cowen as follows: "Who the other gentlemen are in addition to those already known I am not at liberty t-state. I may say, however, that the syndicate is a strong one, being composed of men of large means, who will spare no expense to place the property in a physical condition unexceled by any other road in the United States. As President Hill has already pointed out, he has no intention of linking the Baltimore & Ohio and the Great Northern by means of another line between Chicago and St. Paul. The idea of such a connection was entirely foreign to the minds of the gentlemen who have acquired this interest in the property. Mr. Hill's connection with the Baltimore & Ohio will be in an advisory c-pacity, in which his long exp-rence will be welmr. Hill's connection with the Baltimore & Ohio will be in an advisory c-pacity, in which his long exp-rience will be well comed. No hing revolutionary is proposed by the new owners. They hought the stock through Speyer & Co., believing that it would prove a profitable enterprise."

that it wond prove a profitable enterprise."
Great improvements will be made west of the Ohio River.
The road from Chicago to the mountains will be reduced to
an eight er-food grade. East of the river betterments will
also be made. We shall construct a tunnel at Mount Airy,
to obviste the grade at that point. Other improvements will
be made—gradually, of course, and with every regard to

The foreclosure proceedings for the sale of the road will be

The foreclosure proceedings for the sale of the road will be pushed rapicly, and the time is not far distant when the property will be taken out of the hands of the receivers.

The headquarters and the shops will continue in Baltimore. The road with be reorganized under the new charter granted by the last Mary and legislature.

Noticeas to 5s 1885.—Speyer & Co., pursuant to their notice of June 22, 189, have deposited the 5s of 1885 assenting to their agreement, and thereby made them suiject to the reorganization plan of June 32. The firm is now prepared at its office, 30 Broad Street, to exchange the Marcantile Trust Co. cartificates of deposit received therefor against the trust receipts issued under the original agreement.—V 67. p. 577.

Bell Talep that Co. of Philadelphia.—I crease of Stock

Bell This prine to, of Philadelphia.—I crease of Stock Authorized.—The stockholders this wask voted to increase the capital stock from \$2,000,000 to \$4.000,000.—V. 67, p. 175.

Brooklyn Rapid Transit.—Nassau Electric RR.—Purchose of vi ck.—Ph-sale was announced this week of the large holdings of R. T. Wilson in the stock of the Nassau Electric RR. Company to the Brooklyn Rapid Transit Co., or to parties act us in its interest. Later it was stated, on the highest authority, that an agreement had been executed where by Albert L. Johnson and Tom L. Johnson would turn where it Abert L Johnson and form L Johnson would three over sufficient of their holdings to give the Rapid Fransis peopl absolute control of the Nassau property. We were officially i formed yesterday that the deal was still pending but was expected to go through. The new securities of the Nassau Company are about to be issued.—V. 67, p. 427 ,318.

Buffalo North Main Street & Tonawanda Electric Bailway.—Line Abandoned.—A Tonawanda special to the Buffalo "Commercial" under date of September 9 seates that the road would not be operated after September 11 and that the franchise would be forfeited and the tracks torn up at once. The company was incorporated in 1895 and operated 5% miles of road, extending from North Main Street, Buffalo, to "coawa da, but never earned its operating expenses." V 61 p. 559 Buffalo, to "onawa d penses.—V. 61. p 558.

penses.—V. 61. p. 558.

Cambria Iron Co.—Lease Ratified.—The directors yesterday ratified the proposed lease to the Cambria Steel Co. The new company will have \$16,000,000 capital, and the iron company strokholders will have 4 per cent dividends guaranteed and may subscribe for Steel Company stock, two shartes for each share now held. Cambria Iron stock, it is stated, will receive also a scrip dividend of 6 per cent convertible into stock. A meeting of the stockholders will be called at an early date to act upon the directors' action.—V. 67, p. 437.

early date to act upon the directors' action.—v. v., p. 787.

Canadi n Pacific Ry.—Bonds Call-d.—Of the Canada Central RR 5 per cent first mortgage bonds there have been drawn and will be paid off at the rate of £115 per £100 bond on Oct. 1 at the office of Speyer Brothers, 7 Lotbbury, Lo on Oct. 1 at the office of Speyer Brothers, 7 Lothbury, London, E C. 21 bonds of £500 each and 64 bonds of £100 each, in all £16 900

Plans for New Steamer Lines.—The directors, it is stated, are planning to establish a new line of steamers on the At lantic Ocean, provided a subsidy can be obtained from the Dominion G. w-rument; also a fleet of grain boats on the upper Great Lakes.—V. 67, p. 529.

Chicago Great Western Ry.—Ofer to Purchase.—As to rumors touching this company, the following is given as from "good authority:" 'It is true that an offer has been made by a prominent banking house to purchase control of Chicago Great Western. That is all that can be said on the subject at this time."—V. 67, p 481.

City & Suburban Ry. of Washington.

City & Suburban Ry. of Washington.—Bonds Over Subscribed.—The \$1,500.000 first mortgage bonds have been oversubscribed at 1021/2 V. 67, p. 370.

Cleveland Lorain & Wheeling Ry.—Refunding—The company has sold to Kean, Van Cortlandt & Co \$700, 00 first consolidated 5 per cent gold bonds of 1833, to retire a like amount of Cleveland Tuscarawas Valley & Wheeling first

mortgage 7 per cent bands falling due October 1 next. The first consolidated mortgage 5 per cent bands now become an absolute first mortgage on the entire road, the entire issue of \$3.000 000 being outstanding. The fixed charges are also re-

duced \$14.000 a year.

The Cleveland Tu-caraway Valley & Wheeling bonds may be exchanged for the first mortgage 5 per cent gold bonds moon terms which will be fundated on application by Kean, Van Cortlandt & Co... 33 Wall Street, N. Y. See alvertisement on page vit —V. 64, p. 566.

Cayshogs Telephone Co. of Cleveland, 0.—Incorporated. This company has been iscorporated in Onio with authorized capital stock of \$3.000,000 to construct and operate a line in opposition to the Bell Company. The incorporators of the company were: E. W. Moore, J. B. Hunna, James B. Hoge, H. Clark Ford John Sherwin, H. A. Everett and H. B. Mo-Graw. The Union Suburban Telephone & Telegraph Co., with authorized capital of \$1.000,000 was recently incorporated in the same interests; see V. 67, p. 484.

Denver Leadville & Gunnison Ry.—Sale Nov. 11.—The foreclosure sale is set for Nov. 11.—V. 67, p. 319.

Des Moines Water Power.—Proposed S le of Water Works Defe t d.—On September 5, 1893, the voters of Des Moines defeated the proposition to purchase the plant of the Des Moines Water Works Co. for \$850,000. The vote was 3,760 for to 3,829 against.—V. 66 p. 1237.

Edison Electric Illuminating of Brooklyn,—Two-thirds of Stock Dep sited—Fu-ther Deposits Till Sept. 30—More than two-thirds of the capital stock has been deposited, or secured to be deposited, with the Central Trust Co. of New York, pursuant to the agreement of Aug. 25, 1-98, providing for the sale of the same to the Kings County Electric Light & Pow-r Co. The time for further deposits is extended to and including 30th September next at 3 P M. Rights to subscribe for the new issue of stock of the Elison Concern will scribe for the new i-sue of stock of the E lison Company be received to 5th O tober, 1898, at 3 P. M. - V. 67, p. 483.

Erie RR.—Quarterly.—Earnings for the quarter ending June 30 have been reported:

The figures for the fiscal year ending June 30 will be found on a preceding page under "Annual R ports."—V. 67, p. 477.

Federal Strel Co.-Terms of Consolidation.-The official rederat Steel Co.—lerms of Consultation.—Incometal terms of exchange were given last wiek. In tabular form they are us follows, each stockholder being riquired to subscribe to his allotment of new common stock at the rate of \$.5 per share if he desires to participate:

desired, and for improvements.

It is expected that about \$53,000,000 of Federal Steel pre-It is expected that about \$52,000,000 of Federal Steel preferred and \$46,000,000 of the common will be issued at present. The exc arges on the terms above indicated require the issue of \$46,218,135 preferred and \$37,006,548 common, while the remainder of the pre-ent issue (\$5,741,465 preferred and \$4,993,402 common) will go to the syndicate for \$4,813,373 in cash. The contributions from stockholders aggregate \$9,251.627, making, with the \$4,823,373 from sale of stock to the syndicate, the \$14,075,000 available cash underwritten as above stared. above stated.

Gov. Flower said yesterday:

Gov. Flower said yesterday:

The consolidation ought to prove a great success. The Minnesota Iron Co. owns a practically in-xhaustible supply of the best fron ore in the United States. The company also owns the Duluth & Iron Range RR, which connects with the unines, and is capable of transporting 4.060,000 tons of ore per annum. It is now, however, transporting only about Two Harbor, on Lake Superior, together with five great ore docks, each containing 1,000 feet of ore pockets, with an aggregate capacity of 134 fb tons of ore. These docks are furnished with electric lights and are operated day and night. The company also owns more than one half the steemers and barges on the lakes used for the transportation of ores to Chicago, Che eland, Buffalo, etc. It also owns the r. iroad that transports the ores from the docks at Chicago to the several steel and iron mills in that city. When the consolidation is completed the Federal Steel Co. will own all the seel mills in Chicago, capable of turning out 5,000 tons of steel a day, together with the mills at Lorain and Johnstown, which are capable of turning out structural iron a d troiley rails.

The carnings of the Minnesots Iron Co. last year were 10 per cent on its capital stock, and the Illin-is steel Co erraed over 12 -r cent. In my judgment the Federal Steel Co. 's preferred stock at 70 is a cheap prop-rty, and I have ittle doubt of its paying a regular 6 per cent annual dividend. -V. o7, p. 578.

Fitchburg RR.—Sale of Stock.—The company has sold to

centrainual dividend.—V. o7, p. 578.

Fitchburg RR.—Sale of Slock.—The company has sold to Kidder, Peabody & Co. 16 000 shares of preferred stock at a price said to be at or above par. The proceeds, it is stated, will pay off \$750.000 5 per cent bonds, which mature in March, 1899, and \$500.000 5 per cent bonds which mature June 1, 1900. The company has been holding in its treasury as an investment over two millions of its authorized issue of \$17,360,000 preferred.—V. 67, p. 3\*8.

Florida Central & Peninsular RR.—South Bound RR.—Sale of Bonds.—The Mercantile Trust & Safe Deposit Co. of Baltimore and the Baltimore Trust & Guarantee Co, have

taken \$1,550,000 first mortgage bonds issued by the South Bound Ry. in 1891. The bonds, which are guaranteed by the Florida Central & Peninsular, have been held by the construction company. The total outstanding issue is \$2,033,000. As the Southern situation is constantly improving financially, and as this road forms an important link in the Southern System to Florida, the bonds as now taken were purchased more as an investment than to offer to the public. They will not be put upon the market at present.—V. 65, p. 1170.

Fourth Street & Arsenal Street Ry. of St. Louis.—Sold.—This property was sold under foreclosure Tuesday for \$191,000 to John H. Overall.—V. 65, p. 111.

General Electric.—Settlement of Preferred Stock Matter.

This property was sold under foreclosure Tuesday for \$191, 000 to John H. Overall.—V. 65, p. 111.

theneral Electric.—Settlement of Preferred Stock Matter.—T. L. Livermore and Edwin F. Atkins, the preferred stock-holders' committee, issued this week a circular announcing a proposition for the sale of the 9,800 shares of preferred stock on deposit with the American Loan & Trust Co. of Boston, (the committee's depositary) on a basis of \$100 per share, with interest at the rate of 6 per cent in cash, payable when the stock is delivered. The circular follows:

"Your committee have been in negotiation throughout the pendency of the litigation with the General Electric Co., but have been unable to adjust the controversy with the company to their satisfaction. They have new received from individuals a proposition which they have decided to recommend you to accept. It is that we sell our shares and rights in respect thereof, at \$100 a share cash, on or before October 1. 1898, with interest from July 1, 1898, at 6 per cent.

"This is not as favorable a result as we have hoped for. It amounts to five years' back dividends and \$65 per share for the unreduced stock. In view, however, of the doubtful character of the questions raised, the protracted and expensive litigation involved and the comparatively small number of shareholders—say one-fourth of the preferred stock—taking part in it, we have accepted the offer for ourselves and recommend it to you. The price above named will be pald without any deduction for the expenses of the proceedings to date.

"Those who elect not to accept this offer either may acquiesce in the reduction of their shares pursuant to the recent action of the company and accept new stock certificates for the reduced amount of stock, or, at their own risk and expense. We have instructed the American Loanac Trust Co. to dismiss the pending suit unless, prior to Oct. 1, 1898, some depositors shall take suitable action to continue the litigation."

We are officially informed that this offer was made on

half of the General Electric Co. and that the bulk of the 9,800 shares has accepted the proposition, thus settling the litigation regarding the reduction of the issue.—V. 67, p. 578.

Great Southern Oll & Gas.—Mortgage.—A mortgage for \$600,000 has been filed at Zanesville, O, by the Great Southern Oil & Gas Company in favor of the Manhattan Trust Co.

Hudson (N. Y.) Street Railway—Hudson Electric Light & Power.—Purchased.—A press dispatch says that Charles J. Cooper, of Brooklyn, who recently purchased the Hudson Street Railway, has become sole owner of the Hudson Electric Light & Power Co.

Street Railway, has become sole owner of the Rudson Rico-tric Light & Power Co.

Indiana Illinois & Iowa RR.—Sale of New Bonds.—The company has sold to Redmond, Kerr & Co. and Lee, Higginson & Co. \$2,500,000 of the \$5,000,000 new 5 per cent gold bonds authorized last week. Of the amount sold, \$500,000 were offered this week for public subscription at 102½ and were largely over subscribed. The remainder of the bonds purchased had previously been marketed.

President Shonts says in substance:

The mortgage securing these bonds is the first and only obligation and covers the entire property at about \$16,000 per mile. The \$2,500,000 bonds sold were issued to retire the former bonded debt of the company (\$1,75,000) and for expenditures made out of the surplus earnings for construction and improvements upon the property during the past four years. The \$500,000 unissued bonds are to be held in the company's treasury, to be issued only for new construction at not exceeding \$16,000 per mile. It is now proposed to build about 35 miles of railroad from Streator to Bureau Junction via Lostant, at which latter place connection will be made with the Illinois Central RR. and at Bureau Junction with the Chicago Rock Island & Pacific Railway Co. Upon completion of this extension the lease of trackage to Senecs will be discontinued. The bonds may be called upon 30 days' notice at 110 and accrued interest. The mortgage likewise provides that the bondholders shall have the right to elect two members of the beard of directors. The Continental Trust Co. and Joseph D. Oliver are the mortgage trustees.—V. 67, p. 578.

Jasper Town & Lands.—Litigation.—Press dispatch says

Oliver are the mortgage trustees.—V. 67, p. 578.

Jasper Town & Lands.—Litigation.—Press dispatch says Judge Bruce, in the Federal Court at Birmingham, Als., on Sept. 20 refused to grant the petition of John A. James of New York for a receiver for the Jasper Co., this receiver also to have jurisdiction over the Corona Co., of which J. H. Bartlett had been previously appointed receiver by the State courts. Judge Bruce held that the Federal Court had no right to interfere in a matter already in the hands of a State court. Bartlett represents the English interests and James the American interests. This leaves the Corona Co., the property really in dispute, in the control of English stockholders.—V. 67,p. 428.

Kansas City Fort Scott & Memphis Ry.—Called Bonds.—
First mortgage 7 per cent \$1,000 bonds of the Fort Scott
Southeastern & Memphis R. R., 33 in number, and of the
Short Creek & Joplin R. R., seven in number, have been
drawn and will be paid Sept. 26, 1898, at 105 flat, on presentation (with coupons of and from March 1, 1899, attached),
to the Trustees, at 50 State St., Boston.—V. 67, p. 424.

Kentucky & Indiana Bridge.—Coupons.—The three coupons due on the \$1,000,000 first mortgage bonds on Sept. 11,
1897, and on March 11 and Sept. 11, 1898, \$75,000 in all, remain unpaid. This interest, it is stated, will be paid whenever the property is sold. Holders of some of the junior securities have delayed matters, but it is hoped the sale will
take place this fall. The upset price is \$740,000 (or \$760,000?),
subject to the first mortgage for \$1,000,000.—V. 67, p. 483.

Lewiston Brunswick & Bath Street Ry.—Completed.—

Lewiston Branswick & Bath Street Ry.—Completed.,—This new line has been completed, and regular trips are now being made over the entire route from Lewiston to Brunswick, via Lisbon, Topsham and Bath, a distance of 36 miles, with a branch from Lewiston to Sabattus, about six miles. A. L. Shaw of Bath, Me., is President.—V. 67, p. 481.

Los Angeles (Cal.) Railway.—Negotiations for Control.—
A syndicate, composed, it is stated, of C. P. Huntington,
H. E. Huntington, I. W. Hellman, Christian de Guigne and
Antoine Borel, is negotiating for the control of the Los
Angeles Railway Co. and of the other street railways of the
city exc pt the Los Angeles Traction Co. and two lines of
comparatively small importance. The plan is to form a new
company, cancel all the old bonds, issue new bonds, reorganize the properties on a paying basis, make all needed improvements and feasible extensions, and give Los Angeles a
better service than it has ever enjoyed.—V. 66, 9.90.

Los Angeles City (Cal.) Water—Receiver.—Frank A. Gibson, cashier of the First National Bank of Los Angeles was on Sept. 8 agreed upon as receiver for the Los Angeles City Water Co. by the attorneys for both sides. Judge Oster was expected to make the appointment Sept. 12.—V. 67, p. 222.

Metropolitan Street Ry. of Kansas City.—Stock Chinges Hands.—The Kansas City "Star" says Norman B. Ream, the Chicago capitalist, has since September 1 purchased a large share of the stock and will be a director; also that Mr. P. D. Armour has purchased a block of the stock controlled by Mr. Robert Fieming, the English capitalist.—V. 67, p. 479.

Mexican Central By.—Extensions.—As to the reports of proposed extensions, the company writes us as follows:

proposed extensions, the company writtes us as follows:
"No arrangements have been made by this company for the building
of a branch line to Tequila. The line from Jimenez to Parral known
as our "Parral Extension" has already been alluded to in our annual
report for 1897. It is about 55 miles in length, and shown by dotted
line on your map in the INVESTOR' SUPPLEMENT, It is expected that
the construction will be finished next month. We have acquired the
Michoacan & Pacific concession for a line south from Yurecuaro, and
about 28 miles has been authorized by the Board and is now under
construction. The line will run in a southerly direction from Yurecuaro, which is on our Guadalajara Extension between Patti and La
Barca."—V. 67, p. 478.

National Lineard All — Representation — Pognating the

National Linseed Oll.—Reorganization.—Regarding the call of the Olcott Committee for deposits of stock, the directors of the company have sent to the shareholders a circular saying in substance:

saying in substance:

For the purpose of patting the affairs of this company upon a solid basis so that in the fature it can conduct its business with its own capital instead of relying upon its ability to borrow from banks, your board of directors have requested Frederic P. Olcott, President of the Central Trust Co. of New York, to formulate a plan of reorganization. It is our desire to secure as quickly as possible severa' million dollars of fresh capital, thus enabling us to pay off every dollar of indebtedness secured or unsecured, and leave sufficient moneys in hand to carry on our great and growing business. Mr. Olcott has acceded to our request, and has associated with himself Gen. Samuel Thomas and Henry W. Poor.

The support of the holders of our stocks should be shown by depositing the stock with the Central Trust Co. As soon as a majority of the stock is deposited, the committee will formulate a plan and submit it to you for your approval. If you do not approve the plan submitted, then, regardless of the action of other stockholders, your stock will be returned to you upon your surrender of the receipt of the trust co'y.

A press dispatch quotes President Euston as saying that

then, regardless of the action of other stockholders, your stock will be returned to you upon your surrender of the receipt of the trust co'y. A press dispatch quotes President Euston as saying that the plan contemplates the reduction of the present common stock from \$18,000,000 to \$9,000,000, the latter to represent the present assets and a small allowance for good will, and the creation of \$6,000,000 preferred stock, this to be offered to stockholders and to be underwritten by a syndicate. In the reorganization the \$1,500,000 outstanding bonds, it is understood, will be taken up. The amount borrowed outside of the bonded debt is stated as \$3,500,000, which amount is nearly equaled by the book accounts, cash, material and finished products. Mr. Euston, Director Slocke, of Buffalo, and J. H. Eckels, of the Commercial National Bank, are a committee to assist in the reorganization.

At a meeting in St. Louis of stockholders representing, it is claimed, about 56,000 shares, George L. Edwards, J. H. Maxon and E. H. Lurdley were appointed a committee to examine thoroughly the company's books. The opposition of the company to the mandamus requiring it to permit an examination has been withdrawn.

At Chicago, Sept. 16, application for a receiver for the company was filed in the United States Circuit Court by Meyer Bernhard of Lacrosse, Wis., owner of 25 shares of stock.—V. 67, p. 530.

New York New Haven & Hartford RR.—Quarterly.—Earnings for the quarter and in the company was an examination.

New York New Haven & Hartford RR.—Quarterly.— Earnings for the quarter ending June 30 have been reported: 3 mos. end. Gross Net Other Interest, Balance June 30. earnings. earnings. income. laxes, etc. for divs. 1898......\$7,614,740 \$1,934,848 \$414,152 \$1,844,545 \$364,091 \$1897......7,912,547 2,464,670 \$184,397 \$1,562,633 1,086,434 The earnings, expenses, etc., for the fiscal year ending June 30, 1898, were given last week.—V. 67, p. 29.

June 30, 1898, were given last week.—V. 67, p. 29.

Northern Pacific Ry.—Suit of Old Preferred Stockholders.—The decision of the Master denying the right of the preferred stock of the old company to a lien on a portion of the land grant has already been mentioned in this column (page 483). The counsel for the preferred shares, Messrs. Van Schaick & Norton, inform us that they will undoubtedly appeal the case, as they feel the Master has neglected to consider some of the peculiar features in the case which distinguish it from other cases in which preferred stock has been given a priority on capital. The mere fact that the mode of payment was not clearly defined should not, they believe, prevent the stock being considered in the light of certificates of indebtedness. Also the matter of notice, they think, was insufficiently treated in the opinion.—V. 67, p. 576, 579, 588.

Pacific Borax & Red Woods Chemical Works (Ltd.)—

to the Indian & General Investment Trust, Ltd., of London, to the Indian & General Investment Trust, Ltd., of London, as trustee to provide for the construction of a large borax plant at Constable Hook, N. J., to which place is to be removed most of the company's Alameda plant. Extensive deposits of borax at Antofagasta, Chili, it is stated, are also to be purchased. The mortgage describes borax mines or factories in San Bernardino, Inyo, and Alameda counties in California; Esmeralda County, Nevada, and in Oregon.

Pacific Coast Co .- First Dividead on Common Stock .-Pacific Coast Uo.—First Dividend on Common Stock.—The directors have declared a dividend of 3 per cent on the second preferred stock, making the full 4 per cent, and a dividend of 1 per cent on the common, from earnings for the seven months ending June 30. The full dividend on the first preferred has already been paid. The following is for the seven months ending June 39, 1897, after deducting all the dividended declared to date: months ending June 3 dends declared to date:

Total net income ...... \$593,317 Balance surplus .......\$175,725

Paducah Gas Light.—Default—Receiver.—Saunders A. Foster has been appointed receiver of the company on patition of the Farmers' Loan & Trust Co., the mortgage trustee. Interest on the bonds is in default.

Pennsylvania Manufacturing Light & Power.—First Dividend.—The company on Thursday declared its first dividend of 50 cents per share, payable on Oct. 15 to holders of record Sept. 30.—V. 67, p. 275.

People's Gas Light & Coke of Chicago.—Indiana Natural Gas.—Settlement—Mr. E. C. Benedict; said yester-day: "All contention between the Indiana Natural Gas Co. day: "All day: "All contention between the Indiana Natural Gas Co, and the People's Gas Co. of Chicago has been most satisfactorily settled by mutual concessions, which will be lasting and friendly. The settlement in two or three years will largely augment the net earnings of the People's Co. from the use of natural gas alone."—V. 67, p. 483.

Peorla Decatur & Evansville RR.—Interest Payment.—
The interest on the first mortgage bonds of both divisions will be paid to the certificates of deposit by the first mortgage bondholders' committee.—V. 67, p. 275.

Prescott & Eastern RR.—New Lines.—Bonds Guaranteed.

—The facts regarding this new company, whose bonds will be guaranteed by the Santa Fe Prescott & Phenix Ry. Co., are given in the report of the guaranter company, on a preceding page.

ceding page.

San Francisco & San Joaquin Valley Ry.—Bakersfield & Los Angeles Ry.—Atchison Topeka & Santa Fe Ry.—Extension to Los Angeles and San Francisco.—The Bakersfield & Los Angeles Ry. Co. has been incorporated by Claus Spreckels and others, directors of the San Francisco & San Joaquin Valley Ry., to extend that road from Bakersfield over the Tejon Pass to or toward Los Angeles. The new line will connect with the Atchison Topeka & Santa Fe, thus giving San Francisco another trans-Continental outlet to the East.

The San Francisco & San Joaquin Valley road as now in operation runs from Stockton southerly to Bakersfield, Cal., 235 miles, and work is in progress on its extension from Stockton towards San Francisco, 90 miles. A 5,700-foot tunnel is being bored for this extension through the Contra Costa hills, and also four other tunnels, aggregating 3,350 feet, at other

and also four other tunnels, aggregating 3,350 feet, at other points. The Northern terminus, we understand, will be at Port Richmond, connection there to be made with San Francisco by ferry. The labor involved in constructing tunnels, trestles and bridges is large, and it is thought a year and a-half will elapse before the road can be operated through to Port Richmond.

Port Richmond.
Rumors that are not officially denied are to the effect that the Atchison Topeks & Santa Fe Ry. Co. has arranged to acquire, either directly or through its friends, a controlling interest in the San Francisco & San Joaquin Valley Company. Of the stock of the latter company one-half is held by the Union Trust Co. of San Francisco under an agreement made to prevent its acquisition by competitive interests for the purpose of preventing the construction of the road. This agreement, it is understood, provides that either the shares themselves or their par value in cash shall be turned over to the owners on Jan. 1, 1899.—V. 65, p. 621; V. 67, p. 576.
South Carolina & Georgia Extension RR.—Incorporated.

South Carolina & Georgia Extension RR.—Incorporated.
—This company was incorporated in North Carolina Sept. 14, with a capital stock of \$500,000, as successor of the Ohio River & Charleston, recently foreclosed. The incorporators are: Samuel Hunt, of Cincinnati; Simon A. Stearn, John J. Collins, Geo. H. Earle, Jr., and Evans R. Dick, of Philadelphia, and P. J. Sinclair, of Marion, N. C. The South Carolina & Georgia began oserating the property on Sept. 1. The reported lease is denied.—V. 67, p. 530.

South Side Elevated R. R.—Chicago City Ry.—Control

reported lease is denied.—V. 67, p. 530.

South Side Elevated R. R.—Chicago City Ry.—Control Acquired.—The Chicago City Ry., it is understood, has arranged to acquire the South Side Elevated Railway. It is said the surface road will assume the \$750,000 outstanding bonds, and guarantee 4 per cent on the \$10,328,800 capital stock of the elevated. The transfer, according to report, will take place on Jan. 1.—V. 68, p. 285; V. 67, p. 221.

Union Pacific RR.—First Dividend.—The directors on Thursday declared a dividend of 1½ per cent on the preferred shares. A statement of earnings and charges for the six

months ending June 30, issued in connection with this announcement, will be found under the heading "Annual Reports."—V. 67, p. 435.

Union By.—Southern Boulevard RR.—Westchester Electric.—Quarterly.—Earnings for the quarter and the 12 months ending June 30 were:

3 months ending June 30-	Gross earnings.	Net earnings.	Other income.	Interest,	Balance surplus

Union Ry. loans and bills payable June 30, 1898, \$473,400, against \$264,609 on June 30, 1897; Westchester Electric, \$12,500.—V. 66, p. 1143.

Union Traction Co. of Philadelphia.—Assessment of \$5 per Share Payable Nov. 16.—The directors on Monday called an assessment of \$5 per share on the company's 600,000 shares of capital stock. The shares are \$50 each, and the present call raises the total amount paid in on each to \$17 50. The last previous assessment was \$250 on March 1, 1897. Of the \$3,000,000 cash to be raised \$3,400,000 will be used to pay the loan secured for the purchase of the stock of the Hestonville Mantua & Fairmount and the balance to meet the cost of extensions etc. cost of extensions, etc.

cost of extensions, etc.

Annual Meeting.—At the annual meeting Wednesday the old board of directors, including J. Lowber Welsh, who was persuaded to reconsider his announced intention to retire, was re elected without opposition. The figures from the annual report for the year ending June 30, as presented to the meeting, were the same in effect as those published in the CHRONICLE of July 23, on page 175, there being a surplus from the year's operations of \$24,620, contrasting with a deficit of \$851,935 the previous year.—V. 67, p. 175.

Westinghouse Electric & Manufacturing Co.—Walker

Westinghouse Electric & Manufacturing Co.—Walker Co.—Control Purchased.—Mr. George Westinghouse, President of the Westinghouse Electric & Manufacturing Co. on

dent of the Westinghouse Electric & Manufacturing Co. on Wednesday made the following announcement:

"The election this day of Roswell P. Flower and Authony N. Brady as members of the board of directors of the Westinghouse Electric & Manufacturing Co., to represent the interests of the former stockholders of the Walker Company completes the union of the interests of the Walker Company of Cleveland with those of the Westinghouse Electric & Manufacturing Company. The purchase by the Westinghouse Company includes substantially all of the outstanding stock and all but \$550,000 of the \$2,500,000 of the twenty-year bonds of the Walker Company, the \$550,000 remaining a first lien upon the property. The recent sale by the Westinghouse Company of \$3,000,000 of debenture certificates has erroneously been connected with this transaction. The entire proceeds of the sale of these debenture certificates were used in retiring the floating and other debt of the company as previously announced.

used in retiring the floating and other debt of the company as previously announced.

"The increase in the total yearly fixed charges of the Westinghouse Company, due to the purchase of the Walker Company, will be but a little more than the sum that the Walker Company has been expending annually in defending patent litigation instituted by the General Electric and Westinghouse companies. The acquisition of the Walker Company will, by reason of the agreement of March 31, 1896, between the General Electric and Westinghouse companies, put an end to this patent litigation and very large annual expenditure on both sides. The business of the Walker Company, as a controlled company of the Westinghouse Company, will be entitled to the protection of the patents of the Westinghouse and General Electric companies, and will in all respects be subject to the agreement between these two comrespects be subject to the agreement between these two com-panies in relation to patents." The announcement concludes:

panies in relation to patents." The announcement concludes:
"The Westinghouse Company regards the business and good will of
the Walker Company as a valuable acquisition, especially as the
Walker Company brings with it upward of \$1,250,000 unfilled orders.
The Walker Company has at Cleveland modern and extensive works,
equipped with machinery capable of manufacturing the largest types
of rallway apparatus, and will, with the works of the Westinghouse
Company at East Pittsburg, constitute a manufacturing plant second
to none in the country. The capacity and profits of the two companies
will be increased by carefully harmonizing the manufacturing and
selling operations, and the direct savings thereby effected should exceed the fixed charges incurred by the purchase of the Walker Company. The shipments of both companies, owing to the large orders on
hand, have been increasing during the past few months, and exceeded
\$750,000 for August.
"The total fixed charges of the Westinghouse Company, including
those due to the Walker purchase and the dividends on its preferred
stock, will be \$42,000 per month."—V. 67, p. 324, 435.

Yonkers RR.—Union RY.—Third Ay, RR.—Sold.—Bonds

Yonkers RR.—Union RY.—Third Av. RR.—Sold.—Bonds Guaranteed.—The Yonkers RR. has been sold to the Union Ry. Co., which will guarantee \$1,000,000 bonds, this guaranty being accepted by the Third Avenue RR. Co.—V. 65, p. 514; V. 66, p. 1143; V. 67, p. 480, 484.

# Reports and Documents.

## ERIE RAILROA) COMPANY.

THIRD ANNUAL REPORT-FOR THE FISCAL YEAR **ENDING JUNE 30, 1898.** 

New York, September 8, 1898.

To the Bond and Share Holders of Erie Ruilr ad Company:

The Board of Directors respectfully submits the following report of the operations of your property for the year ending June 30th, 1898:

MILEAGE.

The mileage operated on June 30th, 1898, is shown in detail in Table No. 1, in pamphlet report, from which you will note that the Company:

Owns in fee or controls by ownership of entire stock 1,6 14	:50	Miles.
Controls by ownership of over a majority of stock 19	8-48	61
Leuser 27	-98	64
Operates under agreements 2	6.03	4.6
Has trackage rights over 6	4.08	44
	-	
A total mileage energical of	4 7	6.5

-of which 682 77 miles, or over 29 per cent, have second track, and 3 96 miles each third and fourth track.

The increase of mileage over last year represents the trackage rights over the Fall Brook Road, hereinafter referred to, but not taken into account in the statistics accompanying this report.

#### EARNINGS AND EXPENSES.

The following statement shows the gross earnings, expenses and net earnings from operations f r the fiscal year of the entire system (excepting the New Jersey & New York Railroad and the Coal Companies, for which latter see page 27 in pamphlet peport), including the Union Steamboat Line, Union Dry Dock, dining-cars and restaurants, and for comparative purposes similar figures for the fiscal year of 1897 are also given.

As will be seen from the above statement, the gross earn-As will be seen from the above statement, the gross earnings for the year from operations reached the sum of \$33,-740,86 \cdot 16, exceeding the gross earnings of the previous twelve months by \$2,243,829 24, or 7·12 per cent. To produce this gress revenue required an expenditure of \$23,438,-037 95, an increase over last year of \$2,105,795 37, or 9·03 per cent, leaving net earnings amounting to \$8,302,822 21, or \$138,033 87 more than last year, an increase of 1·69 per cent

The expenses equaled 75.39 per cent of the earnings, a greater ratio by 1.31 per cent than for the year 1897.

## MERCHANDISE FREIGHT.

This class of traffic produced revenue amounting to \$18,-031,022 54. being \$1.471,572 40 greater than for the year 1897, or 8.86 per cent increase.

The volume of tonnage increased 20.20 per cent, or 2,134,-960 tons, the total handled being 12,701,741 tons.

The number of tons carried one mile was 3,117,611,646, being 459,024,152, or 17.27 per cent greater than last year.

The average rate received per ton per mile for this traffic was 5.60 mills, being a decrease of 45 mills, or 7.20 per cent as compared with 1897, and the average haul was also less than the previous year, being 245.45 miles, as against 251.60 miles, a falling off of 6.15, or 2.44 per cent.

The items transported are shown in detail in Table No. 13, pamphlet report, and consisted principally of—

Grain, flour and mill products, Petroleum and other oils.

Fruits and vegetables, General merchandise,

Grain, flour and mill products, Petroleum and other oils, Iron and iron products, Cement, stone. sand, etc. Lumber and other products of the forest.

The volume of the merchandise traffic shows an encouraging increase, but the downward tendency in the rate continues. During the last eight years it has fallen from 6.76 mills to 5.80 mills—nearly one mill, or over 14 per

COAL.

The revenue received from the transportation of coal amounted to \$7.359,881 12, an increase over the preceding year of \$492,746 44, or 71 per cent.

The total tonnage amounted to 10,941,685 tons, an increase of 1,386,379 tons, or 1.51 per cent.

The ton mileage equaled 1,438,737,661, an increase of 12.31 per cent, or 157.645,980 ton miles.

The average rate per ton per mile decreased from 5.36 mills to 5.12 mills, being 4.48 per cent, and the average haul of 131.49 miles decreased 2.58 miles, or 1.29 per cent.

The anthracite tonnage amounted to 5,437,618 tons, an increase of 571,184 tons, or 11.74 per cent.

Bituminous coal to the amount of 4,292,301 tons was transported, being 427,678 tons, or 11.07 per cent over last year.

The coke tonnage was 1,211,766 tons, being an increase of 387,517 toos, or 47.01 per cent.

387.317 tons, or 4701 per cent.

The coal business was in a very unsettled condition during almost the entire year, notwithstanting which the Company was able to hold its tonnage, although the rate was lowered nearly 4½ per cent.

#### GENERAL FREIGHT TRAFFIC.

The total revenue derived by the Company from its entire freight traffic, both merchandise and coal, was \$25.440,90366, being \$1,964,31984 more than last year, an increase of 8.37 per cent.

The volume of tonnage moved from 20,122,086 tons in 1897 to 23,613,425 tons, an increase of 17 50 per cent, or

3,521,339 tons

The ton miles increased 616.67),132, or 15.65 per cent, reaching the amount of 4,556,349,307 tons carried one mile. The general average rate was 5.58 mills, being a decrease

of 0.38 mills, or 6.38 per cent, while the average haul fell off 3.03 miles, or 1.57 per cent, being 192.71 miles.

During the last six years the average rate has decreased from 6.25 mills, to 5.58 mills, being 0.67 mills, or over 10 per

In addition to the above tonnage, Company freight amounting to 2,727,656 tons was transported, making the grand total of all the tonnage handled 26,371,081.

In handling this volume of tonnage 15,186,023 freight train

In handling this volume of tomage 15,186,023 freight train miles were run, an increase of 648 per cent over last year, while the tomage increased 17.5 per cent. The average revenue per freight train mile was \$1.67 as against \$1.64 for 18.7, an increase of 1.79 per cent, and the train load increased from 276.19 tons to 300.04 tons, taking the paying freight only; with the Company's freight included it reached 312.69 tons. The loading per car increased to 14.84 tons, or 646 ner cent. tons, or 6.46 per cent.

tons, or 6'45 per cent.

The volume of the 'ompany's tonnage has been well maintained, but the continual decrease in the rate is not encouraging, and the statistics herewith will give some idea of the large amount of work that has to be done to earn a dollar. The cost of handling a ton one mile, given in Table No. 12 in pamphlet report, shows how close revenue and cost are approaching each other.

The gross revenue obtained from the transportation of passengers was \$5,957,703 80, to produce which 15,001,653 passengers were carried 383,390.464 miles. Each passenger traveled an average of 25.6 miles and paid fare amounting to 39.7 cents, or at the rate of 1.55 cents per mile traveled. While the Company's passenger business was not quite so good as in 1896 there was a very satisfactory improvement in volume over 1897, especially when the general conditions surrounding the tra fio are considered, as will be seen from the following statistics:

the following statistics:

The revenue increased \$214,896 45, or 3.74 per cent.

The number transported increased 238,310, or 1.61 per

The miles traveled increased 13,381,5°8, or 3°61 per cent. The average revenue per passenger increased 00°8 cents, or 2.06 per cent.

The average revenue per passenger mile increased 00 002 cents, or 0·13 per cent.

The average distance traveled increased 00·5 miles or 0·20

per cent.

The miles run by passenger trains equaled 8,128,690 miles, an increase of 0.75 per cent.

The earnings per passenger train mile were 87.423 cents, an increase of 4.0 per cent.

The average number of passengers in each train was 47·17, an increase of 2·86 per cent.

The average number of passengers in each car was 14·98, an increase of 54·91 per cent.

an increase of 54 91 per cent.

Of the passengers transported 14,484,288 were local and 517.365 were through, the former being an increase and the latter a decrease as compared with the previous year.

The number of passengers transported over the Pavonia ferry during the year was 12,985,173, being 218,423 greater han last year.

The policy of your officers for some time past has been to encourage and build up the local passenger business, and the

wisdom of this course is clearly demonstrated by the result of the year's work. The falling off in revenue from the through busi ess has not only been made up by the greater local travel but it has in addition produced the increase shown. The demands of the through travel of to day are so expensive and the revenue is subject to so many attacks that there is very little, if any, profit in the tra'hic, while the local business, although handled at very low rates, can be well taken care of by less expensive service and made fairly remunerative through its volume. wisdom of this course is clearly demonstrated by the result of

#### EXPRESS.

The Company's proportion of the revenue produced by the express business was \$586,231 15, an increase of \$12,040 95 over the preceding twelve months.

The revenue received for the transportation of the mails increased over last year \$21,371 39, giving a gross revenue of \$486,351 53.

#### RENTS AND MISCELLANEOUS EARNINGS.

These two sources of revenue may be very properly considered together.

They show a net increase of \$31,200 61.

## EXPENSES.

### MAINTENANCE OF WAY AND STRUCTURES

The cost of Maintenance of Way and Structures for the year amounted to Three Million Three Hundred and Eighty-three Thousand Four Hundred and Ninety-eight Dollars and Eighty one cents (\$3,383,498 81), being an increase of Two Hundred and Ninety-three Thousand, Eight Hundred and Ninety-three Thousand, Eight Hundred and Ninety Dollars and Thirty Cents (\$293,890 30).

In pursuance of the policy adopted, the work of maintenance, repairs and betterments has been carried on with a view of ultimate economy. The benefits derived from the heavy but unavoidable expenditures made since the regranization, principally in replacing wooden bridges with

organization, principally in replacing wooden bridges with steel and iron structures, are now being realized, as is shown by a considerable reduction in that particular ac-

count for the year.

The general condition of the roadway and structures has

The general condition of the roadway and structures has been well maintained, and favorable progress has been made with the usual work on track and roadbed. Much inconvenience and expense were caused by severe washouts in the summer of 1897 and in the spring of 1898; the repairs made necessary thereby amounting to \$69,000.

92'18 miles of track 'have been fully ballasted and 177'59 miles partially ballasted, being an increase of 30'35 miles in the former and 23'58 miles in the latter over last year.

The cost of changing the line between Sharpsville and Ferrona, amounting to \$5,000, has been charged to repairs, as well as \$3.352 for grading for double track between Buchanan and Meadville.

12,377 tons of ninety-pound steel rail, 3,001'5 tons of eighty-pound steel rail and 709 tons of seventy-four-pound steel, with the necessary frogs, switches, etc., have been put in the track. Cross ties to the number of 1,139,274 have been put in the track, being 41,919 in excess of the previous year.

Heavy renewals have been made to fences and road cross-

owing to the generally poor condition of the station and other buildings when the property was received by this Company, extensive repairs have been necessary. The passenger station at Paterson has been remodeled, and new passenger and freight stations have been built at Southfields, North Collins and Eden Centre. Extensive repairs were made to the station buildings at Hammond and Auburn Park.

Auburn Park.

Creameries have been erected at Turners and Big Island, and a new milk station at Malone, Ind. Two new ice houses have been erected at Hornellsville and one at Port Jervis. The ice house at Chicago has been enlarged. A new coaling station has been erected at Brockwayville and at Spencerville, Huntington and Chicago new water tanks, on steel foundations, were put up. New eighty-ton track scales have been put in at Chicago, and scale renewals have been made at Meadville, Youngstown and Galion. A new turn-table has been put in at Hornellsville, with the necessary pit and retaining wall

The Company's docks at Cleveland, Jersey City and Wee-hawken have had extensive repairs.

Heavy repairs have been made to the Company's telegraph by the com

graph line.

The following bridges have been replaced by iron or steel

structures:
2 highway bridges.
Bridge No. 19, Rochester Division.
Bridges Nos. 9 and 19, Allegany Division (the only two remaining wowden bridges on the main line).
Bridge 17, on the B. & S. W. R.R., and
Bridges 127 and 128, on the Chicago & Erie R.R.
Wooden Trestle at Youngstown.
30-foot bridge at Meadville, replacing a box onlvert that was washed out.

connection with the second track on the Greenwood Lake Division and cost charged to that Company's construction account, and 19,122 feet, or 3.7 miles, of private sidings. 265,233 feet, or 50.2 miles of drain tile have been put in during the year, making a total of 194 miles of tile drainage to date.

All of which were charged to Operating Francisco

All of which were charged to Operating Expenses, excepting the Greenwood Lake sidings, as above.

New stations were erected at Jamestown, N. Y., and Franklin, Penn., a part of the cost of which was charged to Construction.

Nine single-track iron bridges on the Greenwood Lake Division were replaced with double-track steel structures, and one double-track steel bridge was built over a street in connection with the double-track work, the cost of which was charged to Construction account.

The new station at Rutherford, referred to in last year's

report, has been completed. The Passenger Station at Passaic was remodeled and enlarged, new passenger and freight stations were erected at Willson Avenue, Cleveland, and new water tanks were put up at Midvale and Sterling Forest, the entire cost of which was charged to construction.

### MAINTENANCE OF EQUIPMENT.

The expenses chargeable to this account amounted to Five Million Three Hundred and Fifty-seven Thousand Six Hundred and Ten Dollars and Sixty-four cents (\$5,357,610 64),

Hundred and Ten Dollars and Sixty-four cents (\$5,357,610 64), or an increase of Nine Hundred and Seventy Thousand Two Hundred and Eighteen Dollars and Fifteen Cents (\$970,218 15) as compared with the previous year.

The large increase in this item of expense is due to the particularly heavy repairs and renewals that have been made during the year, including large expenditures for air-brakes and automatic couplers required by law. Both the locomotive and car equipment have been fully maintained and greatly improved. and greatly improved.

Twenty-one light passenger single locomotives wenty-one light passenger single locomotives were re-constructed into two and four-cylinder compounds with Wootten boilers, and two passenger engines were equipped with new and larger boilers. Twenty-seven freight engines have been completely rebuilt with larger boilers and cylinders.

cylinders.
Eleven new 4,500-gallon tenders were provided and twenty-five tender frames were enlarged, increasing the cisterns to a capacity of 4,000 gallons.
Tenders and freight cars were equipped with 6,956 M. C. B. couplers and 5,597 air-brakes, at a cost of \$526,286 50, all of which was charged to Operating Expenses. Of the total equipment 61·10 per cent of locom tives and 79·04 per cent of freight cars are equipped with M. C. B. couplers and 97·14 per cent of locomotives and 36·39 per cent of freight cars are equipped with air-brakes.

97-14 per cent of locomotives and 36-39 per cent of freight cars are equipped with air-brakes.

The entire locomotive equipment at the close of the fiscal year amounted to 979 engines, with an average age of twelve years and three months, of which 66-39 per cent was in good condition, 14-30 per cent fair and 4-60 per cent bad, with 14-71 per cent in shop or held for repairs, the larger portion of which consisted of light engines inherited by the Company from its predecessor.

The average mileage made by engines was 44-926 miles in

the Company from its predecessor.

The average mileage made by engines was 44,926 miles in passenger service and 38,995 miles in freight service. The greatest mileage was 83,596 miles in the pissenger service and 64,307 miles in the freight service. The passenger equipment has been fully maintained. Six hundred and sixty six passenger equipment cars were painted and varnished, and the heating system in 273 cars has been changed from hot water to live steam. Four emigrant cars were converted into dirst class coaches; one baggage ar was changed into a full postal car; one coach was gage-ear was changed into a full postal car; one coach was changed into a combined passenger and mail car, and one coach into a combined passenger, baggage and mail car. Five coaches were equipped with vestibules. Twelve coaches were equipped with Pintsch gas. One parlor smoking car for suburban service was purchased and charged to Operat-

Five hundred box cars have been purchased to replace condemned and destroyed freight equipment and charged to Operating Expenses. During the year two tool cars, nine caboose cars and 1,606 miscellaneous freight cars have been destroyed, the tonnage capacity of which, however, has destroyed, the tonnage capacity of which, however been made good.

been made good.

Close attention has been paid to the Fuel Consumption, and while the fuel account shows an decrease of only \$932-96, yet the total number of tons of coal consumed was 143,294 more than last year, or 9.04 per cent, due to increased tonnage; the total locomotive mileage increased 3.76 per cent and car mileage 11.30 per cent. The consumption of coal per one hundred tons per mile decreased 3.26 per cent; the cost per locomotive mile decreased 6.41 per cent and per car mile 11.76 per cent.

The accompanying statements show the total equipment

The accompanying statements show the total equipment the Company in detail.

Bridge 17, on the B. & S. W. R.R., and
Bridge 187 and 128, on the Chicago & Erie R.R.
Wooden Trestle at Youngstown.
30-foot bridge at Meadville, replacing a box onlvert that
was washed out.
Bridge 70, Susquehanna Division, replaced with a heavier
steel structure.
During the year 146,000 feet, or 27.7 miles, of Company's
sidings have been put in, 8.00 miles of which were built in

penditure was wise, and beneficial results have been and will continue to be obtained therefrom.

#### CONDUCTING TRANSPORTATION.

The expenses incurred under this head amounted to Fifteen Million, Eighty-five Thousand, Three Hundred and Twenty Dollars and Ninety-four Cents (\$15,085,320 94), being an increase of Seven Hundred and Ninety Thousand, Five Hundred and Two Dollars and Fifty four Cents (\$790,502 54).

Hundred and Two Dollars and Fifty four Cents (\$790,502 54). The ton mileage of the freight trattic increased 15-65 per cent, and the miles traveled by passengers increased 3-61 per cent, while the expenses of conducting transportation increased 5-53 per cent. This fully accounts for the additional expenditures charged to this account.

The Bergen Transfer has proved a valuable adjunct in handling freight at the Eastern Terminal and expediting its delivery, as well as in reducing the large amount of switching heretofore necessary at Jersey City. During the year this transfer saved 3,369 cars, reducing the number of cars passing through the tunnel by 7,938. The cost of handling this freight was reduced from 22-2 cents to 19-2 cents per ton. or freight was reduced from 22.2 cents to 19.2 cents per ton, or

13.51 per cent

Fourteen thousand, three hundred and nine cars were handled over the new float bridge at Weehawken.

The Chicago grain elevator, completed last year, has handled a business of 11,340 cars.

The Jersey City grain elevator handled 29,695 cars, an increase over the previous year of 9,627 cars—over 47 per

The Erie grain elevator at Buffalo has handled 13,282,766 bushels, being 22.57 per cent less than 1897. While the grain shipments handled through the Buffalo elevator decreased, the total grain shipments of the road increased 22 per

The tonnage handled over the Blake Dock at Buffalo was

488,863 tons of coal and 73,043 tons of salt, being an increase of 148,246 and 12,644 tons, respectively.

During the year 341,175 tons of ore were shipped over the Buffalo Dock, an increase of 182,830 tons, or 115.47 per

The tonnage handled at the New York terminal exceeded that of last year by 89,877 tons, the total tonnage being 3,263,545 tons.

During the year 26,692 cars of coal, containing 607,473 tons, were handled by the Cleveland unloader, an increase

tons, were handled by the Cleveland unloader, an increase in tonnage of 15·34 per cent.

The system of rating engines by the tonnage instead of by the number of cars has continued to give satisfactory results. The average per draft increased 44·9 tons, or 6·54 per cent; the average per car per draft increased 0·6 tons, or 2·61 per cent; while the cost of handling 100 tons per mile decreased 6·20 per cent. The average number of freight cars per draft increased 4·07 per cent, while the total cost per locomotive mile decreased from 21·82 to 21·71, or 0·50 per cert, and the cost per car mile decreased from 1·57 to 1·50, or 4·46 per cent. Good results have been obtained in the efforts to reduce the number of fast freight trains run during the year and the result shows a fair decrease without interfering with the proper despatch of the freight. The fast freight service is expensive and it is difficult to make much saving in this respect and at the same time meet competition.

While the Company has not been entirely free from accidents, yet it has closed the year without causing the death of a single passenger.

of a single passenger.

## GENERAL EXPENSES.

As compared with the previous year this account shows an increase of \$57,800 33. This is practically all in the item of insurance, due to less than the full year's insurance premium being charged last year on account of policies turned over by the Receivers and to the difference in the method of keeping the accounts referred to in previous reports.

The tax assessments levied against the Company for the fiscal year and paid amounted to \$877,920 77, or 2.60 per cent of the gross revenue, this exclusive of the tax paid on the increase of the Capital Stock.

## FLOATING EQUIPMENT.

The Company's floating equipment in the New York har-bor at the close of the fiscal year consisted of: 8 Ferry-boats, 3 Steam hoists, 29 Covered barges,

8 Ferry-boats, 11 Tugs,

23 Car floats, 3 Steam barges. 18 Open barges,

The ferry-boat "Erie" is being rebuilt.
The ferry-boat "Delaware" has rad her main decks on both ends raised.
One steem beautiful. One steam barge, the "Suffern," has been built and put in service to replace the "Susan," condemned the previous

Two new car floats with steel hulls were built and put in service durin; the year, and another float is now in course of construction to replace Float No. 10, condemned.

The cost per ton of lightering freight as compared with the preceding year shows a decrease of 7.8 mills, or 2.97 per cent.

The equipment has been well maintained and all renewals paid for out of Operating Expenses.

## CONSTRUCTION.

This account has been charged with the net sum of \$575,-128 89, being the cost of additions and betterments made

to the property during the fiscal year, and which consist chiefly as follows:

Completion of third and fourth tracks between Secaucus and Rutherford:

Elevation of tracks at Jersey City;

Elevation of tracks at Jersey Cary, Enlargement of yard at Bergen; Removing grade crossings at Buffalo; Right of way, etc., Penhorn Creek Railroad; Enlargement of piers 20 and 21, New York; Enlargement of freight house, Buffalo;

Enlargement of freight house, Buffalo;
Ore and fuel docks at Buffalo;
New passenger and freight stations (increased cost of new buildings over replacing old).

In addition to the above amount \$427,515 00 was expended in completing the second track on the Greenwood Lake Division. This sum was charged against the Special Construction Fund of the New York & Greenwood Lake Ry. Company produced by the sale of bonds in itstreasury when its property was leased by this Company. The total cost of this second track was \$663,698 62, and exceeded the amount of the fund by \$279,427 79, which amount, as you will note from the balance sheet, is charged against the Greenwood Lake Company and is a good property asset. ty asset.

erty asset.

From December 1st, 1895, the organization of your Company, to the end of this fiscal year, a period of two years and seven months, the sum of \$1,415,75168 has been charged to Construction or Capital Account for additions and improvements to your property exclusive of equipment stated below. A portion of this expenditure has been paid for out of Earnings, and the Company is entitled to bonds therefor under the Consolidated Mortgage as hereinafter shown in detail.

#### EQUIPMENT.

The following new equipment, costing \$1,531,455 06, has een purchased during the year and charged to Capital Account :

Account:

6 Milk cars,
1,000 Large box cars,
1,000 Large coal cars,
200 Refrigerator cars.
These cars were badly needed to take care of the Company's business, and while the equipment received from your predecessor has been completely maintained, yet a large part of it consists of small cars, undesirable for much of the traffic of to-day, and further expenditures for additional modern equipment will have to be made as the Company's financial condition justifies in order to keep abreast of its competitors in this respect.
The air-brakes and automatic couplers on old and renewed equipment required by the United States and State laws have been charged to Operating Expenses. During the year \$526,286 50 was expended for that purpose. The total of this expense from the beginning of the work to June 30, 1898, amounts to \$2,804,805 04.

UNION STEAMBOAT LINE AND UNION DRYIDOCK.

## UNION STEAMBOAT LINE AND UNION DRYSDOCK.

No change has been made during the year in the fleet of the Union Steamboat Line, which consists of the following

66

"New York," wood.......2,000 tons carrying capacity.
"Rochester," wood......2,400 " " " "
"Chemung," steel......2,550 " " " "
"Owego," steel......2,550 " " " " 4.6

44

This fleet has taken good care of the Company's Lake business and also enabled it to ship its own coal to the West

business and also enabled it to ship its own coal to the vesu upon favorable terms.

The Union Dry Dock has done a fair business during the year, upon which it has made a satisfactory profit. The concern is self-sustaining and a source of income to your Company, not only through its profits but in repairing the Union Steamboat fleet expeditiously and at a minimum coat.

## COAL COMPANIES

The operations of the Coal Companies for the twelve months ending June 30th, 1897, resulted in net earnings amounting to \$209,784 91, which sum has been included in the Company's income as shown.

The Coal business for the year ending June 30th, 1898, has not been very satisfactory, and it is doubtful whether the results will be as profitable as the previous year. However, the books have not yet been closed, and the year's business cannot, therefore, be definitely stated or included in the statements herewith.

## EQUIPMENT TRUSTS.

Of the equipment trusts assumed by your Company from the New York Lake Erie & Western Railroad Company,

Railroad Company out of a total issue of 180,000 shares each. A portion of the outstanding stock has come in since June 30th, and it is expected that the balance will be presented for exchange in due course. As you are aware, the control of these properties was provided for by an authorized increase of 130,000 shares of First Preferred and 130,000 shares of Common Stock of this Company, as stated heretofore.

A lease of the Susquehanna property was made to the Eric Company in February last, for one year, ending March 1, 1899, as approved at your special meeting in March, 1898, but the lessee operates the line separately from its own property. A report covering the results of the N. Y. S. & W. R. R. Co. for the year ending June 30, 1898, is now in course of preparation and will be duly published.

#### GENERAL REMARKS

Piers 20 and 21, at New York, have been extended 100 feet each and covered with fire proof sheds. This gives addi-tional pier room of nearly 2,000 squars feet, which is much needed. The bulkhead between these two piers has been covered by a two-story steel frame structure, fifty feet wide

tional pier room of nearly 21,000 square feet, which is much needed. The bulkhead between these two piers has been covered by a two-story steel frame structure, fifty feet wide and four hundred feet long, furnishing excellent facilities for the handling of out-bound package freight. The second story is used for offices and for an auction room for the sale of fruit—facilities that were greatly required.

The great need of additional tracks at the Jersey City passenger station and the heavy expense attending the maintenance of the iron train shed made the remodeling of the Jersey City terminal necessary. This has been done by taking down the train shed and erecting wooden sheds over each platform. Two additional tracks have been added, giving ten tracks instead of eight, and one additional platform, giving five platforms in the place of four.

In pursuance of the contract made with Jersey City, the work of elevating the Company's tracks has begun and is now well under way. It is expected that at least three of the seven tracks will be in place upon the new elevation and in use by the end of the calendar year.

The local freight yard and freight house South of Pavonia Avenue, Jersey City, the construction of which was made necessary by the elevation of the tracks, has been completed. The new coaling station, ash pits, turn-table and locomotive yard, in connection with this improvement, are also well advanced. It is expected that a material saving of labor will be made by these improvements.

Considerable property has been purchased for the right of way of the Pen Horn Creek R. R., but no work upon this improvement has yet been done.

The second track on the Greenwood Lake Division from

way of the Fen Horn Creek R. R., but no work upon this improvement has yet been done.

The second track on the Greenwood Lake Division from Meadow Junction to Caldwell Junction was put in operation in December last, and has greatly improved the ser-

vice on that road.

The third and fourth tracks on the main line between Secaucus and Rutherford Junction, which were put in use in September, 1897, have greatly benefited the service and caused much saving in the expense formerly arising from

elay of trains, etc. It is contemplated in the early future to reduce the grades at Mahwah and Goshen from an average of fifty-three at manwah and Goshen from an average of fifty-three feet per mile to twenty nine feet per mile, and a considerable portion of the necessary right of way for this work has been secured. To carry out the work at Goshen it has been necessary to organize a separate corporation, which has been done under the name of the Goshea Railread Company. When completed this work will effect a material saving in expense by avoiding the use of pusher engines and increasing the train loads.

The work of separating the grades of the streets and tracks at Buffalo has made good progress during the year.

The work of separating the grades of the streets and tracks at Buffalo has made good progress during the year, and the most important crossings have been completed.

The ore docks at Buffalo have been enlarged, increasing their capacity from 50,000 to 100,0 0 tons, and providing for the unleading of two years at the capacity from 50,000 to 100,0 0 tons, and providing for

the unloading of two vessels at the same time, instead of

An addition of four hundred and sixty feet is being made An addition of four hundred and sixty feet is being made to the Ganson Street Flour House and dock at Buffalo and will shortly be ready for use, giving an increased capacity of 75,000 square feet and dockage space for one more steamer, enabling the company to handle its Lake freight

of 75,000 square feet and dockage space for one more steamer, enabling the company to handle its Lake freight more expeditiously and economically.

The unsatisfactory feature of the year's work is the rate received for the service performed. From year to year the unit of revenue grows less, while the character of the service, forced by competition and the modern requirements of trade, grows more and more expensive. Apparently neither of these conditions can be improved under existing circumstances, legislative and otherwise, surrounding the transportation industry. The only remaining effort, therefore, that can be made to stop the dimunishing margin between Revenue and Cost is in the direction of reducing the latter. This necessarily requires heavy work, large expenditures and long time, and the results obtained appear slowly. To the efforts of the management towards the accomplishment of this object is due the large cost of operation for the year. Heavy expenditures, with which Capital Account could not legitimately be charged, were necessary upon locomotives, cars, tracks, etc., etc., in order to meet the requirements needed to enable the Company to do business on a parity with its compatitors. These requirements must be met, and while the cost is large and will con-

tinue so for the present, yet the ultimate result is certain to be beneficial and materially reduce the cost per unit of service. The results obtained in this direction for the year show as follows: The cost of handling a ton of freight one mile was reduced to 4 mills, a reduction of 6.54 per cent over 1897; the cost per freight train mile increased 1.49 per cent, but the tonnage handled increased 17.5 per cent; the ton miles increased 15.65 per cent; the train lead increased 8.64 per cent, and the car lead increased 1.65 per cent; the train load increased 8.64 per cent, and the car loads increased 6.46 cent.

The decrease from the previous year of 38-100th of a mill in the average freight rate per ton per mile, equaling only 714 cents per ton, resulted in a net loss of revenue of \$1,714,-933 23.

The large sum of \$381,450 52 was paid to the owners of private cars for mileage thereon, the loading of which was controlled by the shipper. Your Company has no remedy against this abuse, which has grown into the transportation

against this abuse, which has grown into the transportation system of the country.

The Board again calls attention to the very heavy burden imposed upon the company by taxation. Two and six-tenths per cent of the gross revenue, or the large sum of \$377,920,77, went to the tax gatherers. This forced contribution to the public funds is seriously felt and is out of all proportion to the Company's income.

It was deemed wise by the Board to strengthen the traffic relations of the Company with the Philadelphia & Reading System, and to this end a trackage contract was made with the Fall Brook Rulroad Company under the terms of which your Company has the use of that road for freight traffic between Corning, N. Y., and Williamsport, connecting at that point with the Philadelphia & Reading Road, upon advantageous terms, thus giving it a through line under its own control to and from the West to the Reading territory. This arrangement has been in operation for some months

rantageous terms, thus giving it a through line under its own control to and from the West to the Reading territory. This arrangement has been in operation for some months and is entirely satisfactory.

In order more efficiently to handle the Company's authracite coal traffic, the Beard considered it necessary that it should have direct access to its own coal collieries as well as those of its shippers, enabling it to transact business without an intermediary. A trackage contract upon satisfactory terms has therefore been made with the Eric & Wyoming Valley RR. Co. from Hawley, on the Honesdale Branch, to the Company's Mosic Mountain Road and several other points from which it draws coal tonnage. A glance at the map of the anthracite coal region and this Company's property therein will at once show the advantage of trackage rights over the above road, and your interests in that locality will, in the opinion of your Board, be materially advanced by this arrangement. The agreement was made late in the year, and these rights were not used during the fiscal year just ended.

The agreement between the Eric Railroad Company and the Delaware & Hudson Canal Company, under which the latter Company uses your tracks between Jefferson Junction, near Susquehanna, and Carbondale, has been renewed upon mutually satisfactory terms.

latter Company uses your tracks between Jefferson Junction, near Susquehanna, and Carbondale, has been renewed upon mutually satisfactory terms.

The lease of the Lockport Branch to the Buffalo & Lockport Railway Company, as approved at your special meeting held in July, 1898, has been executed, and the operation of the Branch by electricity was commenced in August. So far the result has been quite satisfactory and your Board will watch the further operation with much interest.

Heretofore your live stock traffic has been handled by auoutside Company under a contract. The general conditions

Heretofore your live stock traffic has been handled by an outside Company under a contract. The general conditions surrounding this class of traffic have materially changed in the last few years, and as a result the arrangement was not working satisfactorily, and the Board has considered that the Company's interests require that it should have a closer control over the business. A corporation known as Weehawken Stock Yard Company has been organized and the Eric live stock traffic is now handled by that Company, the entire capital stock of which is in your treasury.

The Wabash RR. Company having determined to secure an entrance into the City of Buffalo, negotiations were opened with the officials of this Company for the use of its tracks by that Road from the Bridges to Buffalo, including terminal facilities at the latter place. These negotiations have resulted in a satisfactory agreement, and the Wabash Company is now using this Company's tracks and terminals as above state d.

The operation of the New Jersey & New York Railroad

The operation of the New Jersey & New York Railroad Company (not included herein) has resulted in a profit for

the year.

The accompanying tables give the details of the Company's

operations for the year.

The general conditions surrounding the transportation in-The general conditions surrounding the transportation industry during the year have not been entirely satisfactory, yet the results obtained by the Company are encouraging and give some idea of the inherent strength of the property. The officers and employes have worked heartily and loyally, at times under discouraging circumstances, to promote the Company's interests and to protect and increase its revenues. To them belongs the credit for the showing made, and it gives the Board much pleasure to publicly acknowledge this obligation and to express its appreciation of their faithful work.

Respectfully submitted, by order of the Board,

E. B. THOMAS,

## THE ATCHISON TOPEKA & SANTA FE RAILWAY COMPANY.

THIRD ANNUAL REPORT-FOR THE FISCAL YEAR **ENDING JUNE 30, 1898.** 

OFFICE OF THE ATCHISON TOPEKA & SANTA FE RY. Co., No. 59 CEDAR STREET, NEW YORK CITY. SEPTEMBER 7, 1898.

To the Stockholders of the Atchis n Topeka & Santa Fe Railway Company:

Your Directors submit the following report for the fiscal year July 1, 1897, to June 30, 1898, inclusive:

The following lines now compose the Atchison system, the operations of which are set forth in the accompanying statement:

 Atchison Topeka & Santa Fe Railway
 4,\*64 73 miles.

 Gu f Colorado & Santa Fe Railway
 1,08 60 "

 Southern C. difornda Railway
 48 02 "

 Santa Fe Pacific Railroad
 805 8 ; "

Total...... 6 946-21 miles.

The following is a summary of the operations of the system for the fiscal year;

Total earnings from operation.  Total operating expenses.		21 12
Net earnings Receipts from other sources	\$10,707.761 182,027	12 17
Total revenue.  Taxes, ren als and other charges	\$10,889,791 2,007,218	
Balance applicable to fixed charges	8,882,573 4.9 )2.148	
Surplus for fiscal year		91
ing three per cent interest paid on Adjustment Bonds.		62
Total surplus to June 30, 1898	\$3,942,645	56

(For details see Income Account, page 644.)

Out of this surplus your Directors, pursuant to the provisions of the Company's Adjustment Mortgage, have de clared interest to be payable to the holders of Adjustment Mortgage Bonds at the maximum rate of four per cent; and the same will be paid accordingly on November 1, 1898, at the Company's office in the City of New York, upon presentation and surrender of Adjustment Mortgage coupons No. 2. This payment (\$2,053,840) will reduce the above surplus to \$1.888,805 56.

The following is a comparison between the Gross Farm-

The following is a comparison between the Gross Earnings, Operating Expenses and Net Earnings for the years ending June 30, 1897, and June 30, 1898; the figures stated for both years cover the mileage operated since July 1, 1897; figures for the former year furnished by the Receiver of the Atlantic & Pacific are incorporated for purposes of comparison: comparison:

## FINANCIAL TRANSACTION 3.

The accompanying Comparative General Balance Sheet shows the financial condition of the Company June 30, 1898, in comparison with its condition June 30, 1897. Statements are annexed showing details.

Arrangements have been made for the retirement of the Guarantee Fund Notes of the Atchison Topeka & Santa Fe

Railroad Company falling due November 1, 1898 (of which the amount outstanding at the beginning of the fiscal year was \$8,605,000), through the employment of General Mortgage Bonds reserved for this purpose. The amount of Guarantee Fund Notes which had been exchanged under this arrangement on June 30, 1898, was \$5,655.00). The remainder will be retired prior to November 1 next, or will be paid in cash on that date. By this transaction annual interest charges will be reduced approxima'ely, \$112,220. When competed no securities will exist prior in lien to the General Mortgage except Chicago & St. Louis Divisional Bonds, \$1,500,000, falling due in 1915. Sundry Miscellaneous Divisional Bonds aggregating \$693,210, and Equipment Bonds, \$1,000, 00. The Equipment Bonds are being paid off at the rate of \$250,0 0 per year, and the New York Security & Trust Company, Trustee, holds cash and securities applicable thereto in the amount of \$307,669 86.

Various lands and other assets of the Atchison Topeka & Santa Fe Railroad Company, full title to which was not acquired under the foreclosure of the General Mortgage of that Company, have been sold pursuant to orders of the Court and were nursheed by this Company at a rete of the

acquired under the foreclosure of the General Mortgage of that Company, have been sold pursuant to orders of the Court, and were purchased by this Company at a net cost to date of \$101,088 56. This purchase includes salable property of value equal to the cost.

The securities on hand June 30, 1898, are conservatively estimated as worth \$2,423,356 64, all being free Treasury assets except \$135,000 General Mortgage Bonds. There was also on hand cash to the amount of \$2,587,743 98. On that date, in addition thereto the Company was entitled to issue and sell new General Mortgage Bonds to reimburse itself for expenditures previously made on Capital Account to the amount of \$4,435.667.

Since July 1, 1898, the sale of such General Mortgage Bonds, to the amount of \$3,500,000, has been accomplished and other adjustments made, leaving the condition of the treasury on July 31, 1898, as follows:

Cash on hand \$5.543.147.79 Securities on hand 2,700,732.56

This Company is still entitled to draw bonds for Capital Expenditures prior to June 30, 1893, to the amount of \$336,309 01, in addition to said securities and cash on hand July 31, 1898.

July 31, 1898.
Including the bonds embraced in the sale above mentioned, made since July 1, 1898, bonds to the amount of \$3,622,631 85 have been certified since the organization of the company from the \$3,000,000 per annum of bonds which the Company is authorized to issue and sell for improvements. The remaining bonds which have been sold were issued for other purposes for which bonds were specially reserved in the General Mortgage.

Ne General Mortgage Bonds were issued during the fiscal year covered by this report except those issued in exchange for Guarantee Fund Notes (see General Balance Sheet, Exhibit C).

Exhibit C)

Exhibit C).

The cost of property has been charged with discount on bonds sold from time to time under the provisions of the General Mortgage, amounting in the aggregate to \$1,856,354 86, as detailed in this and previous Annual Reports. It has been decided to charge this discount to income in equal annual instalments extending over the life of the bonds; at the maturity of the bonds the discounts will thus be entirely written off. The amount charged this year in accordance with the above policy is \$26,599 13.

No notes or bills payable have been issued by this Company or its auxiliaries.

The liabilities shown upon the balance sheet embrace all known obligations for which this Company and the auxiliary companies of the Atchison System are responsible.

The amount to the credit of Rolling Stock Replacement Fund July 1, 1897, was \$513,291 98 Monthly charges have been made to Operating Expenses and credited to this fund in respect to all equipment removed from service during the year, in amounts equal to the present cost of corresponding

in respect to all equipment removed from service during the year, in amounts equal to the present cost of corresponding new equipment. These credits aggregated the sum of \$564,662 03, making the total fund available during the year for the acquisition of new equipment \$1,077,954 01. The amount expended during the year from this tund was \$79.952 03, leaving \$198 001 98 carried forward to the next fiscal year, and now in process of expenditure. In arriving at this result 19 engines were destroyed or sold during the year, and were replaced by 23 engines of heavier type, of which 13 were bought of outside makers, and the remainder were built at the Company's shops in Topeka; 253 refrigerator cars and 150 stock cars were purchased; seven postal and baggage cars and 520 freight cars of various classes have been constructed at the Company's shops; making 930 new cars ac-

cars and 520 freight cars of various classes have been constructed at the Company's shops; making 930 new cars acquired, against a total of 556 cars withdrawn from service during the fiscal year.

The Rail Renewal Fund is chiefly represented by new steel purchased, paid for, charged to operations and distributed along the line; which not having been actually placed in the track on June 30, 1898, was temporarily carried on that date as Material on Hand.

The Traffic Balances stated this year are the total amounts due from and to connecting lines; net balances only were stated last year. Other increases in accounts payable are attributable to real estate acquired and taken up in cost of property, payment for which was not made until after June 30, and to the increased mileage operated since the acquisition of the Santa Fe Pacitic road.

The taxes paid by the System lines aggregate the sum of \$1,420,123 05, being 3.60 per cent of the total receipts from all sources and 13.04 per cent of the total net revenue. In other respects the General Balance Sheet will be understood without special explanation. The certificate of the Independent Auditors is annexed thereto.

#### FIXED CHARGES.

The annual fixed interest charges payable upon bonds out-anding July 1, 1898, excluding treasury assets, are as

Guarantee Fund Notes	\$2,950,000	6%	\$177,000 00
C. & St. L. Ry. Co. First Mortgage	1,500,000	6%	90,000 00

#### SANTA FE PACIFIC RAILROAD.

This property was taken over from the Receiver of the Western Division of the Atlantic & Pacific Railroad on July 1, 1897 (see last report.) The present report covers the first year of its operation by the Santa Fe Pacific Railroad Company, which was organized for the purpose of operating this road, all its stock and bonds being subjected to the lien of the General Mortgage of The Atchison Topeka & Santa Fe Railway Company. The line as operated extends from Albuquerque to Mojave, 818-55 miles, including 2406 miles (Needles to Mojave) permanently leased from the Southern Pacific Railroad Company of California.

The lease of the Mojave Division in exchange for Mexican and Arizona lines (referred to on page 11 of the last Annual Report) has been executed by the parties in interest, and the transaction has been approved by the Mexican Government. This property was taken over from the Receiver of the

Government.

Government.

When the Atlantic & Pacific purchase was made the physical condition of the property was not up to the Atchison standard, and it was fully realized that large expenditures would be necessary in order to rehabilitate it. Passing for the most part through an arid country, with inferior coal and with scarce and bad water supply, it has always been difficult to operate this line with reasonable economy. During the past year much attention has been given to its improvement and necessary betterments have been actively pressed which will be substantially completed. been actively pressed which will be substantially completed during the fall of 1898.

These improvements, among other things, include new rail upon the entire line except short sections which were

These improvements, among other things, include new rail upon the entire line except short sections which were relaid during the Receivership; also considerable widening of banks and quite a large amount of ballasting and steel bridge work (see page 30 of pamphlet report for expenditures charged to Construction Account). Much of the cost of these betterments has been charged to current operating expenses and is embraced in the statement of operating expenses on pages 28 and 29 of pamphlet report.

Three large dams have been built for the purpose of impounding mountain water. These dams are located, respectively, two, four and eleven miles from the road, and connected with it by direct pipe lines. The water thus obtained will not only be of good quality, but will do away with a considerable part of the large expense incident to hauling water long distances on trains.

The only timber on this line is mountain pine, which, when cut into ties only lasts about five years. A plant for the chemical treatment of this timber has been erected at Bellemont, Arizona. The experience gained at Las Vegas, New Mexico, where The Atchison Topeka & Santa Fe has been treating mountain pine for twelve years, warrants the belief that the introduction of this process on the Santa Fe Pacific will more than double the life of the wood.

Peach Springs and Williams have been abolished as division points, and a new division point has been established at Seligman.

The Randsburg Railway, twenty seven miles long, from Kramer, California, north to the mining camp of Johannesburg, has been built by Eastern parties not connected with this Company. The same interests have built a smelter at Barstow, California, and a considerable addition to the ore traffic of the Santa Fe Pacific is expected to arise therefrom. Another branch line is under construction by outside interests from Daggett, California, to the borax mines some twelve miles north.

The Territory of Arizona has granted a charter to the Santa Fe & Grand Cañon Railway, which proposes t

Traffic interchanged at Ash Fork with the Santa Fe Prescott & Phœnix Ry. Co. has continued to increase, and the earnings therefrom constitute a material part of the revenue of the Atchison System. For the purpose of aiding the Santa Fe Prescott & Phœnix Railway in the construction of a branch twenty-five miles long, from a point near Prescott, Arizona, to the Big Bug mining district, your Directors have agreed to accept the bonds of said branch railroad, guaranteed by the Santa Fe Prescott & Phœnix, in payment for second-hand rails furnished and for freight on material, the estimated amount of both items being about \$60,000.

The gross earnings of the Santa Fe Pacific have been con-

The gross earnings of the Santa Fe Pacific have been considerably larger than were ever before obtained from this property; the enormous expenses involved in its reconstruction have necessarily reduced the net returns. With the completion of the improvement work, operating expenses will be reduced to a reasonable basis, and your Directors regard the purchase of this property as having been advantageous. IMPROVEMENT OF THE PROPERTY.

IMPROVEMENT OF THE PROPERTY.

The large increase in gross earnings of the Atchison System is chiefly due to bountiful crops in Texas, Kansas and California, to the development of mining interests and to the general improvement in business conditions throughout the West. The wheat crop of Kansas, the cotton crop of Texas and the fruit crop of California were all larger than for several years past, and the last was larger than ever before. It has seemed wise to your Directors to take advantage of this year of large gross income to prepare for the possibility of less favorable conditions in the future by continuing the work of putting the property in condition to be operated with the maximum of economy. It will be noticed that the large expenditure made has been chiefly for betterments under the accounts, "Maintenance of Road and Structures" and "Maintenance of Equipment." It will doubtless be found desirable to continue the replacement of wooden bridges with permanent work, but in other respects the extraordinary betterment expenses paid out of earnings may be expected to largely decline after the present calendar year Permanent work during the fiscal year has included the follo ving items: dar year Permanent work during the fiscal year cluded the following items:

489 miles of track ballasted, new and renewed

531 miles new steel laid, including rails re-rolled, 236 miles second-hand steel laid.

236 miles second-hand steel laid.

11¼ miles wooden bridges and trestles dispensed with or replaced with permanent work.

A new machine shop and a new roundhouse at Newton, Kansas, have been completed; a similar plant at Cleburne, Texas, is in progress; large additions to the shops at Albuquerque have been completed, besides additions made to shops and roundhouses at Topeka, Fort Madison and elsewhere. The work of reducing grades on the Texas lines between Fort Worth and Cleburne has been finished; similar work is in active progress between Cleburne and Temple.

A large amount of work has been done in widening cuts and banks and in raising track in low places to prevent

A large amount of work has been done in widening cuts and banks and in raising track in low places to prevent damage from overflow.

A new depot hotel and eating house has been completed at Dodge City. Kansas; also new depots at Hutchinson and Winfield, Kansas; an eating house and hotel at Temple, Texas; new passenger and freight depots at Dallas, Texas; and various smaller depots at minor points. A new depot hotel is under construction at Las Vegas, New Mexico. Nearly every building on the right of way between Chicago and El Paso on the Atchison Topeka & Santa Fe Railway all buildings on the Southern California Railway and a large number of buildings on the Gulf Colorado & Santa Fe Railway have been painted.

Block signals have been installed between Holliday and Newton, via Topeka, and between Holliday and Emporia, via Ottawa; and block signals are in process of erection between Chicago and Kansas City.

During the year a modern transfer elevator has been built at Winfield, Kansas, to replace one which was destroyed by fire in March, 1896. Under the terms of a contract made in 1888, the Atchison Topeka & Santa Fe Railroad Company in Chicago has taken over the property of the Santa Fe Elevator & Dock Company, consisting of an elevator and appurtenances located on the south branch of the Chicago River, at the price stipulated in said contract, and the elevator has been leased for a reasonable interest upon its cost.

The capacity of 920 cars has been raised from 40,000 lbs.

tenances located on the south branch of the Unicago River, at the price stipulated in said contract, and the elevator has been leased for a reasonable interest upon its cost.

The capacity of 920 cars has been raised from 40,000 lbs. to 60,000 lbs., and of 546 from 30,000 lbs. to 50 000 lbs. Automatic couplers have been applied to 7,300 freight cars, making a total of 16,207 cars now equipped. Air brakes have been applied to 1,547 freight cars, making a total of 26,246 so equipped; driver brakes have been applied to 114 engines, making a total of 1,034 so equipped.

The work of double-tracking the line between Emporia and Florence has been continued, 24 miles of second track having been added at an expense of \$184,927 63. It is expected to finish this construction next year.

A new method of car accounting between System lines has been adopted; no mileage is now charged on freight cars interchanged and freight car repairs are distributed on a wheelage basis. This accounts for the increase in the latter item on the Gulf Colorado & Santa Fe and Southern California, which is offset by decreased car mileage on those lines.

#### EXTENSIONS.

The return of prosperous conditions throughout the country at large has revived many railway projects which, if carried through, would be in some instances competitors and in other instances connections and feeders of the Atchison System. Some of these projects have present merit, but most of them are in advance of any real demand, and if built would have a hard struggle for some years, even though ultimately profitable. Your Directors have not felt that it was necessary or desirable at present to assume largely-increased obligations, and with few exceptions have declined to render assistance to the construction of roads which in time might possibly become of considerable value as auxiliaries. It is, of course, true that the policy of inaction in such matters may have to be modified in order to protect your existing property. During the year a few projects of this character have received the sanction of the Board, as follows:

protect your existing property. During the year a new projects of this character have received the sanction of the Board, as follows:

The Pecos Valley & Northeastern Railway is now being built from Amarillo, Texas, to Roswell. New Mexico, approximately 200 miles. Amarillo is distant 31 miles from Panhandle, the former terminus of your Panhandle branch; and in order to connect with the Pecos Valley & Northeastern road your Directors have arranged to buy a branch of the Fort Worth & Denver City Railway from Panhandle to Washburn, 14.72 miles, and to acquire trackage rights from Washburn to Amarillo. The road under construction from Amarillo to Roswell will connect at the latter point with the Pecos Valley road now in operation from Roswell to Pecos, 168 miles, making a total mileage of 368 miles from Amarillo to Pecos. Your Directors have made a traffic contract for the exchange of business with the new line, and have subscribed the sum of \$750,000 to a loan, repayable in 1899, secured by a pledge of bonds and stock of the consolidated Pecos Valley & Northeastern Railway Company, upon terms which in the opinion of the Board render the transaction eminently safe. When completed the road will pass through the great cattle-breeding territory of Northeastern Texas and Eastern New Mexico, as well as the rich agricultural valley of the Pecos River, and should add largely to the business of the Atchison System.

Arrangements have been made with the California &

son System.

Arrangements have been made with the California & Oriental Steamship Company for the establishment at an early date of a steamship line with regular sailings between San Diego and Asiatic ports, via Honolula and Yokohama. It seems reasonable to expect a steady and perhaps a large growth in Trans Pacific trade, in which this Company should share.

In the month of April, 1897, your Directors leased the Silver City & Northern Railway, extending from Whitewater, New Mexico, to San José, New Mexico, a distance of fifteen miles, for \$3,040 per year, with option to purchase at \$60,000. Copper and iron developments at Santa Rita seemed to make an extension of our line to that point clearly desirable. The directors have therefore expended to date the sum of \$56,000 n the purchase of the Silver City & Northern Railway, which is now be ng extended four and one-half miles to the Santa Rita iron mines, from which considerable shipments of ore are made to smelters at Pueblo, El Paso and Denver.

#### COAL PROPERTIES.

The plan adopted in 1896 and explained in the last annual report, under which the coal properties of the Atchison System are leased, has proved satisfactory in its workings. All mines except those at Cerrillos are leased to outside parties.

The comparative net earnings of the various coal companies are as follows:

The above statement shows a material increase in net earnings for the year just closed, and the present outlook is good for further increases during the coming year.

The mines and properties, whether leased or operated by ourselves, are in good condition, and the workings have been carefully examined by disinterested parties. Comparatively little will be needed in the way of construction work during the ensuing year.

work during the ensuing year.

The A. T. & S. F. Company now owns all outstanding bonds of both the Cerrillos and Trinidad Companies. The other coal companies have no bonded debt and no obliga-tions to other parties.

tions to other parties.

There were used by engines on the A. T. & S. F. proper 1,038,943 tons of coal bought at an average cost of \$1.208 per ton, against 942,642 tons the year previous at an average cost of \$1.23. The average price of coal was somewhat enhanced by a sympathetic strike in the Illinois fields, lasting two months.

The increase of coal used on locomotives was about 10 per contractions of the total number of tons carried one mile in

cent, while the total number of tons carried one mile in freight trains increased about 20 per cent. Thanks are due to officers and employes for the faithful and zealous performance of their duties.

E. P. RIPLEY, President.

Seneca, Mo.,	66	Sapulps, Indian Territory	112:03

Total main track mileage,... An increase of 120.08 miles as compared with mileage of previous year.

This increase in mileage is due to the completion of an extension of the St. Paul Branch from St. Paul to Pottigrew, Arkansas, a distance of 8 93 miles, and the acquisition of the Arlantic & Pacific Central Division, 112.05 miles. The the Arlantic & Pacific Central Division, 112:05 miles. The funds for the completion of the St. Paul extension were furnished by the Reorganization Committee. The Atlantic & Pacific Central Division, extending from Seneca, on the State line of Missouri, to Sapulpa. Indian Territory, was purchased by this Company at the foreclosure sale thereof, and since January 1, 1898, when this Company took possession, has been operated as the Southwestern Division. The aggregate cost of the property, including all expenses of purchase, was \$1,849,398 19, and for \$1,500,000 of this the

Company issued its Southwestern Division 5 per cent gold bonds, secured by purchase money mortgage upon property, and the residue, \$349,368 19, was paid in cash. FUNDED DEBT.

There was an increase in the funded debt of the company during the year of \$1,891,250, consisting of \$1,500,000 Southwestern Division 5 per cent gold bonds and \$331,250 4 per cent Consolidated Mortgage Bonds: \$300,000 of the latter were issued against the cash payment on account of the purchase price of the Southwestern Division and \$91,250 were issued in accordance with the provisions of the consolidated mortgage against \$73,000 underlying 6 per cent bonds, which had been redeemed and canceled through the operation of sinking funds. The following bonds were so operation of sinking funds. The following bon is were so redeemed:

sucemea: \$45,000 Second Mortgage, 6 per cent, "B" Bonds. \$5,000 Missouri & Western Division, First Mortgage, 6 per cent Bonds.

\$9,000 Trust Mortgage of 1880, 6 per cent Bonds. \$11,000 Fort Smith & Van Baren Bridge First Mortgage,

\$11,000 Fort Smith & Van Buren Bridge First Mortgage, 6 per cent Bonds.
These changes make a net increase in the bonded indebtedness of the Company during the year of \$1,818,250, of which, however, only the \$1,500,000 Southwestern Division Bonds have been disposed of. Since the organization of this Company on July 1, 1896, no 4 per cent Consolidated Bonds have been sold, all those issued being held in the Treasury.

PROPERTY ACCOUNT.

The increase in property account for the year was \$2,815,-88 92. The details of this amount are given in table F in pamphlet report.

#### THE KANSAS CITY EXTENSION

During the past year this Company has made a traffic and operating contract with the Kansas City Osceola & Southern Railway Company, under which the line of that Company has been extended about forty miles from its present terminus at Osceola, Missouri, to Bolivar, the terminus of

the Bolivar Branch of this Company, thus giving this Company an entrance into Kansas City, and the short line between Kansas City and Springfield, Missouri. The operation of the line will be under the control of this Company on agreed divisions of rates. The only financial obligation assumed by this Company is a guaranty that the minimum net earnings of the Osceola Line will be at least \$24,000 a year during the term of the contract. Under the traffic contract this Company has an option to purchase the Osceola Line, which, when completed, will be about 150 miles in length, at any time prior to September 1st, 1899, for \$1,600, 000, and at any time without four years thereafter for \$2,000,000, the purchase price to be payable in 5 per cent divisional mortgage bonds, either of this Company or guaranteed by this Company.

#### THE OKLAHOMA EXTENSION.

THE OKLAHOMA EXTENSION.

A contract has also been made between this Company and the St. Louis & Oklahoma City Railroad Company (which has been organized by a group of St. Louis capitalists), under which the latter company is now constructing a line of railroad from Sapulpa, the present terminus of the Southwestern Division of this Company, to Oklahoma City, a distance of about 103 miles. Upon completion of the construction, the line will be operated by the St. Louis & San Francisco Railroad Company, under a traffic contract, under the terms of which this Company is to operate the line for 60 per cent of the gross receipts of the line upon agreed divisions of rates. This Company will also acquire, for \$200,000 cash, on completion of the line, the entire capital stock of the St. Louis & Oklahoma City Railroad Company, but does not guarantee or assume any financial obligations with respect to the bond issue of that company. The country through which the new road is to pass is an exceedingly fertile one and the line is expected to be a valuable feeder. It will also make our Southwestern Division part of a through line to Oklahoma City. It is expected that the new line will be ready for operation about November 1st, 1898.

Comparative statement of General Income Account for

Mr. Stephen Little has examined the accounts of the Company, and his certificate is herewith submitted:

St. Louis, Mo., August 26th, 1898.

D. B. ROBINSON, Esq.,

President St. Louis & San Francisco R. R. Co., St. Louis, Mr. DEAR SIR—Complying with your request, I beg to report that I visited this City, and in the Audit Office of your Company here, examined and verified:

The General Profit and Loss Account of your Company at June 30th, 1897 and June 30th, 1898, respectively. II.

The Earnings and Operating Expenses and Income Account of your Company for the year ended June 30th, 1898.
III.

Its General Balance Sheet at June 30th, 1898.

I therefore certify that the elements constituting such Accounts and Balance Sheet are fully and fairly set forth, and reflect, truthfully, the transactions of the year under review, and the financial condition of the Company at the and thereof.

My thanks are due to your General Auditor, who rendered me every courtesy and facility necessary to my examination.

Yours very truly,

STEPHEN LITTLE.

EQUIPMENT.

Our equipment has been increased during the past year by

52 Ballast and Plow cars, 100 Furniture cars, 100 Fruit cars, 200 Coal cars, 200 Coal cars, 200 Engines, 1 Baggage and Express car, 107 Stock cars, 207 Engines, 27 Box cars, 27 Box cars, 27 Box cars, 28 Engines, 29 Engines, 29 Engines, 20 Engines

10 Engines, 1 Baggage and Express car, 107 Stock cars,

3 Cabooses.

20 Flat cars.

acquired in connection with the purchase of the Atlantic & Pacific Central Division, the value of which is \$65,146.

Our equipment has been fully maintained, both as to numbers and condition, and all the renewals of equipment have been charged to Operating Expenses.

The balance of the New Equipment and Improvement Fund furnished by the Reorganization Committee amounted at the beginning of the fiscal year to \$507,553 93, to which was added the interest accretion during the year of \$5.7.85 49, making an aggregate of \$507,339 42. This fund has been exhausted by expenditures on account of improvements and new equipment, and in addition \$19.873 35 was charged to Property Account. Expenditures for additional equipment and for improvements will hereafter be made by the use of consolidated mortgage bonds, which, under the Consolidated Mortgage, have been reserved for this purpose, at the rate of not exceeding \$300,000 per annum, and which were available after July 1, 1897.

The Company has now in its treasury, among its current assets, \$415,100 Consolidated Mortgage Bonds, \$391,250 of which were acquired during the current year.

PHYSICAL CONDITION AND IMPROVEMENTS.

#### PHYSICAL CONDITION AND IMPROVEMENTS.

The physical condition of the property has been well maintained, and material improvements have been made in the construction of additional side-tracks and spur-tracks to the construction of additional side-tracks and spur-tracks to commercial industries. About four miles of side tracks and spurs, long since abandoned, have been taken up, the cost of which has been charged to Operating Expenses, to which have further been charged 47.7 miles of 70 pound steel rails. No rail renewals have been charged to capital. In Operating Expenses have also been included the cost of 107 miles of new ditching; two new iron bridges, with the masonry for the property for the prop same; the masonry for four bridges on the Texas Division to replace wooden supports, and a heavy renewal of our to replace wooden supports, and a heavy renewal of our small wooden bridges. About \$20,000 has been spent lining Boston Mountain tunnel with brick, 25 per cent of which has been charged to Operating Expenses. A new depot has been built at Fayetteville, Arkansas, which, with additional depot grounds, have cost about \$7,000, \$4,000 of which has been charged to Operating Expenses.

Among the improvements charged to Improvement Account the following very materially better the condition of the property:

the property:
Seventy-three miles of rock and gravel ballast, 20 per cent of the cost of which has been charged to Operating Expenses. Ten miles of new fencing.

New eating house at Rogers Station. Turn-table at Carthage.

Track scales at Winfield.

Addition to Phelps Avenue Station, at Springfield.
Addition to depot at Tulsa, Indian Territory.
Fourteen miles of new sidings and spurs to industries located at various points on the line of road.
New freight house at Fort Smith, Arkansas.

New depot at Logan. New depot at Grants'.

#### COMPARATIVE BUSINESS AND EARNINGS.

Our gross earnings from operations increased \$993,131 60 during the year, of which \$644,664 45 was in freight traffic, and \$248,467 15 in passenger, mail, express and miscellaneous. The total number of tons of commercial freight carried increased 427,173 tons, or 20:35 per cent.

The tons carried one mile increased 82,583,434 ton miles,

or 20.49 per cent.

895,379 05

or 20°49 per cent.

The average distance carried was 192°24 miles, against 192° miles for previous year, an increase of °24 of a mile.

The rate per ton was \$2°0276, against \$2°1331 the previous year, or a decrease of 10 55 cents per ton carried.

The rate per ton mile was 1°055 cents, against 1°111 the previous year, or a decrease per ton mile of °056 of a cent. This decrease is due to the unfortunate Texas rate situation which existed during the greateners of the year.

This decrease is due to the unfortunate Texas rate situation which existed during the greater part of the year, and covered not only St. Louis and adjacent territory but extended to the Eastern Seaboard.

There was an increase in the average load per freight car of '66 of a ton, and an increase in the average loaded freight train of 10.56 tons; this made an increase in the average earnings per freight car of 1.4 mills and per freight train of 4.55 cents.

Our earnings from passenger traffic increased \$221,888 27, or, including mail and express, 242,335 14.

The total number of passengers carried increased 376,727,

or 38 per cent.

or 3s per cent.

The number of passengers carriel one mile increased 13.581,240, or 31 per cent.

The decrease in the distance each passenger was carried—41.72 miles in 1898, as against 42.88 for previous year—is largely accounted for by the increase in our suburban and inter-urban travel, and this also accounts for the decrease average reve 036 last year. revenue per passenger, 91.31 cents, as against

\$1.036 last year.
Our earnings on local passenger traffic increased 11 per cent and on through passenger traffic 32½ per cent.
While the passenger train mileage shows an increase of almost 200 000 miles, the average earnings per train mile increased from 86½ to 90½ cents.
The average number of cars per train was the same as in the previous year—5. The average number of passengers per coach and sleeper increased 1.

United States Rubber Co.—Purchase of Boston Company Pending.—A Boston paper says:

Fending.—A Beston paper says:

"The delay in the announcement of the purchase of the Boston Rubber Shoe Co. is not taken as an indication that the sale is off, for it is understood that the United States Rubber people have made a deposit of cash and securities to the value of \$1,000,000 as evidence of good faith. It is trade gossip that the purchase price of \$10,000,000 (it is slightly in excess of this amount) does not include bills receivable, but any the plant and good will. Figuring that the plant is worth \$2,500,000 and the supplies of raw material and manufactured product \$1,500,000, fair estimates, this would leave the selling price of the trade mark at \*6 000,000. The Boston Rubber Shoe Co. does quite a banking business in connection with the sale of rubber boots and shoes, and is at times a large loaner of money."—V. 67, p. 27c.

Wheelier (W. V.) P. W. W. S. Stock and Ronda. The

Wheeling (W. Va.) Ry.—New Stock and Bonds.—The stockholders will vote Oct. 1 on the question of increasing the capital stock and issuing bonds to improve and extend the lines. Control of the Bellaire Bridgeport & Martin's Ferry Street Ry. of Bridgeport, O., and the Moundsville Benwood & Wheeling Ry., it is reported, has been or may be acquired.—V. 63, p. 279.

Wisconsin Central.—Litigation.—A corrected statement of the prayer of the joint improvement committee as to the first and second mortgage bonds of the Wisconsin Central RR., is as follows:

"That it may be adjudged and decreed that the Wisconsin Central BB. Co.'s first and series bonds owned and held by the Wisconsin

Central Company, registered in the name of its agents and trustees, Colby, Abbot and Hoyt, and aggregating \$2,205,500 first series bonds and \$5,685,758 04 second series bonds, so far as the improvement bonds mentioned in schedui. "A" hereto annexed are concerned, are to be treated as retired, and that said improvement bonds are superior in equity and entitled to priority of payment over said first and second series bonds above mentioned," etc.

The petition does not, of course, include the small amount of the loans held by the public, but only that part retired and held alive. -V. 67, p. 540.

—Attention is called to the advertisement in our Municipal Department offering Moscow, Idaho. 6 per cent school bonds.

—The statement of the Fourth Street National Bank of

-The statement of the Fourth Street National Bank of Philadelphia on Sept. 30 will be found in our advertising columns.

—The Produce Exchange Trust Co. and Farson, Leach & Co., of New York, offer to investors a limited amount of New York City 8½ per cent gold bonds in either registered or coupon form. The bonds are non-taxable and are by law authorized as a legal investment for trust and savings funds. A circular giving full description of the bonds will be muled on application by the parties offering the sale.

# The Commercial Times.

#### COMMERCIAL EPITOME.

FRIDAY NIGHT, Sept. 23, 1898.

FRIDAY NIGHT, Sept. 23, 1898.

Reports generally have been of fairly satisfactory conditions existing in mercantile circles. Business in most lines of merchandise has been well up to an average for the season and comparatively few complaints have been made over the prices realized. There has been an active export demand from Europe for breadstuffs, particularly wheat, and it has given an upward tendency to values. The movement of the cotton crop has become quite free, and under the pressure of the actual cotton prices have declined to the lowest point reached in the history of the trade. Pig iron has sold with considerable freedom and has brought firm prices. The hardware trade has been steadily expanding and in some instances a hardening of prices has occurred. At the close of the week conflicting reports relative to the abdication of he Chinese Emperor in favor of the Dowager Empress received considerable attention. New Orleans was rep rted quarantined against, in the South, owing to the appearance there of yellow fever.

Lard on the spot has had only a moderate sale as neither Lard on the spot has had only a moderate sale as neither exporters nor refiners have been extensive buyers; offerings have been fairly free and prices have weakened slightly. The close, however, was steadier at 5 203, for prime Western and 4 90c, for prime City. Refined lard has met with only a limited demand and prices have weakened slightly. The close, however, was steady at 5 403, for refined for the Continent. Speculation in lard for future delivery has been moderately active. Early in the week prices were lower under selling by packers and the yellow fever reports. Subsequently, however, in sympathy with the advance in grain the market turned firmer and the close was higher.

DAILY CLOSING PRICES OF LARD PUTURES.

September delivery....e. 5-10 5-02 5-05 5-05 5-07 5-15

Pork has been in moderate demand, but at slightly easier prices, closing at \$8 871/2@\$9 25 for mess. \$11 50@\$12 for family.and \$11@\$13 for short clear. Cut meats have had a fair sale, particularly in the Western market; prices have been easier for belies, closing at 5%@6%c. for pickled bellies, 14 to 10 lbs. average; 4%@4%c. for pickled shoulders and 7%@7%c. for pickled hams. Beef has had a fair sale and at steaty prices, closing at \$8 50@\$9 for mess. \$9 for packet, \$10 50 for family and \$44@\$15 for extra India mess. Beef hams have advanced to \$19@\$19 50. Tallow had only a limitet sale but the price has held steady at 3%c. Oleo stearine has been quiet and unchanged at 5c. Lard stearine has been quiet at 6c. for prime City. Cotton seed oil has had only a limited sale, but values have held about steady at 22@23c. for prime yellow. Butter has had a fair sale and prices nave advanced to 15@21c. for creamery. Cheese has been in fair demand and higher, closing at 7@81/2c. for State fac ory. full cream. Fresh eggs have been in fair demand and prices have advanced slightly, closing at 17c. for choice Western.

Brazil grades of coffee sold slowly early in the week. Subsequently, however, in response to stronger advices from primal points, the market turned firmer and demand improved. The close was steady at 64%c. for Rio No. 7 on the spot. The West India growths have had only a moderate sale, but there has been no pressure to sell and values have held steady at 9c. for good Cacuta. E st India growths have been dull and nominal at 24%c for standard Java. Speculation in the market for contracts has been slightly more active and prices have advanced a few points in response to stronger Europan and Brazilian advices and a falling off in Sat. Mon. Tues. Wed. Thurs. Frv. September delivery....e. 5·10 5·02 5·05 5·03 5·07 5·15

domestic.

Refined petroleum has been advanced, closing at 6 75c. in bbls., 4 25c. in bulk and 7 40c. in cases; naphths unchanged at 6c. Crude certificates have been firmer, closing at \$1 08½; credit balances have been advanced to \$1 04. Spirits turpentine has been dull, closing easy at 31½ 631½c. Rosins have been moderately active and steady at \$1 30 for common and good strained. Wool has been dull and prices quoted have been largely nominal. Hops have been in fair demand and steady. and steady.

#### COTTON.

FRIDAY NIGHT, September 23, 1898.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 20 ,285 bales, against 112,854 bales last week and 54,864 bales the previous week, making the total receipts since the 1st of Sept., 1898, 379,179 bales, against 539,188 bales for the same period of 1897, showing a decrease since Sept. 1, 1898, of 16 1,003 bales.

Speculation in cotton for future delivery has been moderately active, but the tendency of prices has continued do wnward. Early in the week weather conditions were generally reported as more favorable, and there was fairly free selling by tired longs to liquidate accounts, all of which tended to depress prices. The buying power has continued to lack force, although during the latter part of the week there were indications of some foreign buying for investment account, attracted by the low prices. On Friday a new low record for prices was made, October selling at 5:18c., against 5:28c, the previous low record, at which figures November and December sold on November 12, 1894. Continental spinners have been more active buyers of actual cotton during the week, but the demand for Liverpool and domestic spinners has been quiet. Estimated sales of futures for the week were 535,000 bales. Saturday prices declined 5 to 8 points under selling for local and foreign account, prompted by favorable crop prospects. Monday there was a steadier market early in the day. Subsequently, however, there was a weaker tone, under a free movement of the crop and selling for Southern account, closing unchanged to 2 points lower for the day. Tuesday prices again advanced a few points during early 'Change in response to steadier foreign advices than expected and some buying for investment account. Later in the day, however, selling by longs had a depressing influence and the close showed prices 2 to 4 points lower for the day. Wednesday prices declined 1 to 4 points under weaker foreign advices than expected, a continued full movement of the crop and further selling by tired longs to liquidate accounts. Thursday the market was steadier and prices advanced 1 to 3 points. Foreign advices were better than expected and there was some buying for foreign account. Local and Southern shorts also did some buying to cover contracts. T

On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the grades would be as follows:

WEATHER REPORTS BY TELEGRAPH.—Advices to us this evening by telegraph from the South indicate that rain has evening by telegraph from the South indicate that rain has been quite general the past week and that in portions of Alabama, Mississippi and Tennessee as well as at a few points in Arkansas the precipitation has been excessive. Further deterioration of the crop is claimed as a result of too much moisture. Reports from Texas denote that prospects for a top crop have improved. Packing and marketing, except where interrupted by adverse weather conditions, have progressed remidle. gressed rapidly.

gressed rapidly.

Galveston, Texas.—R sin has fallen heavily on three days of the week, to the extent of six inches and twenty-five hardredths. The thermometer has averaged 73, the highest being 87 and the lowest 61.

Palestine, Texas.—We have had showers on two days during the week, to the extent of sixty hundredths of an inch. The thermometer has averaged 80, ranging from 66 to 94.

Huntsville, Texas.—It has been showery on one day of the week, the precipitat on being twelve hun tred the of an inch. The thermometer has ranged from 69 to 93, averaging 81.

Dullas, Texas.—A fair top crop is anticipated. The weather later has been very beneficial. There has been rain on two days during the week, the precipitation reaching forty-sight

later has been very beneficial. There has been rain on two days during the week, the precipitation reaching forty-sight hundredths of an inch. Average thermometer 32, hignest 37 an 1 lowest 64.

San Antonio, Texas.—The week's rainfall has been one inch and twenty-two hundredths, on three days. Minimum temperature 63.

temperature 68.

Luting, Texus.—It has rained on two days during the week, to the extent of one inch and thirty-five hundredths. The thermometer has averaged 82, ranging from 67 to 96.

Columbia, Texus.—It has rained on two days of the week, the rainfail reaching one inch and eighty three hundredths. The thermometer has ranged from 67 to 91, averaging 79.

Cuevo, Texus.—Prospects for a top crop are somewhat better. We have had rain on three days of the past week, to the extent of two inches and forty three hundredths. Average thermometer 81, highest 94, lowest 63.

Brenham, Texus.—We have had rain on four days during the week, to the extent of one inch and thirteen hundredths.

Brenham, Texas.—We have had rain on four days during the week, to the extent of one inch and thirteen hundredths. The thermometer has averaged 83, the highest being 93 and

Corpus Christi, Texas.—We have had beneficial rain on two days of the week, the rainfall reaching one inch and ten hundredths. The thermometer has averaged 79, ranging from 70 to 88.

Weatherford, Texas.—Taere has been rain on three days during the week, to the extent of two inches and ninety-six hundredths. Tae thermometer has ranged from 64 to 97,

hundredths. The thermometer has ranged from 64 to 97, averaging 82.

New Orleans, Louisiana,—It has rained on five days of the week, the rainfall reaching eighty hundredths of an inch.

New Orleans, Louisiana,—It has rained on nive days of week, the rainfall reaching eighty hundredths of an inch. Average thermometer 81.

Shreveport, Louisiana.—It has rained on three days of the week, the rainfall being sixteen hundredths of an inch. The thermometer has averaged 78, highest being 91 and lowest 64.

Columbus, Mississippi.—Recent rains have seriously damaged crops. Rain has fallen on three days of the past week, the rainfall reaching four inches and seventy-six hundredths. The thermometer has averaged 81, ranging from 64 to 93.

Leland, Mississippi.—Rainfall for the week two inches and twenty hundredths. The thermometer has ranged from 60 to 90, averaging 73.4.

Greenville, Mississippi.—The weather is now clear and warm, but there were heavy rains early part of the week.

Vicksburg, Mississippi.—The weather is now clear and warm. There has been rain on three days during the week, to the extent of four inches and thirty-three hundredths. Average thermometer 76.5, highest 89 and lowest 63.

Heleaa, Arkansus.—Crops are deteriorating as a result of too much rain. There has been rain on three days during the week, the precipitation being one inch and eighty-three hundredths. The thermometer has averaged 73.7, ranging from 60 to 84.

Nucleus Arkansus.—Earther deterioration in the crop is

Nashville, Tennessee.—Further deterioration in the crop is reported, due to too much moisture. Rain a fallen during

he week to the extent of two inches and fifty hundredths. Average thermometer 77, highest 90, lowest 64.

Memphus, Tennessee.—Rain has interfered with picking and the local quarantine delays wagon receipts from the immediate vicinity. There has been rain on three days during the week to the extent of one inch and thirty-two hundredths. The thermometer has ranged from 64.5 to 89, averaging 7624

the week to the extent of one inch and thirty-two hundredths. The thermometer has ranged from 64.5 to 89, averaging 76.4.

Mobile, Alabama.—Crop reports continue unfavorable. Excessive rains are causing damage and interrupting picking. There has been rain on four days of the past week, the precipitation being six inches and twenty-six hundredths. Thermometer averaged 78, highest being 88 and lowest 67.

Montgomery, Alabama.—Cotton is being picked and marketed rapidly. The quality is generally poor, but improving since the last few days of sunshine. Rain has fallen on two days of the week, to the extent of six hundredths of an inch. Thermometer ranged from 64 to 91, averaging 78.

Selma, Alabama.—There has been rain on three days during the week, the precipitation being sixty-eight hundredths of an inch. The thermometer has averaged 75, ranging from

of an inch. The thermometer has averaged 75, ranging from 62 to 95.

Madison, Florida. - We have had no rain during the week.

Madison, Florida.—We have had no rain during the week. Average thermometer 83, highest 93, lowest 71.

Savannah, Georgia.—It has rained on three days of the week, the rainfall reaching eleven hundredths of an inch. The thermometer has averaged 79, ranging from 70 to 90.

Augusta, Georgia.—We have had rain on two days during the week. The rainfall reached fifty-four hundredths of an inch. The thermometer has ranged from 65 to 93, averaging 78

the week. The rainfall reached fifty-four numbers of an inch. The thermometer has ranged from 65 to 93, averaging 78.

Charleston, South Carolina.—Rain has fallen on four days of the week, to the extent of thirty-eight hundredths of an inch. Average thermometer 78, highest 88, lowest 73.

Stateburg, South Carolina.—Picking is progressing rapidly. There has been rain on one night during the week, the precipitation reaching thirty-three hundredths of an inch. The thermometer has averaged 77-7, the highest being 93 and the lowest 64.

Greenwood, South Carolina.—There has been rain on two days during the week, to the extent of seventy-nine hundredths of an inch. The thermometer has averaged 76, ranging from 66 to 86.

GOVERNMENT WEEKLY COTTON REPORT .- Mr. W. L. Moore, Chief of the Weather Bureau of the Agricultural Department, made public on Tuesday the following report on the crop in Southern States for the week ending Sept. 19:

crop in Southern States for the week ending Sept. 19:
A slight improvement is noted in the cotton crop in the eastern pertion of the cotton region; rotting and shedding are decreasing; the
bulk of the crop is open and picking is progressing rapidly. In the
central portion of the cotton region, where a bout the same conditions
prevail as in the previous week, bicking is progressing as the weather
permits; but shedding, rust and worms continue in Mississippi and
caterpillars and worms are again damaging the crop in Louisiana.
Some damage has resulted from heavy rains in Arka sas. In Texas
the bulk of the early crop is open and picking well advanced, although
pickers are scarce in some localities. The reports indicate that the
top crop will be short in South Carolina, Georgia, Oklahoma and
Texas.

JUTE BUTTS, BAGGING, &c.—The market for jute bagging has been active for the week under review, and the close is steady at 6½c. for 1½ lbs. and 6½c. for 2 lbs., of standard grades. Car-load lots of standard brands are quoted at 6½c. for 1¾ lbs. and 6½c. for 2 lbs., f. o. b. at New York. The market for jute butts has been brisker for parcels to arrive at '90c. for paper quality and 1¾c. for mixing. No spot market.

SHIPPING News.—As shown on a previous page, the exports of cotton from the United States the past week have reached 100,657 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

2	Total	il bales.
	NEW YORK-To Liverpool, per steamers Georgie, 5,676	0.071

#### BREADSTUFFS.

FRIDAY, Sept. 23, 1898.

Business in the market for wheat flour has been only mod-

Bright Spt. 23, 1898.

Business in the market for wheat flour has been only moderately active, but there has been a stronger tone to values reflecting a firmer market for the grain. Despite the fact that prices have shown a hardening tendency, there has been no material improvement in the demand, as buyers generally have continued to show little disposition to purchase in advance of their immediate wants. The demand from exporters has continued quiet. Rye flour has been in limited supply and prices have been firmer. Corn meal has been in fairly active demand, as both the home trade and exporters have been buyers; prices have been unchanged and steady.

Speculation in wheat for future delivery has been fairly active and the tendency of prices has continued towards a higher basis. The principal strengthening feature of the market has been an active export trade, as both the United Kingdom and the Continent have been buyers, and the clearances from the seaboard have been fairly large. Saturday there was a quiet market and under limited offerings prices declined 1/2%c. Monday there was a firmer market early in the day, in response to the firmness of the cash markets. Subsequently, however, owing to a larger increase in the visible supply than expected, and a full movement of the crop in the Northwest, the market turned easier and all of the early improvement was lost. Tuesday the market was firmer, prices advancing 1/2%c. The strengthening features were unexpectedly small receipts at the Northwest, large clearances from the seaboard and a more active export trade. Wednesday there was a stronger market for cash wheat and the near-by deliveries, prices showing an advance of 2c for September delivery, while other months were only 1/2% 4c. higher. The improvement was based almost entirely on an active export demand, the purchases for the day here and at outports amounting to close to 1,000,000 bushels. Thursday the upward tendency to prices continued, the advance for the day being 1/2 feature and leaf of the market sho

#### THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Sept. 23, 1898.

The pronounced weakness in the market for raw cotton is unquestionably a most unfavorable factor in the cotton goods situation. Under its influence buyers stubbornly refuse to extend their operations beyond compilsory purchases and pay no attention to the assertion of sellers that the present prices of cotton goods quite discount the fall in the price of cotton, and in some instances even decline to a still lower level. The average prices of cotton goods are certainly the lowest on record, but at that they present no inducement to buyers to anticipate future requirements. Sellers contend that stocks are by no means excessive, except in one or two directions, print cloths for instance; but there is evidence enough that they are ample to meet such a demand as has come forward for some time past. The print cloth market by its course this week has disclosed the artificial character of the recent advance, as at the close that advance has not only been entirely lost, but The pronounced weakness in the market for raw cotton is has disclosed the artificial character of the recent advance, as at the close that advance has not only been entirely lost, but the market is clearly further in favor of buyers. The woolen goods division has continued inactive and tone easy. In contrast to these conditions in the primary market are the reports from the majority of out-of-town distributing centres. Business there is well sustained for the time of year and favorable returns for the remainder of the year are confidently counted upon.

dently counted upon.

WOLLEN GOODS.—Some fair re-orders for plain heavy-weight goods for men's wear reported, chiefly in serges, and heavy-weight market in generally fair condition. Rather more attention has been given also to light-weight woolens and worsteds for spring, but not enough to relieve the market from inactivity. The light-weight situation is decidedly unsatisfactory. Few mills are well supplied with orders, and unless supplementary buying speedily develops to a material extent, a considerable amount of machinety is likely to be thrown out of work in addition to what is already idle. Selters are anxious to secure business and prices in most directions are therefore somewhat uncertain. Low-grade goods suffer most in this respect. Overcoatings and cloakings continue dull and without special feature. Dress goods are selling more readily but the market is decidedly irregular. Flannels and blankets quietly steady.

Domestic Cotton Goods.—The exports of cotton goods

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending September 19 were 7,788 packages, valued at \$397,799, their destination being to the points specified in the tables below:

		1898.		1897.
NEW YORK TO SEPT. 19.	Week.	Since Jan. 1.	Week.	Since Jan. 1

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$8,652,871 in 1998 against \$7,950,319 in 1897.

There has been no quotable decline in the price of brown sheetings or drills, but the tone of the market is distinctly There has been no quotable decline in the price of brown sheetings or drills, but the tone of the market is distinctly easy in both heavy and light weights. The demand is steady, but buyers are only taking limited quantities. Dacks are quiet and easy. Brown osnaburgs dull and irregular. Bleached cottons in steady request for limited quantities and the demand is readily met by sellers, with prises irregular in outside makes of medium and fine grades and tending down in low qualities. Wide sheetings inactive and cotton flannels and blankets quiet at previous prices. Denims continue weak, with light sales, and in other coarse colored cottons buyers have the advantage in trading operations. Kid finished cambrics barely steady. Fancy prints, with few exceptions, weak and irregular. Indigo blues, mournings and other staple lines in fair demand without quotable change. Staple gunghams are steady, and with dark dress styles are in quite moderate supply. There is a fair demand at firm prices for fine ginghams for spring. Print cloths have been mactive for regulars and in moderate demand for odds, closing with sellers of the former at 2c., and in the latter on the basis of 23%c for 38% inch 64 square 5-15 goods.

Foreign Dry Goods.—The demand for dress goods for

FOREIGN DRY GOODS.—The demand for dress goods for spring shows some improvement, but is still backward. Silks in quiet request for new season, sellers generally requiring a slight advance in price. Men's-wear woolens and worsteds inactive. Rubons and laces and linens in quiet demand. An auction sale of domestic ribbons, the product of the Phoenix Silk Mfg. Co., was held Thursday. About 21,000 cartons, to the value of nearly \$3.0,000, were disposed of. Competition was brisk and average of prices very satisfactory, coming within 10 per cent of regular market quotations.

tory, coming within 10 per cent of regular market quotations.

#### Importations and Warehouse Withdrawals of Dry G

The importations and warehouse withdrawals of dry goods at this port for the week ending Sept. 23, 1898, and since January 1, 1898, and for the corresponding periods of last year are as follows:

Decatur, Ala.—Bonds Proposed.—The holders of \$50,000 bonds of this city, it is said, are about to submit a proposition to the Council that the city refund the bonds at possibly 50 cents on the dollar and 4% interest, and that the Legislature

cents on the dollar and 4% interest, and that the Logisland shall legalize the new issue.

Milwaukee, Wis.—Ci'y Restrained from Issuing Bonds.—
On September 20, 1898, the Supreme Court handed down a decision enjoining the city from issuing \$80,000 bridge bonds, \$140,000 street improvement bonds and \$91,000 garbage bonds, suit against the issuance of which was brought in June, as given in the Chronicle June 9, and July 16, 1898. In delivering the opinion the Court held that the Constitutional limit of indebtedness was "a debt limit and not a bond limit," and that the city had already exceeded its limit by \$51,524. The of indebtedness was "a debt limit and not a bond limit," and that the city had already exceeded its limit by \$51,524. The Court also held that money raised in advance of taxation for specific purposes was a trust fund, and ought not to be diverted for other purposes, and that if such money was diverted and used for other purposes that the amount so diverted constitutes indebtedness within the meaning of the Constitution. The Court figures that the net debt of the city is \$7,285,695 34, while that allowed by the Constitution is \$7,234,171 25.

\$7,234,171 25.
Mobile, Ala.—Bond Litigation.—On September 14, 1898, the Bienville Water Supply Co. and others filed a bill in Chancry, claiming that the \$750,000 4½% water and sewer bonds recently awarded are illegal. The complainants state that the Mayor and General Council were not authorized by a majority of the registered veters, at the special election called for that purpose, to contract for, build, purchase or otherwise acquire a water-works system. They also claim that the city authorities were not authorized to enter into a contract with Sperry, Jones & Co., Baltimore, for the sale of the bonds, and to secure legislation from the General Assembly legalizing the issue.

the bonds, and to secure legislation from the General Assembly legalizing the issue.

On September 15, 1898, the city filed a demurrer to the bill and claimed that a majority of the voters "present and voting" were in favor of the water-works system. The city officials deny that they intend to make any contract for the construction of the water-works that shall bind the city, unless the General Assembly shall authorize the issuance of the bonds, and also deny that it is their intention to issue or deliver the bonds to any person or persons unless the city be specially authorized to is ue the bonds in the amount named and for the purpose specified.

specially authorized to is ue the bonds in the amount named and for the purpose specified.

New York City.—Euits Discontinued—On September 20, 1898, counsel for Vermilye & Co. and Kuhn, Loeb & Co., and for the Produce Exchange Trust Company, reached an agreement whereby all litigation over the award of the \$12,688,992 36 city bonds to the Trust Company was ended. The settlement was an amicable one and all litigation as far as the above companies are concerned, it is understood, will cease.

In the suit of Zimmermann & Forehay, Justice Cohen in the Supreme Court on September 17, 1898, refused to issue a peremptory mandamus to compel the Comptroller to award them \$1,000,000 of the above bonds. This latter suit was brought by the above firm on the ground that they were the highest bidders for that amount of the twelve million dollar issue.

Philadelphia, Pa.—Loua Litigation.—The suit over the validity of the \$11,200,000 lean bill came up in the Common Pleas Court, No. 4, on September 21, 1898. The city was ready to go on with the case, but Attorney Simpson, representing the complainants, stated that he would not argue the case at the present time, as it was not ripe for a hearing while the ordinance providing for a tax levy for the payment of the principal and interest of the bonds is still pending before the City Councils. The Court, after some little discussion on the subject, continued the case until next week.

Subsequently, according to the Philadelphia "Public Ledger," after a conference between counsel, Mr. Simpson went to the Prothonotary's office and had the present proceeding discontinued. He stated, however, that as soon as the tax levy ordinance is passed he will file another bill in equity similar to the one just withdrawn, the only difference being that it will contain the new ordinance.

See Chronicar July 16, 1898, and July 30, 1898.

#### Bond Proposals and Negotiations this week have been as follows:

Aberdeen, S. Dak.—Bids.—As stated in the CHRONICLE of last week, the \$23,00 \() 5\% refunding bonds were awarded on September 13 to N. W. Harris & Co., Chicago, at 103 109. Following are the bids:

N. W. Harris & Co., Chicago. \$23,715 00 | Mason, Lewis & Co., Chicago. \$23,175 57 Citizens' Sav. 4ank, Flint ... 23,575 00 | C. H. Lafling ... ... 23,165 66 8. A. Kean, Chicago ... ... 23,230 00 |

Citizens' Sav. 4ank, Filit. 22,320 00 | C. R. Laung. 23,100 00 | S. A. Kean, Chicago. 23,230 00 | C. R. Laung. 24,100 00 | Albany, N. Y.—Bonds Authorized.—On September 12, 1898, the Mayor approved an ordinance authorizing the issuance of \$22 000 water bonds. Interest will be at not more than 55, payable semi-annually.

A. den (Village) N. Y.—Bond Offering.—Proposals will be received until 8 P. M. September 28, 1898, by Albert Yager, Village Clerk, for \$18,000 water-works bords. Securities are issued pursuant with sections 128, 129 and 221, Chapter 414, Laws of 1897, and were authorized by a resolution of the issued pursuant with sections 128, 129 and 221, Chapter 414, Laws of 1897, and were authorized by a resolution of the Board of Trustees adopted September 13, 1598. Bonds are dated September 1, 1898. Interest will be payable March 1 and September 1, and the principal will be payable \$900 yearly from 1903 to 1922 inclusive. Proposals must state rate of interest and must be a companied by a certified check for 2% of the amount of bonds bid for payable to the Village Treasurer without conditions. The Village has no bonded debt at present and the assessed valuation is \$181,000, about 25% actual value.

Annandale (Village) Minn.—Bond Sale.—J. D. Cleghorn & Co., Minneapolis, have purchased the \$1,000 6% 1-2 year village hall bonds.

Angusta, Wis.—Bond Sale.—This city recently sold the \$12,000 5% water works bonds, which were voted last July, to the First National Bank, Portage, Wis., at 1(4 166. Following are the bids :

st National Bank, Portage...\$12,500 N. W. Harris & Co., Chicago... \$12,242 son, Lewis & Co., Chicago... 12,375 Denison, Prior & Co., Cleve.... 12,100 son, Leach & Co., Chicago... 12,250

Bay City, Mich.—Bond Sale.—On September 19, 1898, the \$18, 00 4% water-works bonds were awarded to W. J. Hayes & Sons. Cleveland, at 108-57. Bonds mature October 15, 1928. For further description of bonds see Chronicle September 1, 1999, and 1999, and 1999.

ember 17, 1898, p. 601.

Berlin, N. H.—*Temporary Loan*.—The city has negotiated a loan of \$8,000 with the Littleton Savings Bank at 4½%.

Loan bears date September 6, 1898, and matures January 6,

Breckenridge, Col.—Bond Sa'e.—On September 13, 1898, the \$25.000 6% water-works bonds were awarded to Mitchell Bros., Denver, at 100.50. A bid of 102 was also received from the Breckenridge Mercantile Co. Both the above firms were also bidders for the contract work and bid on the bonds on the condition that they be awarded the contract. "Taking both into consideration," Mr. James K. Daniell, Town Clerk, writes us. "the city will save about \$500 by accepting the first bid." Bonds mature September 1, 1913, subject to call after September 1, 1908. Proposals were originally asked for these bonds until September 6, 1898, but those received were rejected. A description of the bonds.

originally asked for these bodds until September 8, 1898, but those received were rejected. A description of the bonds will be found in the Chronicle September 3, 1898, Bristol County, Mass.—Bond Sale.—On September 22, 1898, the \$180,000 4% loan was awarded to the Fall River Savings Bank at 102.71. Following are the bids:

Fall River Savings Bank. 102-71 | Blake Bros. & Co., Boston. 102-342 | Jose, Parker & Co., Boston. 102-341 | W. Howland & Co. 102-23 | Blodgers, Newman & Tolman, Bos. 102-51 | Blodger, Merrit & Co., Boston. 102-157 | Third National Bank, Boston. 102-345 | Rakinson & Burr, Boston. 102-159 | Farkinson & Burr, Boston. 101-945 | Farkinson & Burr, Boston. 102-104 | Farkinson & Burr, Boston. 102-104 | Farkinson & Burr, Boston. 102-104 | Farkinson & Burr, Boston. 101-945 | Farkinson & Burr, Boston & Burr, Boston & Burr, Boston & Burr,

Loan matures September 23, 1902. For further description to CIRONICLE September 17, 1898, p. 602.

Brookfield, Mo.—Bonds Defeated.—At the election held in September 13, 1898, the proposition to issue \$14,000 sewer and swas defeated.

bonds was defeated.

Buchanan (Town), Va.—Bond Ofering.—Proposals will be received until 12 M., September 30, 1898, by the Town-Council, at the office of W. T. Zimmerman, Mayor, for \$3,000 refunding coupon bonds, dated November 1, 1898. Principal will mature November 1, 1918. Bids are asked on a basis of 5% and on a basis of 6% interest.

Caldwell County, Mo.—Bond Sale.—On Sept. 5, 1898, \$13,500 of 6% court house bonds were awarded to Altheimer & Rawlings, St. Louis, Mo., at 104.75. Bonds mature \$4,500 yearly on November 2 from 1900 to 1902, inclusive. A description of the bonds will be found in the Chronicle of Aug. 27, 1898, page 442.

27, 1898, page 442.
Canton, Ohio.—Bond Sale.—On September 19, 1898, the \$15,000 coupon water-works refunding bonds were awarded to W. J. Hayes & Sons, Cleveland, at 103.233 for a 4% bond. Following are the bids:

Cassopolis, the Finance Committee, Jasper White, Chairman, will offer for sale the \$32,001 4g county court house bonds which were authorized last April. Securities will be in denomination of \$100, dated June 15, 1898. Principal will mature \$3,000 on January 15 yearly, from 1900 to 1903, inclusive. Bids will be received by mail not later than the opening of the sale. Notice is given that no bid will be received until the bidder shall state to the committee that he is entirely familiar with the proceedings authorizing the issue and sale of the bonds.

Cleveland. Ohia.—Bond. Offering.—Proposale will be

cleveland, Ohio.—Bond Offering.—Proposals will be received until 12 M. October 24, 1893, at the office of H. L. Rossiter, Auditor of the Public Library Board, Room No. 213, City Hall, for \$250,000 5% public library coupon bonds. Scurities will be in denomination of \$1,000. Interest will be payable April 1 and October 1 at the American Exchange National Bank, New York City, and the principal will mature October 1, 1918. Each bid must be accompanied by a certified check for \$10,000 drawn on a national bank made payable to the order of the Treasurer of the Public Library Board. Bonds will be issued under authority of Section 11 of an Act of the General Assembly of the State of Onio passed April 22, 1896 (92—O. L., 590).

\*\*Corrected Maturity.\*\*—Owing to an error in an official advertisement, the maturity of the \$250,000 4% river and harbor bonds was given in last week's Chronicle as October 1, 1998.

\*\*Columber Office Research Authorized\*\*—The City Cornell Columber 1, 1898.

dated October 1, 1898.

These bonds were offered for sale on September 1, but all bids were rejected at that time. A description of the bonds will be found in the Chron-Iolle of Aug. 20, 1893, page 348.

Los Angeles, Cal.—Bond Sale.—On September 19, 1898, the \$150,000 4% park bonds and \$160,000 4% tuned bonds, \$10,000 4% park bonds and \$160,000 4% tuned bonds were awarded to E. D. Shepard & Co., New York, at 105.25. For description of bonds see Chronicle August 27, 1998, p. 444.

Lynchburg, Va.—Bond Offeria,—Proposals will be received until 12 M, September 29, 1898, by Camillus Christian, Chairman Finance Committee, for \$30,000 334% non-taxable coupon bonds. Securities are dated July 1, 1898, interest will

be payable Jan. 1 and July 1, and the principal will mature July 1, 1928.

Lynn, Mass,—Temporary Loan.—The city has awarded a six months' loan of \$107,000 to Rogers, Newman & Tolman,

Boston, at 3-02%.

McConnelsville, Ohlo.—Bonds Voted.—At the election held September 19, 1898, the issuance of \$20,000 water-works bonds, was authorized by a vote of 247 to 113:

McLean County (P. O. Washburn), N. Dak.—No Bonds Sold.—It has been reported that this county recently sold \$15,000 of bonds. We are advised that such a sale was being negotiated, but that after all arrangements had been made for the transfer of the bonds to F. R. Fulton & Co., Grand Forks, it was found that the county could not be legally bonded for more than \$13,000. A meeting of the County Commissioners will probably be held on October 3 to decide upon the issuance of bonds to this amount.

Manhattan III—Bond Sale.—On September 20, 1898 \$1.185

manhattan, III—Bond Sale.—On September 20, 1898, \$1,185 5g street improvement bonds were awarded to the First National Bank, Joliet, at 101.266. Bonds are in denominations of \$500 and \$185, dated September 1, 1898. Interest will be payable annually and the principal will mature September 1, 1903.

Mansfield, Ohio.—Bond Sale.—On September 12, 1898, \$13,600 of 6% 1 to 5-year street improvement bonds were sold to the Mansfield Savings Bank. For description of bonds see CHRONICLE August 27, 1898, p. 445.

Marshall, Mich.—Bonds Proposed.—The issuance of \$35.

to the Mansfield Savings Bank. For description of bonds see CHRONICLE August 27, 1898, p. 445.

Marshall, Mich.—Bonds Proposed.—The issuance of \$35,000 sewer bonds is under consideration.

Marshalld (Wis.) School District No. 1.—Bond Offering.

—Proposals will be received until 12 m. October 1, 1898. by E. M. Deming, Treasurer of the district, for \$18,500 5% High School bonds. Principal will mature \$2,000 on March 1 in the years 1901, 1902 and 1903 and \$2,500 on March 1 yearly from 1904 to 1907, inclusive, and \$2,500 on February 1, 1908. Interest will be payable annually at the Continental National Bank of Chicago. Bonds bear date Oct. 15, 1898. All bids must be accompanied by a bond of the bidder to School District No. 1 of the city of Marshfield in the penal sum of \$1,000, with two good sureties, who shall each justify in double the amount of the bond, conditioned that if the bid of the party be accepted he will accept and pay for such bonds according to his bond, or in lieu of such bonds bids may be accompanied by a certified check in the sum of \$500, payable to the District Treasurer. This school district is co extensive with the city of Marshfield, which has a population of about 6,000. Aggessed valuation, \$450,000; actual value, \$2,000,000. Total indebtedness of school district is \$4,000, and the city has no indebtedness whatever.

Massaced Canart (Shelten, Wash.) School District No. 1.—
Massaced Canart (Shelten, Wash.) School District No. 1.—

Mason County (Shelton, Wash.), School District No. 1.— cond Offering.—Proposals will be received until October 8, 1998, by W. S. Covill, District Clerk, for \$2,000 refunding 1908. Principal will mature \$500 yearly from 1901 to 1904, inclusive.

Mauch Chunk (Borough), Pa.—Bend Election.—The Borough Council contemplates submitting to a vote of the people in February, 1899, the question of issuing from \$30,000 to \$35,000 street-improvement bonds.

people in February, 1899, the question of issuing from \$30,000 to \$35,000 street-improvement bonds.

Minnesota.—Bond Offering.—Proposals in duplicate will be received until 11 A. M. October 4, 1898, by the Board of State Capitol Commissioners, Channing Seabury, Vice-President, 512 Endicott Building, St. Paul, for \$100,000 4% certificates of Sudebisdances. Securities will be issued in denomination of Sudebisdances. dent, 512 Endicott Building, St. Paul, for \$100,000 4% certificates of indebtedness. Securities will be issued in denominations of \$50, \$100, \$500 and \$1,000, or upwards. They will be dated October 1, 1898. Interest will be payable January 1 and July 1 at the office of the State Treasurer, and the principal will mature \$50,000 on July 1, 1902, and \$50,000 on July 1, 1903. Certificates are issued under Chapter 96 of the General Laws of 1897. Proposals should be for each \$50,000

General Laws of 1897. Proposals should be for each \$50,000 separately.

Moultrle, Ga.—Bond Sale.—Water-works and electric-light bonds of this city to the amount of \$8,000 were awarded on Sept. 1, 1898, to F. M. Stsfford & Co., of Chattancogs, Tenn., at 103-51. Bonds mature in 1918.

Mount Healthy, Ohio.—Bond Sale.—On September 12, 1898, the \$1,500 & (village's proportion), and \$1,043 10 & (property owners) proportion), street improvement bonds, were awarded to Briggs, Smith & Co., Cincinnati, at 109-20 and 109-50 respectively. Bonds mature one-tenth of each issue yearly. For further description of bonds see Chronicle, August 27, 1898. p. 445.

Committee and J. Bayard Kirkpatrick, City Treasurer, at the office of the latter, 356 George Street, for \$32,000 4% sinking fund bonds. Securities will be in denomination of \$1,000; interest will be payable May 1 and November 1 at the National Bank of New Jersey, and the principal will mature November 1, 1923. Each proposal must be accompanied by a certified check for 5% of the amount bid. Bonds are authorized by an Act of the Legislature approved February 18, 1879, and by resolution of Common Council dated September 9, 1893, and are free of all tax.

New Iberla, La.—Bond Election Postponed.—The election which was to have been held on October 17, 1898, to vote on the proposition to issue \$80,000 electric-light bonds has been postponed until a later date not yet named. This action was made necessary on account of an irregularity in the petition of the taxpayers asking for the election.

of the taxpayers asking for the election.

Newport, Ky.—Bond Sale.—The city has awarded to Rudolph Kleybolte & Co., Cincinnati, at 110.69 \$2,600 5% improvement bonds.

Newton County. Texas.—Bond Sale.—The county recently sold \$5,500 5g 5-40-year (optional) jail bonds.

Newton, Mass.—Temporary Loan.—The city has negotiated a four months' loan of \$75,000 with Estabrook & Co., Boston,

at 3%.

sewer district held September 19, 1898, it was voted to borrow \$10,000 for a new sewer system.

North Adams, Mass.—Temporary Lean.—This city has recently negotiated a \$5,000 Normal School short-time loan at 4% with a local savings bank. The whole amount of this loan will be included in the tax levy of next year.

Norwood, Ohlo.—Bond Offering.—Proposals will be received until 12 M., October 3, 1898, by W. E. Wichgar, Village Clerk, care of William E. Bundy, room 210, Lincoln Inn Court, Cincinnati, for \$24,293 64 5% refunding bonds. Securities will be in denomination of \$500, except one bond of \$293 64, and dated Sept. 15, 1898, and will mature September 1, 1998. ties will be in denomination of \$200, except one bond of \$293 64, and dated Sept. 15, 1898, and will mature September 1, 1908. Interest will be payable semi-annually at the Atlas National Bank, Cincinnati. Bids must be accompanied by certified check for 5% of the amount of bonds, payable to order of Village Clerk. Securities are issued pursuant with Section 2,701, Revised Statutes of Ohio, as amended April 27, 1896.

Oil City (Pa.) School District.—Bond Sale.—On September 15, 1898, the Board of Control of this district awarded \$45,000 of 4% coupon bonds to John K. Bryden, of Franklin, Pa., at 102 701. Bonds mature \$2,000 yearly from 1903 to 1917, inclusive, and \$3,000 yearly from 1918 to 1922, inclusive. A description of the bonds will be found in the Chronicle of Sept. 10, 1898, page 550.

Sept. 10, 1898, page 550.

Omaha, Neb.—Bond Election Proposed.—The City Council is considering the question of submitting to a vote of the people at the next election a proposition to issue \$50,000 paving bonds and \$50,000 sewer bonds.

Onelda, N. Y.—Bonds Authorized.—The Sewer Board has decided to issue \$6,369 93 sewer assessment bonds in anticipation of the collection of the assessments on property improved which remain unpaid at this date.

Onelda County, N. Y.—Bends Authorized.—The Board of Supervisors has anthorized the issuance of \$8,000 6% road bonds.

bonds.
Osakis (Village), Minn.—Bond Offering.—Proposals will be received until 10 A. M. October 8, 1898, at the office of C. H. Bronson, Village Recorder, for \$2,000 6% bonds. Securities will be in denomination of \$500. Interest will be payable annually, and the principal will mature three years from date of issue. Bonds were authorized at a special election held on August 27, 1898, under the provisions of Chapter 200 of the General Laws of Minnesota for the year 1893, approved April 10, 1893.
Ottawa County (P. O. Port Clinton). Ohio.—Bond Sale.—

Ottawa County (P. O. Port Clinton), Ohio.—Bond Sale.— On September 17, 1898, the \$40,000 5% court-house bonds were awarded to N. W. Harris & Co., Chicago, at 111 79. Follow-ing are the bids: N. W. Harris & Co., Chicago... \$44,716 00 | W. J. Hayes & Sons, Cleve... \$44,489 00

For description of bonds see Chronicle of last week, p. 603.

Pacific County, Wash.—Bond Sole.—The county has awarded to Morris & Whitehead, Portland, \$40,000 52 10-20-year (optional) funding bonds. Securities are in denomination

of \$1,000.

Pendleton, Ore.—Bonds Authorized.—The City Council recently appointed C. S. Jackson financial agent to negotiate the sale of \$70,000 refunding water and levee bonds and \$65,000 funding bonds at a rate not to exceed 5% interest. The citizens of Umatilla County are to be given the preference in the purchase of these bonds.

Perth Ambey, N. J.—Bond Offering.—Proposals will be received until 8 P. M., October 3, 1898, by the Finance Committee and City Treasurer at the City Hall, for \$25,000 4% gold coupon school bonds. Securities will be in denomination of \$1,000, dated September 1, 1898. Interest will be pay-

able March 1 and September 1 at the Middlesex County Bank, Perth Amboy, and the principal will mature September 1, 1918. Bonds are authorized by an Act of the Legislature, Chapter 288, approved March 22, 1895, and by resolution of the City Council.

Bonds are in denomination of \$1,000, dated September 1,

1898. Interest will be payable semi-annually at the National Exchange Bank, Boston. Principal will mature \$1,000 yearly on September 1, from 1899 to 1906, inclusive.

Shelbina, Mo.—Bond Offering.—Proposals will be received at any time within the next 60 days by John J. Bragg, Mayor, for \$5,000 6% electric light extension bonds. Securities will be in denomination of \$500; interest will be payable semi-annually at the Commercial Bank, St. Louis. Principal will mature ten years from date of issue, subject to call after one year. Assessed valuation, \$784,000. We are advised that there is no litigation pending or threatened, and that principal and interest have been promptly paid on previous issue of bonds. The city has no other indebtedness. The city will be assessed \$1 per \$1,000 of assessed valuation for a sinking fund to meet principal and interest on above bonds.

Shelby County, Ohlo.—Bond Sale—On September 17, 1898, \$6,400 6% bridge bonds were awarded to the Citizens' Bank of Sidney at par and accrued interest. There were no other bidders.

# COTTON CROP\_UNITED STATES.

#### PRODUCTION AND CONSUMPTION

# FOR THE YEAR ENDING SEPTEMBER 1, 1898.

#### CCTTON MOVEMENT AND CROP OF 1897-98.

Our statement of the cotton crop of the United States for the year ending Sept. 1 1898 will be found below. It will be seen that the total crop this year reaches 11,180,960 bales, while the exports are 7,532,615 bales, and the spinners' takings are 3,504,018 bales, leaving a stock on hand at the close of the year of 176,006 bales. The whole movement for the twelve months is given in the following pages, with such suggestions and explanations as the peculiar features of the year appear to require. The first table indicates the stock at each port Sept. 1 1898, the receipts at the ports for each of the past two years, and the export movement for the past year (1897-98) in detail, and the totals for 1896-97 and 1895-96.

Prev. yr.							4,646,084	

These figures are only the portion of the receipts at these ports wharrived by rail overland from Tennessee, &c.

The foregoing shows that the total receipts at the Atlantic and Gulf shipping ports this year have been 8,676,407 bales, against 6,816,525 bales last year and 5,394,875 bales in 1895-96; and that the exports have been 7,532,615 bales, against 5,968,423 bales last season and 4,646,034 bales the previous season, Great Britain getting out of this crop 3,459,864 bales. If now we add the shipments from Tennessee and elsewhere direct to manufacturers, and Southern consumption, we have the following as the crop statement for the three years.

Year Ending September 1.	1897-99.	1896-97.	1895-96.
Receipts at the shipp'g p'rts.bales Add shipments from Tennessee, &c., direct to manufacturers	8,676,407	6,816,525	5,394,875
	1,276,614	873,004	851,788
Manufactured South, not included	9,953,021	7,689,529	6,246,663
Manufactured South, not included above.	1,227,939	1,024,482	915,810
Total Cotton Crop for the Yearbales.	11180960	8.714.011	7,162,473

The result of these figures is a total of 11,180,960 bales (weighing 5,667,372,051 pounds) as the crop for the year ending August 31 1898, against 8,714,011 bales (weighing 4,383,819, 971 pounds) as the crop for the year ending August 31 1897

The distribution of these crops has been as follows:

Takings for Consumption—       1897-98.         Bales.       2,276,079         South.       1,227,939	1896-97. Bales. 1,862,565 1,024,482	1895-96. Bales. 1,670,744 915,810

actual consumption for the same three years have been.

1897-98. 1896-97. 1897-97. 1

Consumption in the United States and Europe.

United States.—A stage in the cotton-spinning indus try of the United States has been reached which-if it be assumed that the demand for goods is to remain as at present, that is, without material increase-makes necessary the admission that the Southern spinner is for the time being in possession of the field. We are not to be understood as asserting that the South is producing cotton goods in sufficient supply to meet the demand the North now satisfies, or that it is in control of every department of the trade. Those statements, all know, are not by any means facts. The consumption of cotton in the North, even during the last season, was 51 per cent larger than the consumption in the South. But there are certain classes of goods, the coarser and medium makes, which the South can manufacture cheaper than the North, and those class compete with the product of so large a portion of the spindles in the North that the general market the past year has in good part taken its tone from that situation. other words our Northern markets have during 1897-98 been over-supplied, and, as a result, stocks of goods have continued burdensome and values as a rule unremunerative At the same time, with this as the position of affairs here the mills in the South have enjoyed a fairly profitable twelve months, some of the larger mills running night and day.

Accepting then these statements as correctly representing the situation, and this difference in cost of manufacture between the mills of the two sections as an existing fact, the inquiry naturally arises, must the coming twelve months show in the North like unfortunate results to those of the past twelve months? Many have drawn a very unpromising forecast from these facts. They can see nothing but disaster in store for all spinners whose goods come in competition with Southern mills. Of course it is easy to construct an argument raising some such presumption based on an addition to the spindles year by year in the cotton States and on a concurrent continuation of the pres-

ent relative cost of production in the North and South. On these assumptions, which may prove true but most likely will prove false, a belief in the decadence of Fall River, New Bedford, Providence, and the like, as cottonmanufacturing towns may find support. But as we look at the situation, the present crisis is one in which short views are more useful and timely, and indeed the only ones that those cities or Northern spinners need bother themselves with. The question pressing for answer to-day, the one which concerns every man in any way interested in making cotton goods or in the production of raw cotton, is confined to the near-by future. The problem seeking solution iswhat are the signs for the next twelve months? That is to say, admitting the claim that to-day the medium and coarser grades of cotton goods can be manufactured cheaper in the South than in the North, what kind of a year can the Northern spinner anticipate and what kind of a demand from the North for the raw material can the cotton producer look forward to?

Before answering these questions, consider for a moment why it is we deprecate laying so much stress, as is done by some, on these long. lugubrious horoscopes with reference to the Northern spinners' situation; and why it is wiser for the time being to wholly discard those views. The suggestion made is the result of a long observation and study of trade crises. No kernel of truth that experience has left deserves to be prized more highly or trusted more implicitly than the one that all inequalities such as exist in this case work out - if they are given time-a natural cure. Of the advantages claimed, not one is beyond change in that way; and hence when, as a premise for his argument, a writer projects into a long series of coming years the more favorable conditions at present accompanying Southern production of cotton goods, he is assuming as a feature of the future more than the case warrants. For illustration, consider the profit accruing to the Southern manufacturer from the lower wages now ruling in that section. That item of cost is not the only dependence for the existing margin, but it is the chief. So far as that part of the inequality arises from Northern States legislation it will most likely be corrected when the influence of the offending statutes is more generally understood and appreciated; but in addition to that there is another corrective already at work-a movement tending to equalize the value of labor in the two sections. We refer to the multiplication of mills in the South and to the constant growth in the demand for labor such additions produce. This two-fold development must go on progressing rapidly and pari passu. So long as the favorable margin for goods exists spinning power will ncrease, and so long as additional spindles continue to be set up the demand on the market for labor will in turn be enlarged. In other words, an active increase in spinning capacity means an active absorption of labor, a process which, continued, must inevitably end in the labor supply becoming less abundant and wages higher. Presumably the change in this item of cost will be gradual. It has already begun. Colored labor in mills is about to be tried to arrest its progress. The movement will go on in face of that experiment. As the conditions ripen trade unions will take up the issue, and then the advance in wages South will come in a more radical way. It is not unlikely also that the equalizing process may be attended by a decline in the scale of wages at the North. We do not undertake to describe in all respects just how the adjustment will be brought about; our purpose was merely to remind our readers of this tendency at work, which must in time prove effective.

But passing that feature, the claim we make is that, notwithstanding the inequality in the item of wages and of the wider margin which, by means of that and other conditions, the manufacturer of goods in the cotton States is securing, the prospect for the coming twelve months is that Northern as well as Southern mills will obtain a fair profit for their product. Our conclusion is based on the assurance that the spindles of the whole country are needed to supply normal consumption, that the consumption has been below normal for a considerable period, and that there is now good promise of such an increased demand for goods as will soon tax the full productive capacity of the country. That the consumption of goods has been below normal can be proved in more than one way. Indeed the depressed condition of trade is so recent an experience, has so widely affected all our industries, and is so obvious a feature now, as, in our opinion, not to need proof. But fortunately we have other evidence which establishes the truth of our contention—that for a number of years the home consumption of cotton goods has been materially restricted, so restricted as to warrant the presumption that with consumption the coming year full and active all the spindles in the country will find constant and profitable work.

The conclusion that the home demand for cotton goods has not been normal in recent years finds support in the figures which represent the cotton consumption of our mills for a series of years. Thus from Sept. 1 1883 to Sept. 1 1888 (five years) the total consumption by Northern and Southern spinners was 10,031,375 bales of cotton. or an average for those years of 2,006,275 bales. For the five years later than the foregoing, that is from Sept. 1 1888 to Sept. 1 1893; the total consumption was 12,586,259 bales, or an average per year of 2 517,252 bales. Carrying the compilation forward another five years, from Sept. 1 1893 to Sept. 1 1898 the corresponding total was 13,930,912 bales, the average per year being 2,786,182 bales. From the foregoing averages we learn that in the second period named (1888-93), while population increased about 6,500,0 0, the annual average of cotton consumption increased 510,977 bales; but in the third period (1893-98), while population increased about 7,200,000, the annual average consumption of cotton increased only 268,930 bales. Assuming that the increase in annual average consumption in the second period (510,977 bales) was normal, it is obvious that the normal increase in the annual average production for the following five years ending with Sept. 1 1898, instead of reaching only 26,930 bales, could not be less but must be more than in the previous cycle; how much more may be roughly estimated by the growth in population, which, as given above, increased in the earlier cycle about 6,500,000 and in the latest cycle 7,200,000, an excess in growth during the latest period of a little over 11 per cent.

In other words, the foregoing makes evident the existence of a general industrial depression and of a restricted home consumption of cotton much below the normal the last five years of the record. Indeed we might have gone further and demonstrated that the country has not had since 1879 to 1882, inclusive, but a single twelve months when our industries were so generally prosperous that the call was for a supply of goods equal to the normal wants of the people. The country has in truth rested under the incubus of an enforced silver circulation, increasing year by year ever since gold payments were established, and though there have been times when conditions have prevailed which for a period suspended in a measure the baleful effect of that depressing influence, it has existed all the same, and has in one way and another disturbed our industrial progress and so kept the consuming power of the people more or less restricted all the time.

But we must omit on this occasion any extension of the period reviewed. The above figures and statements do not leave any ground for questioning the assertion made that the consumption of raw cotton by our mills North and South has been much below normal during the five years which ended with the 1st of September. There are, though, No one can other means for enforcing the same truth. doubt that a general increase in stocks of goods is, under the circumstances, an evident indication of a shortened consumption of products; the fact is such a shortened consumption becomes more obvious through that process perhaps than in any other way. What has been the condition in recent years as to stocks of cotton goods? Is it not manifest to the whole trade-indeed has it not been a constant complaint of that trade-that stocks have become extremely troublesome, and increasingly so the last three seasons? This too has been concurrent with movements which must have tended to relieve the situation-a large addition to our exports of cotton goods and a decline in their import. In our remarks below with reference to the print cloth department we have given facts showing the accumulations of that product which not only illustrate but very strikingly enforce what we have said here. Put this condition of stocks of the manufactured article by the side of the fact previously disclosed, that the consumption of raw material has not shown the normal increase, and does not the demonstration stand complete? That is to say, not only

has the use of cotton by the mills been materially restricted but a large addition to the exports and a large decline in the imports of cotton goods have also been in progress, and yet our people have not absorbed the unexported portion of our manufactured cottons. It may be asked then what becomes of the vexed question as to spindles having increased until they are more numerous than the needs of our population can keep running? It is sufficient for us to say on that point that the claim has never been tested, and until it has it cannot be proved. Moreover, the obvious presumption is, from what has been shown in the foregoing, that it is not a fact; and if we had the time and space we believe we could make it clear to any unprejudiced mind, through a separate study of the spindles, their growth and the growth in wealth and population of the country, that they are not too numerous and have not reached the point of excess.

The foregoing leaves the question of profitable consumption the coming twelve months of our Eastern mills with only the business outlook to deal with. We do not need to write at any length of the assurance the country now has of a term of activity and prosperity much more decided than we have had the promise of for a long time. vere storm often clears the atmosphere saturated with depressing and enfeebling tendencies and charges it with invigorating and reviving forces, so the war has cleared away many conditions which had become a constant source of irritation to our industries and has substituted others which are giving new life and energy to our entire popula-We are having now a timely illustration of the restorative influence which the war has worked. Heretofore at about this period of the year "a tremor of silent fear" has been wont to pass through and through business circles. Every one would be asking his neighbor, we wonder what Congress, when it meets, will do to kill off our incipient trade revival? Sure enough it would be something-perhaps Cuba, or Venezuela, or free coinage, or paper inflation-something would be used as the text to endanger our standard of values and so deaden the hope just springing into life. The war has put all that behind the nation. We need not go into details, but it is obvious to every one that we have risen to a new plane of action. All the old disturbing issues have lost force, and whatever little vitality may have been left in any of them the march of events will work off gradually.

But prosperity to be natural must be slow in its return; and no one should be disappointed if its progress be almost imperceptible for a time. Accumulations of goods where they exist must be absorbed. When consumption has become active enough to take off ful current production and to encroach, be it ever so little on stocks, the term of trial will have passed. Even then, though, progress in manufacture to be lasting must find us able to produce goods at a low cost, so as to be in condition to compete, as our iron furnaces are to-day, with any country which may prove to be our rival in trade. If there is one feature that marks the character of the passing industrial epoch, it is the tendency to cheapen production. Among the first to give conspicuous evidence of the movement were our railroads, forced by the low price of products to make a low cost of freight. They have at length, through this pressure, reached conditions which enable them to accept marvelously low rates and find a profit in them too. The agriculturalist has at the same time been working out the same problem. In our acreage report this year we showed one of the ways in which the average planter had been able to find a profit in the extremely low price for the raw material. This is the tendency the world over and in every department. As already said, revival in trade will surely come, and for a time will put into profitable action every spindle in the land; but to keep up progress all effort will have to focus on a continued study of the problem to cheapen production. The old high price and wide margin of profit are not likely ever to return.

Only a few additional details are needed; they are historical and are required to fill out the record of influences affecting the goods trade during the year closing with the 31st of August. They in some measure help to explain the slack and lifeless character of the demand for goods during the twelve months. The start was a mistake. Emotion

and not greater eagerness among buyers was at the bottom of it. Tariff legislation having reached a finish just before the season opened, it was assumed that the long-looked-for good time had come. As a result of this belief cotton mills which had been partially or wholly idle in July and August resumed at a jump operations in full. In fact, before the middle of October all the mills were not only running as usual, but in some cases resort was had to night work. This period of activity was, naturally enough, short-lived, for almost before the close of the mon h it was found that the product of the mills was not being absorbed, and propositions to curtail the output began to be discussed.

Out of this state of affairs arose a complaint about wages. The special ailment urged for the depression in the goods market was the cheaper cost of production in the South, the claim being (chiefly by corporations engaged on goods with which Southern mills came in competition) that the higher wage scale at the North operated to that section's disadvantage and a readjustment should be arranged. No definite agreement was reached until near the close of 1897, when the continued enlargement of stocks of goods forced action. A reduction in wages ranging from 10 to 11 per cent was finally decided upon, and notices to that effect were about the middle of December posted in the mills signifying that the new scale would go into force in January. Strike talk followed, but the Fall River operatives finally accepted the terms offered; at New Bedford the men stopped work Jan. 15, and returned to work April 11 at the lower wages. Labor troubles occurred at other points, with the same result as at New Bedford. Indeed, before the latter date war with Spain was seen to be an inevitable event, a state of hostilities becoming actual about the close of the third week of April. From that time until the first week of August business conditions have remained quite uniformly unfavorable, and most kinds of manufacture, and among them cotton-spinning, have been greatly depressed and as a rule unremunerative. With August came the certainty of peace, and day by day as the month passed consumption of products increased and our industries assumed a more active condition.

We have referred above to the situation of the print cloth department and to the accumulations of stocks of goods in that department during recent years. It so happens that we have left ourselves but little room to discuss these matters. The figures as to stocks are full of significance bearing upon the conclusions already reached, but we have in the foregoing so fully explained their relation to the subject under review that we shall do but little more here than to state the facts; fortunately they need very little interpretation. We have prepared the following statement from our records. It gives in quite a graphic form the leading features for a series of years in the history of this industry:

Year, Sept. 1	-Average First	Second	_	Year's cot-	Population Sept.1, Gov.
	6 months.	6 months.	Year.	tion in U. S.	estimate.
	1,674,000 *		1,837,000	3,083,939	73,199,000

Av'ge5 years	625,070	647,200	636,135	2,006,275	56,482,000

\*Our estimate.

We would recall the circumstance that the reports of print cloth stocks were suspended in March and April 1897, their publication was resumed in May but was finally discontinued on December 25 1897, when the total reported was 2,285,000 pieces. Our investigation leads us to believe that the aggregates of these stocks, though they have fluctuated within narrow limits, were not materially changed from the total given above until about August 1 1898. Since that date they have declined possibly about 300,000 pieces and close the year at say about 1,900,000 pieces. Our table, as will be seen, gives the average of stocks for each six months and year from September 1 1898, besides two columns, one of which shows the total

annual consumption of cotton by our mills North and South and the other the population on the first of September 1897

and on the same day of each earlier year.

The financial results from the operations of manufacturers of print cloths have been unsatisfactory, as the remarks already made indicate; indeed they have been less satisfactory than in 1896-97, and probably less satisfactory than any year of the recent unfavorable cycle. Heretofore the lowest price reached for 64 squares was 2.44 cents in June 1997 (with low middling uplands at the same time 73% cents) and in July and August 1896, with same grade of cotton concurrently 71/4 to 75/4 cents; this season, in the early part of May, the quotation dropped to 1.94 cents, with cotton at 5% to 6% cents, and from April to August with cotton 5 5 16 to 61% cents, 64 squares were at no time better than 2 cents. The range for the season has been from 1.94 cents to 2.62 cents and the average about 2.20 cents. Below are the highest and lowest quotations for 64x64 print cloths for the past twenty years:

High.	Low,	High,	Low.
Ota	Cls.	Cis.	Cts.
1897-9822	1.94	1887-884.00	3.25
1896-972-62	2.44	1886-873-30	3.22
1895-963.06	2.44	1885-863.38	3.04
1894-952.88		1884-853-28	2.97
1893-943-00	2.61	1883-843-69	3.25

e.—Sheetings—Agents' prices (for Atlantic A) are given. Printing are manufacturers' net prices. Discount on standard aheetings out invariably 5 per cent. For Lancaster ginghams the prices in seent season are subject to a discount of 5 per cent.

The foregoing indicates that other staple products of cotton as well as print cloths have reached a lower level of prices the past season than ever before. It is of course a fact that manufacturers were able to secure their supply of the raw material more cheaply than in either of the two preceding seasons, but it will likewise be recalled that both 1896-97 and 1895-96 were very unsatisfactory years, the margin above actual cost being much of the time quite shadowy. Comparison with 1894-95 brings out most clearly the unfavorable outcome of 1897-98. As the mills obtain their supply of the raw material wholly or in great part during the first half of the season-Sept. 1 to Feb. 28-it is only fair to take the average price for that period as giving an approximate idea of its cost to them. Following that plan we find that in the New York market the average price for low middling, Sept. 1 1897 to Feb. 28 1898 was 5% cents, against 5% cents in 1894-95, or 1/4 cent per pound higher this year. On the other hand, they received during the season just closed an average of % cent less per yard for standard sheetings. % cent less for ginghams and 55 one-hundredths of a cent less for print cloths than in 1894-95. So far as the raw material is concerned the price has been low throughout the twelve months, a not unnatural result of so phenomenally large a crop. At the same time the lowest quotation in 1897-98 for low middling in the New York market was 5 5-16 cents, or 3-16 cent higher than the bottom price in 1894-95. The average for

the year, however, has been only 5 13-16 cents, or the lowest ever recorded.

Southern cotton mills, as already indicated, have shown more satisfactory results. It is needless to say that the margin of profit has not been so wide this year as in 1896-97, but the mills nevertheless have generally made money, and now that the war is a thing of the past manufacturers consider the outlook for the future highly promising. The production of goods has been quite fully up to the capacity of the establishments, and in many instances operations have been carried on by night as well as by day. A further expansion of spinning capacity is to be recorded. Following our usual custom we have gathered this year the full data obtainable bearing upon the operations and development of Southern factories. Within the past month not only have we procured from each mill returns as to actual consumption of cotton in bales and pounds and the number of spindles and looms added, working and idle, the past year, but have also secured considerable information with regard to new mills now building and contemplated additions to existing plants. The returns made to us have been extremely prompt and complete, so that we can to-day give the actual condition in these particulars of almost every factory in the South. Evidence of the continuation of the tendency at the South to build larger mills or increase the capacity of old ones is not lacking in our returns. The number of spindles per mill in the last season reached 9,143 against 8,526 in 1996-97, 7,870 in 1895-96, 7,889 in 1894-95 and 6,751 in 1893-94. The aggregate of spindles in 1897-98 was 711/2 per cent greater than in 1892-98 and 113/4 per cent more than in 1898-97. It is worthy of note that the increase in the consumption of cotton by Sou hern mills the past season has been 203,457 bales as compared with 1898-97, or almost 20 per cent, whereas in the previous season the gain was only 108,672 bales, or barely 12 per cent. In the seven years since 1890-91 consumption has more than doubled. The aggregates of our detailed returns arranged by States are as follows. should be remembered that these figures include (1) mills in operation all this year; (2) new mills started up during the course of the year, and (3) also a few mills which have been in operation this year but have now temporarily stopped expecting to start up again in 1909.00

Nors.—Much new machinery has been put in operation within the ust few months, increasing the number of spindles appreciably ithout affecting consumption to any extent.

These returns for the last six years include, as heretofore' only the spindles in operation and those shortly to start up again. In a subsequent table for the whole country we include those idle for a year or more, omitting only those that are old and useless and permanently out of employ. It further appears from the returns made to us that there have been 5 old mills running 17,200 spindles stopped, and 21 new mills running 146,494 spindles started, making a net addition of 16 new mills running 129,294 spindles during the year. Moreover, the total new spindles added this year is 377,209 net, showing that 247,915 of these spindles have been an increase in the spining capacity of old mills. Aside from the above we have knowledge of 5 new mills containing 61,692 spindles which expect to start up within a short time, and

there are 8 mills in course of construction but which will not be in operation until after the first of January. Extensive additions to old mills, aggregating fully 150,000 spindles,

are also contemplated in the near future.

Before passing from this subject of manufacturing in the United States there is one other point that claims attention, and that is the exports of domestic cotton goods. This movement the past season has been appreciably less than in 1896-97 and but slightly greater than in 1895-96. ing off in shipments has been quite general but most decided as regards those to British North America, which record a decline of nearly 50 per cent. Even the shipments to China via Vancouver, B. C., which do not appear in the Government returns, were much less than in any recent year, having been only 20,393 packages containing 12,270,600 yards, against 34,845 packages, or 24,574,600 yards, in 1896-97, 26,720 packages or 18,027,-600 yards in 1895-96, 21,230 packages or 13,398,000 yards in 1894-95 and 30,309 packages or 20,589,000 yards in 1893-94.

In the table below we merely give the aggregate exports as reported by the Bureau of Statistics and they exhibit a loss the past year of \$4,013,586. But by referring to the detailed statement published in the CHRONICLE August 6, p. 280, it will be seen that the exports to British East Indies alone record any great measure of The official record of the last five years is as follows:

	Year Ending June 30-

tures exported . Value.	\$17 CQ   OQQ	891 097 678	\$16 RR7 996	813,759,810	\$14.340.6PS			

A similar exhibit covering India's shipments we have also given for a number of years by way of comparison. It should be borne in mind that if we were to go back to 1876 India's total would be very small, the value for that year having been but £663,000, or say less than 31/2 million dollars, while that of the United States for the same year was \$7,722,978. The record for the last six years has been as follows:

Cotton.	1897-98.	1896-97.	1895-96.	1894-95.	1893-94.	1892-93.
Twist & yarns	£ 6,955,452	£ 7,173,108	£ 6,730,836	£ 5,672,094	£ 4,974,133	£ 6,773,489
Manufactures	1,184,506	1,323,366	1,618,750	1,466,656	1,968,425	1,827,175
Total	8,199,988	8,498,474	5.344.586	7.138,680	6.242.558	8,100,657

137 The official figures are given in rupees, and we turn them into pounds sterling on the basis of ten rupees to a pound. That of course does not make allowance for the depreciation of the rupee, but under the circumstances it probably makes the comparison as nearly correct as it can be made in values.

As to the number of spindles in the United States, there is not much to be said. There is a moderate number idle now in the North, but the stoppage is only temporary. Apparently there has been no increase in spindles at the North this year. At the South, according to our returns, through new mills and additions to old factories, there has been a gain of 213,753 spindles. With this year's changes the number of spindles in the whole country at the close of 1897-98 and of the previous five years would be as stated in the subjoined table. It should be said in explanation of our compilation of total spindles that this statement represents all mills whether in operation or not (except such as have been closed with no present intention of starting up again), whereas the details of Southern mills by States given previously represent only mills in operation in some portion of 1897-98, or about to start up.

Spindles.	1897-98.	1896-97	1895-96.	1894-95.	1898-94.	1892-93.

Total	17,570,290	17,356,537	16,811,196	16,138,948	15,841,084	15,641,023

American spinners close the year with moderate stocks of cotton. The takings through the year of Northern and Southern spinners have been given as below:

Total supply during the year ending Sept. 1 1898...... 11,260,964

Of this supply there has been exported to foreign perts during the year7,532,615	
Less foreign cotton included bales. 78,359 - 7,454,256 Sent to Canada direct from West	
Stock on hand end of year (Sept. 1 1898)—	
At Northern ports	-7,756,946
Tot. tak'gs by spinners in the U.S. for year end. Sept. 1 1893. Taken by Southern spinners (included in above total)	3,504,018 1,227,939
Total taken by Northern spinners	2,276,079

\*Burnt includes not only what has been thus destroyed at the North ern and Southern outports, but also all burnt on Northern railroads an in Northern factories.

These figures show that the total takings by spinners "orth and South during 1897-98 have reached 3,504,018 bales, of which the Northern mills have taken 2,276,079 bales and the Southern mills 1,227,939 bales. Our summary of takings and consumption on the basis of no stocks in the hands of Northern spinners on September 1 1875 reaches the following results. The width of our columns compels us to omit the results of the years 1875-76 to and including 1891-92.

Takings and Consumpt'n.	1892-93.	1893-94.	1894-95.	1895-96.	1898-97.	1897-98.
Taken by— Northern mills Southern mills	Bales. 1,747,314 739,701	Bales. 1,613,971 723,329	Bales. 9,154,170 858,359		Bales. 1,869,565 1,024,489	
Tot. takings from crop Stock held by mills	2,481,015 810,982					8,504,018 79,696
Total year's supply	2,791,947	2,445,546	3,084,739	2,747,941	9,939,178	3,583,714
Consumpt'n (estimated)— Northern mills Southern mills	1,950,000 733,701	1,675,000 723,329	2,040,000 853,352		1,835,000 1,094,482	
Total consumption Tot. supply as above			2,993,352 3,054,739			
Leav'g mill st'ks Sept. 1	108,944	47,917	161,887	59,131	79,696	499,775

The foregoing leaves stocks in spinners' hands at 499,775 bales, and shows that the United States consumed 3,083,939

Europe.—There is very little to be said about the spinning industry in Europe which has not been quite fully developed in our monthly record with reference to Manchester and Liverpool given below. The chief favorable influences have been the large crop and declining price of cotton in the United States; a good monsoon and the breaking of the drought in India; better conditions for the distribution of goods in Turkey; and as the year has advanced an increased demand for goods from South A1\_ srica and some other countries. The unfavorable influences have been the war be tween Spain and the United States; the disturbance of the political situation in Europe chiefly growing out of the action against China, first of Germany and subsequently of Russia; and the appearance of the bubonic plague at Calcutta, the last being in its influence quite temporary. As a result of all these happenings the exports of goods from Great Britain have increased; the total reduced to pounds for the twelve months ending with October 1 1898 (the last two months being estimated) was 1,276,109,000 pounds, against 1,211,-897,000 pounds in same months of 1896-97, and 1.298,259,000 pounds in 1895-96. The takings of goods for the home trade are presumed to have aggregated about as last year, when they were fairly satisfactory.

We frequently see it stated that the cotton spinners of Germany or of some other European State are rapidly displacing Lancashire goods in the markets of the world. Such a statement conveys an erroneous impression. Very likely there may be a modicum of truth in the suggestion; that is, it may be true that some one quality or kind of goods has crowded out a similar English make. But that is a special matter. It indicates nothing which can have any general application. On the contrary, it is a fact that Great Britain's consumption of cotton and the world's consumption of the products of its spindles have been all the time on the increase. These are conditions evidently inconsistent with the conclusion that its trade is being rapidly displaced; this increase, too, is the more noteworthy when we remember that during recent years a higher tariff has been adopted by the United States and protective tariffs have been adopted by nearly every European State; tariffs which were devised to operate and have operated to the disadvantage of the markets in those countries for British goods. Moreover, India during the same period has become quite a manufacturing centre, with an annual increase in spindles, while Japan and China have also made a substantial beginning in the same

direction. How this growth in spindles has progressed during recent years is an interesting study. For the purpose of indicating the development, we have prepared the following statement of the world's spindles for five years. The figures for Great Britain and the Continent are Mr. Ellison's; those for the United States are our own; the others are official, except those for China, which are made up chiefly from the Consular reports.

NUMBER OF SPINDLES IN THE WORLD.

1897.	1896.	1895.	1894.	1893.

It should be said with reference to the figures in the above for Great Britain that although as they stand they disclose a small decrease, that decrease is only in number; the ca pacity of the spindles for making goods and consuming cotton has at the same time been materially growing by the substitution of new spindles for old style. The extent of the added productiveness can be better estimated when the annual consumption of cotton is stated, as it will be directly. It should be noted that a like change in the relation between the number and capacity of spindles has been in progress in other countries as well as in England. In other words the average consumption of cotton per spindle has been all the time on the increase except it may be where there is a reduction by the manufacturer to finer counts of yarn. Consequently when it is stated that there is an enlargement during the last five years of over six millions of spindles in the world, it is to be borne in mind that those figures do not measure the increased capacity to manufacture goods. As already said, we get a better idea of the progress making in spinning through the consumption of cotton the same years, though even that is not an exact measure.

The cotton takings and consumption by the mills of the world are set out in our customary tables which follow. Using the briefest method for illustrating the statement made above as to Great Britain's consumption (that is using the six years' averages), we find the consumption of that country from the six years' average ending with September 1 1872 of 2,117,000 bales (of 500 lbs. each) has increased every six-year period since that date as follows: For the six years ending with September 1 1878 the average yearly increase was 376,000 bales; for the six years ending September 1 1884 the average increase was 283,000 bales; for the six years ending with September 1 1890 the average increase was 210,000 bales; for the six years ending with September 1 1896 it was 212,000 bales, and the average for the two years since to September 1 1898 has been 117,000 bales. A similar conclusion is also reached from an examination of the exports of cotton goods from Great Britain; they may fall off for a single year from some specially severe cause, but on the average there is a constant growth. The statement (reduced to pounds) by quarters for the last two years is as follows. These years end with October 1 and the last two months of the last quarter are estimated on the basis of the July movement. Three ciphers are omitted.

Estimated for the quarter on the July move Our totals of pounds in the foregoing are of course inexact. We prepare them ourselves and believe them to be fairly close approximations. It must be borne in mind also that the current year's figures are estimated for the last two months of the last quarter, but the previous year's results are the completed official totals in all respects, except that the aggregates in pounds are prepared as just stated. estimate for the last two months of this season is not excessive, the shipments have been greater in 1897-98 than in

we have kept the record in this form), only excepting 1895-96 and 1894-95.

Notwithstanding the derangement in trade in portions of India, due to the reappearance of the bubonic plague, the shipments of goods from Great Britain to that quarter the shipments of goods from Great Britain to that quarter this year indicate a quite important increase. The movement to China and Japan has also been greater than in 1896-97, but the exports to those countries have been less than in 1895-96. We give below a statement showing first the shipments of goods and yarns by Great Britain to India, stated separately for two years, and in subsequent columns the similar figures for China and Japan given together. Each movement is presented in three columns; the first column covers yarns in pounds, the second piece-goods in yards and the third the total of both yarns and goods in pounds. Three ciphers (000) omitted.

It will be observed that the season of 1897-98 opened with manufactured products ruling lower in value than at the same time in either 1896-97 or 1895-96, but the raw material was also much lower. But before the close of January the comparison with last year was more favorable to the current season, for while cloth was quoted slightly higher than a year ago, cotton was appreciably less in price. In fact the season as a whole has been more favorable to the weaver than 1896-97, for we find that the average quotation for middling upland cotton in Liverpool has been only about 31/2d. against 4 3-16d. in 1896-97, whereas on the other hand shirtings have averaged about 5s. 43/4d. this year against 5s. 5d. last season.

We now add by months the course of the Manchester goods market during the season closing with August 31 1898 and also the Liverpool cotton market in the same form for the same period. These summaries have been prepared for this occasion with great care, and the details will, we think, prove. an interesting and useful record for reference.

SEPTEMBER.-Manchester.-In some branches of the cotton goods trade there was a little better demand during September 1897 than in August, but marked depression in other departments affected the general market adversely. As a rule business was unprofitable; this condition led manufacturers to take steps to ascertain whether combined action among employers could not be made effectual in reducing the cost of production. The feasibility of bringing about such a result by a reduction of wages was quite extensively discussed, but while progress was made no settlement had been reached at the close of the month. Pending further consideration of the matter a curtailment of production was encompassed by running on short-time and any one of the last fourteen years (the period during which by partial stoppage of machinery. A highly favorable

Indian monsoon; on the other hand some uneasiness was felt because of reports of the spread of the bubonic plague. Yarns and goods exported from Great Britain (all reduced to pounds) were only 94,911,000 lbs., against 109,519,000 lbs. in September 1896. Consumption of cotton was estimated by Mr. Ellison at 64,000 bales of 500 lbs. each per week in Great Britain and 84,000 bales of like weight on the Continent. Liverpool.-As a result of favorable crop reports from America, accompanied by large estimates of the yield and a disappointing demand from consumers, the general tendency of the market for cotton was downward. Middling uplands opened the month at 41/8d., and after fluctuating 1-32d. at a time was quoted at 41/ad. again on the 15th. Subsequently the fall was almost constant, the decline being assisted by the heavy crop movement; the price at the close was 3%d.

OCTOBER.-Manchester.-Business in cotton goods showed improvement in several respects in October; not only was the aggregate volume of transactions greater than in the preceding month, but the margin for profit was better and quotations were more firmly adhered to. The improvement did not extend to all branches of the trade however, for in a number of departments dealings were of a hand-to-mouth character, orders much of the time being insufficient to keep machinery fully employed. Reports from India were on the whole more encouraging, good crops being promised in the sections where famine so long prevailed; at the same time advices from plague districts as well as news from the frontier war were disquieting influences. In spite of these set-backs the most satisfactory development in the business for export was the demand from India, orders from other quarters having been strictly moderate or small. At home the continued troubles in the engineering industry and the inability to quickly reach a settlement of the wage question in the cotton mills were adverse features. Among manufacturers those spinning their own yarn were most favorably situated, as they were able to take advantage of the decline in the price of the raw material. Much of the business done bore a speculative character, as spinners bought the cotton not when the order was booked but when it was completed. This method proved profitable as the raw material continued to decline. Exports of yarns and goods were somewhat greater than in September, reaching 100,-816,000 lbs., but smaller than in October 1896, when the total was 105,291,000 lbs. Consumption was estimated the same as in the preceding month. Liverpool.-The market for cotton opened the month in a hesitating mood and fluctuations were within narrow limits. Between the 1st and 8th there were frequent changes in prices up and down, but they counterbalanced each other, middling uplands being quoted at 3 27 32d. on both dates. Subsequently, however, as a result of the neavy crop movement, and notwithstanding the good spot demand, cotton steadily declined, middling up-lands closing the month at 33d., or a loss of 15-32d. from the opening.

NOVEMBER. - Manchester. - The improved conditions so manifest during the preceding month continued to be noticeable in a number of branches of the cotton goods trade in November. Transactions were somewhat more extensive in amount and at more satisfactory prices. But in some instances neither the volume of trade nor the financial return therefrom was of a favorable character. On the whole, however, the situation was more encouraging than of late, as at the close of the month manufacturers were better fortified with orders than for some time past. In fact, by the end of the month a few had booked sufficient orders to keep machinery fully employed well into 1898. The course of the market for the raw material was favorable to the manufacturers, the early decline enabling them to accept orders formerly refused, while the temporary check in the downward trend of American cotton about the middle of the month brought out orders which had been held back in the hope that they might be placed on a more advantageous basis. As regards India, a more hopeful feeling was apparent, notwithstanding the fears entertained in some quarters that the plague would be an important feature again this season. The varying aspects of the wage dispute was an element of uncertainty, no settlement having been reached. Yarns and goods exported from Great Britain were during November 112,562,000 lbs., against 99,185,000 lbs. in the

feature of the month was the satisfactory progress of the month of 1896. No change was made in the estimated weekly rate of consumption. Liverpool.-The heavy crop movement in the United States was the controlling factor in the market for the raw material. While it did not bring about any decided decline in prices, the general tendency of quotations was downward. Opening at 3 11-32d., middling dropped 1-32d. at a time until 3 7-32d. was reached on the 9th. A rise of 1-16d. on the 12th was followed by a similar loss on the 14th and a recovery of 1-32d. to 31/4d. on the 16th. At this figure the month closed, after fluctuations of 1-32d., up or down, during intervening days.

DECEMBER .- Manchester .- The month opened upon a quiet market for cotton manufactures, but quotations were generally well maintained. The wage question was finally settled December 7 by the employers withdrawing their proposal after the operatives had, by an overwhelming majority, voted against acceding to any reduction. Probably the fact that the trade conditions had improved since the first of September was the influence which led to the abandonment of the effort. About the middle of the month a better demand from India, and more activity in other directions brought transactions up to a fair aggregate, but subsequently a period of quiet supervened which continued to the close of the month. Exports of yarns and goods from Great Britain, while less than in November, were greater than in most other months of the year 1897, reaching 108,451,000 lbs., against 106,274,000 lbs. for the similar period of 1896. Mr. Ellison's estimate of consumption was the same as for preceding months. Liverpool. -The market for the raw material presented no features of importance during December. The continued liberal movement of the American crop was of course a source of some uneasiness, but prices were nevertheless quite steadily held. Middling uplands opened the month at 31/4d. and closed at the same figure, after having fluctuated within a narrow range. In fact, not until the 8th was there any change at all, a drop of 1-32d. on that date being followed by a similar loss on the 10th. A rise of 1-32d. on the 13th was lost on the 16th, recovered again on the 21st, and an addition of 1 32d. on the 30th brought the price back to 31/4d.

JANUARY .- Manchester .- The outlook at the opening of the new year was more promising. Among the encouraging features were the decline in cotton, which increased the margin. The truth is that all through January there was also a more satisfactory demand for goods and transactions were in larger volume. At the close of the month manufacturers were said to be better supplied with orders than for some time previously. Greatest activity was displayed in dealings for the Far East, but business for India fell off somewhat in the last two weeks on unfavorable news from that quarter, advices indicating an increase of the plague. Yarns and goods exported from Great Britain were during the month 112,341,000 lbs., against 109,198,000 lbs. in January 1897. The estimated consumption of cotton for the month in Great Britain was advanced to 63,000 bales per week by Mr. Ellison and he increased the rate on the Continent to 87,000 bales. Liverpoo'.-Much the same' conditions were manifest in January as controlled the December cotton market. Demand was sufficiently active to hold prices fairly steady, notwithstanding the continued free marketing of the American crop. At the same time the heavy movement held in check any tendency to advance quotations. Middling upland was quoted at 31/4d. on the 4th inst. and dropped to 3 7-32d. on the 6th, but recovered the loss on the following day. A decline of 1-32d. occurred on the 11th and a similar falling off on the 18th carried the quotation down to 33-16d. No further change took place until the 26th, when 3 7-32d. was again reached, and at that price the market closed after a net loss of 1-32d. from the opening.

FEBRUARY .- Manchester. - The developments in the cotton goods industry during February imparted new strength to the situation. This was largely due to the leading incident of the month, which was an upward movement in the price of the raw material after a long interval of unusually narrow fluctuations. The rise in value of cotton stimulated the demand for both yarns and cloth, resulting not only in a very favorable volume of trade but making it possible in some instances for producers to obtain enhanced prices. A degree of uneasiness was occasioned by the increased mortality from the plague in Bombay, but reports from that

quarter indicated that trade was not by any means so badly disorganized as at the same date in 1897. Purchases for China and South America were heavier than for some time previously. At the close of the month many manufacturers were quite well supplied with orders. Exports of yarns and goods from Great Britain in February reached a total of 104,205,000 lbs., against 91,789,000 lbs. for the corresponding period of 1897. No change was made in the estimated weekly rate of consumption. Liverprol.-At the opening of the month an increased demand for consumption imparted strength to the market and stimulated an upward turn to values. On the 4th a rise of 1-32d. was established, and a similar gain on the 7th carried middling uplands to 81/4d. The 8th witnessed an increase of 1-16d., and the same was true of the 10th. A loss of 1-32d. on the 11th was recovered on the 12th, but the quotation fell back again to 3 11-32d. on the 15th. Prices were marked up 1-16d. on the 23d and 1-32d. on the 24th and 26th, middling upland ruling at 3 15-32d, on the latter date. The market closed at 3 7-16d. or a gain of 1/4d. over the opening.

MARCH.-Manchester.-The conditions which prevailed in the goods market in March continued in the main favorable. No general activity was manifest, but in a number of lines transactions of considerable volume were effected, while in others the orders booked were sufficient, in conjunction with contracts previously obtained, to enable manufacturers to assume an attitude of firmness in making negotiations. The fluctuations in cotton were an unfavorable feature: the tendency was downward until the closing days of the month, when the loss was recovered. In the dealings for goods for foreign account the chief feature was the demand from India, which was quite satisfactory. The inquiry however was mainly from Calcutta, reports from that point indicating a steady recovery from the effects of the famine. But Bombay merchants also made moderately large purchases, despite the increase of the plague. For some of the South American countries fair sales were recorded. The threatening aspect of affairs in Cuba and the political tension in China were of course unsettling influences. Altogether, however, the month's trade reached an encouraging aggregate and a fair profit was as a rule secured. Yarns and goods exports from Great Britain in March were not only of heavier total than in any preceding month of the season, but exceeded the shipments for any similar period on record. They reached 124,775,000 lbs., against 110,391,000 in March 1897. It is furthermore a fact that the exports for the half-year ended March 31-649,640,000 lbs.-were greater than for the corresponding six months in any previous season. The rate of consumption by the mills was estimated the same as in February. Liverpool .- The market for the raw material was a declining one most of the month, in part a natural reaction from the previous advance, but also scribable in large measure to the situation in Cuba and China and to a lighter spinning demand in America and on the Continent. At the close of the month, however, an advance set it, under which all the earlier loss was recovered. On the 1st day of March middling uplands stood at 3 7-16d. and advanced to 3 15-32d. on the 2d. Losses of 1 32d. were recorded on the 4th, 8th, 11th, 14th and 24th, the quotation on the last-mentioned date being 8 5-16d. Gains of 1-16d on the 29th and 31st carried the price back to 3 7-16d.

APRIL.-Manchester.-Business in the cotton goods market during April was characterized by firmness of tone and a hardening tendency of values, resulting from the rise in price of the raw material incident to the trouble between the United States and Spain. The idea entertained in Liverpool was that war would restrict the free movement of the raw material from America. Dealings in goods reached a very satisfactory aggregate at first, but the marking up of yarns and goods which followed the advance in the raw material tended to check the inquiry. An unsettling influence in the market for India was the further spread of the plague. A subsidence of the trouble had been looked for with the advent of warm weather, and consequently the unfavorable reports caused disappointed and derangement of business affairs. On the whole, though, a very fair trade was reported for the month, the demand for South America and Central America having been much better than for a long time previously. Machinery was well employed at the close. Exports of yarns and goods from Great Britain reached 95,-659,000 lbs. against 91,079,000 lbs. in April of 1897. The preceding month's rate of consumption was maintained, Liverpool.—News from America bearing upon the contention with Spain over Cuba was the controlling factor in the market for the raw material in April. During the first half of the month the quotation for middling uplands was steadily maintained at 3 7-16d., but when it became quite certain that war between the United States and Spain could not be averted, a sharp rise set in, owing to the demand from buyers who feared that hostilities would serve to curtail the supply. An advance of 1-16d. en the 15th was followed by a similar addition on the 18th, and a gain of ½d. on the 20th. The succeeding day the quotation rose another 1-16d., to 3 21-33d. Subsequently demand slackened, an easier feeling prevailed and prices receded somewhat, middling uplands closing the month at 3 9-16d.

MAY .- Manchester .- The goods market lost tone and activity in May as compared with preceding months of the year. Among the influences which operated to bring about this less satisfactory condition of affairs, the most potent were the outbreak of the plague at Calcutta, which checked business at that point, and the uncertainties introduced by the war between Spain and the United States-not as to the ultimate outcome of hostilities but as to their duration and the resulting complications. While there was a fair inquiry in some departments, buyers generally were not disposed to make purchases beyond what was required to supply the current demand and to maintain assortments. Producers consequently had to depend largely upon previously-booked orders to keep machinery employed and in some instances looms were stopped in order to curtail the output. Manufacturers were less fully under contract at the close of the month than at the opening. Transactions in yarns were smaller than for some time previously. The exports of yarns and goods from Great Britain in May were 99,069,000 lbs., against 98,895,000 lbs. for the same month of 1897. Estimates of consumption of cotton were unchanged. Liverpool.-The market for the raw materia ruled quiet pretty much all the month. The decisive American victory at Manila on the first of May encouraged expectations of an early termination of hostilities, and in consequence prices took a downward turn, middling uplands falling off 1-32d. on the 3rd and also on the 4th. On the 6th and 7th the decline was fully recovered, but between the 11th and 17th the quotation receded to the figure reached on the 4th (3 17-32d). An advance of 1-32d on the 19th and 1-16d on the 24th carried middling uplands to 3 5-8d. at which it closed the month.

JUNE. - Manchester. - The cotton goods market during June was largely under the control of the influences which operated to restrict transactions in the preceding month. In consequence of the plague the demand for Calcutta was extremely light and the war between Spain and the United States served to curtail the inquiry from other markets. In fact, buyers seemed indisposed to operate at ruling quotations, except to an extent sufficient to meet urgent requirements. As this continued falling off in new business left an increasing number of manufacturers without orders, the position of producers weakened; this led to concessions being made and a fair volume of transactions was recorded in some departments. The difficulty experienced in effecting sales was augmented by the declining tendency developed in cotton under acreage advices for the new crop from the United States. Exports of cotton manufactures from Great Britain for the month reached a total of 103,230,000 lbs., against 90,660,000 lbs. in 1897. Consumption was estimated the same as in the previous month. Liverpool-Acreage and condition reports from the United States were an important element in shaping the course of the market for the raw material during June. The tone was weak throughout and the general tendency of prices downward. Opening at 3 19-32d., middling uplands declined to 3 9-16d. on the 3d, and so ruled until the 18th, when a further drop of 1-32d. occurred. The 20th witnessed a loss of 1-16d. and a decline of 1-32d. on the following day carried the quotation down to 3 7-16d., and this price was maintained to the close of the month.

JULY—Manchester—The situation in Manchester was a little more satisfactory in some respects than in the two previous months, but there continued to be some dissatisfaction felt at the comparatively restricted volume of trade and the narrow margin of profit. Among the encouraging features the most important was the more active inquiry

for Calcutta, after a considerable period during which there had been almost no transactions for that port on account of the plague scare. Anticipations that the next American crop would be a large one caused buyers to operate only from hand to mouth and to withhold orders of any magnitude except at their own offers, and producers were consequently forced at times to make concessions in order to keep machinery employed. Yarns and goods exported from Great Britain were 107,773,000 lbs. against 103,732,000 lbs. in 1897. Estimates of consumption unchanged. Liverpool-Crop news from the United States was the main factor controlling the course of the Liverpool market for the raw material in July. The low level to which prices had already fallen, in view of the statistical position of the staple, precluded the possibility of any further drop except under extraordinarily favorable reports, but the news was sufficiently suggestive of a fine crop outlook to check any material advance. On the 1st of July middling upland was quoted at 3 13-32d. and rose to 3 7-16d. on the 5th. This price was steadily maintained until the 13th, when an advance of 1-32d. was established. Five days later there was a recession to 3 7-16d. and on the 22d another 1-32d. was lost. On the 27th and 23th gains of 1-32d. occurred, carrying middling upland to 3 15-32d., at which it closed.

AUGUST-Manchester-The conditions which prevailed in the market for cotton goods were not essentially different from those experienced during July, except in so far as they were effected by the decline in the raw material. An inclination on the part of the manufacturers to accept the prices offered would have resulted in a large volume of business being put through, as plenty of orders were in evidence and largely for Calcutta. But buyers limits were so unremunerative (because they were looking for a large yield of cottonin America and lower prices) that dealings were to a great extent confined to the satisfying of pressing needs, although some fair orders for South American countries were booked Buying for the home trade was also restricted, and for the same reason, purchases being made only to meet immediate wants; on the Continent the markets ruled quiet. Cable advices from India at the close of the month indicated that the plague was spreading, and it was officially announced that in the Bombay Presidency alone the deaths during the week ended August 27 aggregated 23,000. Liverpool-The market for cotton, as during July, was controlled almost wholly by crop reports from the United States. At the opening of business after the holidays middling upland was quoted at 315-32d., or the same as at the close of the previous month; but was marked up 1-32d. on the 9th and again on the 10th, upon reports of damage by rain, etc. Following the receipt of the Bureau report, which was more favorable than anticipated, prices weakened, and declining 1-32d. at a time reached 3 5-16d. on the 22d, the aggregate loss having been 7-32d. A recovery of 1-32d. occurred on the 27th, but the price receded again to 3 5-16d on the 30th, and so closed after a decline of 5-32d. during the month.

We now add our usual tables of consumption and supply of cotton. These figures are not the takings of the mills, but the actual consumption of the mills, and are in all cases expressed in bales of 500 pounds.

Consumption.		Europe.		Un	ited Stat	tes.	Total

\* Figures of European Consumption for 1896-97 and 1897-98 will probably be changed slightly by Mr. Ellison when he makes up his October Annual.

Another general table which we have compiled of late years is needed in connection with the foregoing to furnish a comprehensive idea of the extent and the expansion of this industry. It discloses Europe and America's cotton supply and the sources of it. The special points we have sought to illustrate by the statements are, first, the relative contribution to the world's raw material by the United States and by other sources, and, second, to follow its distribution.

WORLD'S SUPPLY AND DISTRIBUTION OF COTTON,

To illustrate the preceding, take the last season, 1897-98, and  ${\rm tb}_{\Theta}$  results would be as follows:

results would be as follows:	
Supply—Visible and invisible stock beginning of year	
Total crop during year	14,000,000
Total supply—bales of 500 lbs	
Distribution—Total consumption	
Burnt, &c., during year 410,000	-11,263,000
Leaving visible stock	
Leaving invisible stock	

Total visible and invisible stocks at end of year.. 3,081,000

† This column covers cotton exported to countries not covered by gures of consumption, and cotton burnt in United States, on sea, and n Europe

The foregoing clearly shows the course of the cotton industry in Europe and the United States. By including India, the actual world's consumption would appear as follows:

World's Consumption.	Great Britain.	Continent	United States.	India.	Total.
1880-81	2,858,000	2,365,000	1,694,000	297,000	7,214,000
1881-82	2,912,000	2,558,000	1,758,000	312,000	7,540,000

1896-97	3,224,000	4,368,000	2,738,000	1,004,000	11,334,000
1897-98	3,406,000	4,485,000	3,002,000	1.075,000	11,968,000

Note.—The above does not include American cotton consumed in Canada, in Mexico, and burnt.

#### Overland and Crop Movement.

Overland —There has been a gain in the volume of cotton carried overland the past year. This is certainly not surprising with so considerable an increase in the aggregate yield of the staple, nor is it strange that the ratio of addition to the rail movement should be greater than in the total crop as the greatest gains in yield have been in those portions of the cotton belt from which the overland traffic is mainly drawn. The actual excess over last year in the allrail movement is 613,800 bales, or 48 per cent, whereas the crop exceeds that of 1896-97 by but about 28½ per cent. Moreover this year's overland is greater than in any previous year.

While the various routes have quite generally shared in the increased movement this year, they have done so in a widely different degree. Through St. Louis the roads have carried nearly 60 per cent more cotton than in 1896-97 and the rate of gain via Cairo has been about 45 per cent. The route via Cincinnati shows a slight increase and via Parker 36 per cent more cotton has been moved. The Rock Island road, however, shows the heaviest addition—nearly 240 per cent—the amount of cotton passing that way this year having been 46,941 bales, against only 13,951 bales in 1896-97. Louisville roads have collectively carried a little less cotton than last year.

With regard to the proportionate marketings of the crop through the Southern outports, the changes in part reflect the alteration in yield of the different sections. For instance, while in the season just closed about every section produced more cotton than a year ago, the increase was greater in some cases than in others. In the Southwest the gain was heaviest and this is confirmed by the receipts at New Orleans, Galveston, etc. The variations that have occurred in the last ten years are shown in the subjoined statement.

In the above we have figured only what is called the net overland, as the remainder of the gross amount is counted at New York, Boston, Philadelphia, etc., or at the Southern ports where it first appears in the receipts. At the same time the entire aross overland reaches a market by some all-rail route; hence in measuring the total overland we can do so correctly only by using the gross figures. To indicate therefore the progress made since 1877-78 we give the following:

		Gross	Increase and	ease and Decrease-		
Orop of	Total Yield.	Overland.	Of Orop.	Of Overland.

Change from	season of '78	.79 to '97.98	Incr'se 120.4	Iner'se 112		

In determining this year the portion of the crop forwarded by each of the different overland routes, we have followed our usual methods:

First—Of counting each bale of cotton at the Southern outport where it first appears

Second-Of deducting from gross overland all cotton shipped by rail from Southern outports to the North.

Third-Of deducting also from overland any amounts taken from Southern outports for Southern consumption.

Fourth - Of deducting likewise arrivals by railroads at New York, Boston, Baltimore and Philadelphia, all of which have been counted in the receipts from week to week during the year.

With these explanations nothing further is needed to make plain the following statement of the movement overland for the year ending September 1, 1898:

	1897-98.	1896-97.	1895-96.
A mount shipped—			
Via St. Louis	883,356	574,035	560,880
Via Cairo	397,916	274,165	245,616
Via Parker	32,681	24,056	19,955
Via Rock Island	46,941	13,951	20,637
Via Louisville	134,111	137.107	138,302
Via Cincinnati	156,015	151,439	123,668
Via other routes	227,794	94,640	69,688
Shipped to mills, not included above	17,207	12,798	11,553
Total gross overland	1,898,011	1,282,211	1,190,299
Overland to New York, Boston, &c	509,408	327,845	268,839
Batween interior towns	50,953		
Galveston, inland and local mills	7,375		-,
New Orleans, inland and local mills	19,190		
Mobile, inland and local mills	7,743	7,049	7,892
Savannah, inland and local mills	500	5,146	1,946
Charleston, inland and local mills	3,611	11,862	8.598
W. Carol'a ports, inland and local mills.	3,199	3,802	4,518
Virginia ports, inland and local mills.	17,418		15,184
Total to be deducted	619,397	409,207	338,511
Leaving total net overland*	1,276,614	973,004	851,788

 This total includes shipments to Canada, &c., by rail, which during 1897-99 amount d to 113,470 bales, and are deducted in the statement of consumption.

CROP DETAILS.—We now proceed to give the details of the entire crop for two years.

" Including Florida.

According to the foregoing, the average gross weight per bale this season was 506.88 lbs., against 503.08 lbs. in 1896-97, or 3.80 lbs. more than last year. Had, therefore, only as many pounds been put into each bale as during the previous sea son, the crop would have aggregated fully 11,265,350 bales. The relation of the gross weights this year to previous years may be seen from the following comparison:

	Orop.	Average Weight. per Bale.

#### New Crop and Its Marketing.

That the cotton crop is on the whole a late one seems to be evident. It will be remembered, too, that our acreage report showed that it started late. Not only have the first bales made their appearance less early than in an average season, but the volume of new cotton brought forward up to the close of August is behind the total for any recent year except 1895. This is true notwithstanding the heated term, which has prevailed over the whole belt for some weeks, has served to force the maturity of the plant, making the receipts from the earlier sections quite free. A late crop this year has not inconvenienced spinners because their stocks of cotton carried over are large. In that particular their condition was quite different in 1897, when Southern mills had before the close of July practically exhausted their supply of the raw material and continuous operations depended upon the quick delivery of cotton by producers. The maturity of the plant is, though, always an incident of more or less consequence, as bearing upon the extent of the yield, for, if late in maturing, a later or more favorable picking season is required for the ingathering.

It is impossible at this date to give definite indication of the extent of the growing crop, as so much depends upon later developments. The known facts up to September 1 are: (1) That the acreage planted was only slightly less than the planting in 1897. (2) That the plant in the Atlantic States had a poor start, but elsewhere about an average; that the development in April and first half of May was hardly up to the average. (3) That subsequent to the first of June reports received with regard to condition, development, etc., were in the main favorable until near the close of July. Since the first of August, and in fact since the closing week in July began, complaints of damage from various causes have arisen. Summing up the results as they appear at this date, we would say that in Texas the prospect at the moment is believed to be good for a pretty full yield in at least four-fifths of the State; in Missis. sippi the same also appears to be true; in Tennessee the crop is reported as looking well; in Arkansas complaints have recently been numerous and serious enough to make a full yield in the State improbable; in Georgia, Alabama and a part of North Carolina the outlook is no doubt least encouraging.

We bring forward our usual data bearing upon the maturity of the plant, giving first the date of receipt of first bale. This year the earliest arrival was at New Orleans from Texas on July 2. Last year the first bale also came from Texas being received at Houston on June 30, and in 1896 the same State furnished the initial bale, on July 10. There is, however, little to be learned from a first arrival, but the average of all the first arrivals is a better guide.

MANUAL SOCOCOC		ARRESERS!		********	********	and the same	Ching. at

As an indication of maturity the arrivals of new crop cotton to the 1st of September usually furnish a much better test. And this is so in the present season, when, as stated above, there have been no circumstances tending to hasten the early movement. It will be observed that New Orleans has, received only 4,174 bales, or very much less than last year, and that at Galveston the arrivals have reached 22,600 bales, against 29,122 bales in 1897.

sea Island Crop and Consumption.

We have continued throughout the season of 1897-98 the compilation of a weekly record of the Sea Island crop, and no effort has been spared to keep our readers well informed as to the movement of this variety of cotton. As in former years, the correctness of our methods in compiling the totals from week to week is pretty well established by the results given below (which agree closely with the figures published in the CHRONICLE of August 19). It will be noticed that the crop shows a decided decrease from 1896-97, the year of heaviest yield on record.

† 52 South Carolina

From the foregoing we see that the total growth of Sea Island this year is 76,119 bales; and with the stock at the beginning of the year (7,414 bales) we have the following as the total supply and distribution:

This year's crop	bales.	76,119 7,414
Total year's supply	.bales.	83,533
Exported to foreign portsbales, Stock end of yearbales,		49,393

Leaving for consumption in United States......bales. 34,140 We thus reach the conclusion that our spinners have taken of Sea Island cotton this year 34,140 bales, or 6,530 bales less than in the previous year.

The following useful table shows the crops and movement of Sea Island since the war, the figures for the seasons 1890-91 to 1896-97 being given in detail.

\* Receipts and shipments are net figures in both years. † Last year's figures are for Columbia, S. C.

Shipments in this statement include amounts taken from interior towns for home consumption and amounts burnt.

In the following we present a statement of the year's exports from each port, showing the direction which these shipments have taken. Similar statements have been given in all previous reviews, and a comparison as to the extent of the total movement to each port can be made with back years. Contrasting the current returns with those for last season, we find that there has been an increase in the exports to almost all ports.
